Why GRADUATE STUDIES in CHEMICAL ENGINEERING?

As a PhD student in the field of Chemical Engineering, you can play a vital role in future developments in such areas as biological conversion, pollution degradation, tissue engineering, process control and optimization, (bio)chemical sensing, nanocomposites, and many of other areas. Chemical Engineering has a wide range of applications that contribute to modern life and its technologies.

Graduate students and their work are an important part of an ongoing research process that provides the community with ways of understanding natural, cultural, imaginative, social and technological phenomena. Check out whygradstudies.ca for more reasons to choose graduate studies in engineering.

Why QUEEN’S?

Queen’s University is one of Canada’s leading research-intensive universities, with over $14 million in sponsored research funding and almost $5 million in revenues from technology transfer. It consistently ranks as one of the top three medical/doctoral universities in Canada and offers an unparalleled environment to facilitate academic development. Among Queen’s goals is to attract and retain students with outstanding potential from across Canada and around the world.

The Department of Chemical Engineering at Queen’s University is based in Dupuis Hall and the Biosciences Complex, which are multi-purpose facilities with extensive research laboratories, and large- and small-group teaching classrooms.

Areas of intense research in the department include: Biomedical engineering, polymer and reaction engineering, process systems engineering, sustainable energy sources and environmental engineering. Activities range from developing new bio- and polymeric materials and production techniques, to understanding how the dynamic structure of a chemical process limits the performance that can be achieved. Significant collaborations across these fields exist within the department, and faculty members also collaborate extensively with other researchers across Queen’s and at other institutions.

RESEARCH Areas

- Biochemical Engineering
- Macromolecular Science and Technology
- Process Analytics, Optimization, and Control
- Microfluidics, Colloids, and Biosensors
- Sustainable energy sources, processes, products, and environmental remediation

We suggest that you review the specific research projects currently being investigated by faculty members to identify a potential supervisor. Please note, however, that contacting a faculty member does not guarantee acceptance and you will need to submit your full application in order to be considered.

Visit the Chemical Engineering Department website to read faculty profiles and learn more about faculty members’ research areas.

Program STRUCTURE

PhD (4 years): course work, research thesis, comprehensive exam, and two seminars.

The Chemical Engineering Department offers opportunities to collaborate with scientists in the Human Mobility Research Centre and Computational Science and Engineering, as well as with co-supervising faculty in other departments.

**MAXIMIZE RESEARCH IMPACT**

| • Think about audiences for your research. | • Present your work at graduate conferences. | • Consider participating in the 3 Minute Thesis (3MT) competition. | • Connect with scholars in your field and with community partners. Continue to attend conferences, such as the Canadian Chemical Engineering Conference. Speak with your supervisor about Student Academic Success Services career planning workshop. |
| • Complete ROMEO online module on research ethics if doing research with living people or sensitive topics. | • Expand your research audience through social media. Learn from the Expanding Horizons Publishing workshop. | • Prepare for work or study in a multi-cultural environment, such as by taking the Queen's Media Centre for guidance on speaking to news outlets about your work. List yourself on the Faculty of Engineering and Applied Science Research website. | • Attend conferences in your field. |
| • Apply to NSERC, CGS, and other funding. | • For help with teaching, get support from the Student Career Week or the Student Academic Success Services Competency Certificate. | • Continue to present at conferences. | • Develop connections with faculty outside of your department. Pursue internships with faculty positions and apply for post-doc fellowships and positions. |
| • Attend conferences in your field. | • Consider publishing elements of your research. | • Consider participating in the 3 Minute Thesis (3MT) competition. | • Help from a Collaborative Worker. |

**BUILD SKILLS AND EXPERIENCE**

| • Serve on departmental, faculty or university committees. Talk to the Chemical Engineering Graduate Student Association (CEGSA) about getting involved. | • Serve on departmental, faculty or university committees. Talk to the Chemical Engineering Graduate Student Association (CEGSA) about getting involved. | • Continue to present at conferences. | • Consider joining professional associations like the Canadian Society for Chemical Engineering. |
| • Consider positions in student services, the SGS, or media outlets like the Queen’s Journal, CFR and the SGS Blog, or in theAMS Clubs Directory. | • Consider positions in student services, the SGS, or media outlets like the Queen’s Journal, CFR and the SGS Blog, or in theAMS Clubs Directory. | • Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop. | • Connect with colleagues in your field. |
| • Use a Teaching Assistant or Research Assistant position to develop your skills and experience. | • Use a Teaching Assistant or Research Assistant position to develop your skills and experience. | • Secure necessary oral defence accommodations. | • Attend conferences in your field. |

**ENGAGE WITH YOUR COMMUNITY**

| • Consider volunteering with different community organizations. | • Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups like Material Matters. | • Do some targeted networking with people working in careers of interest. Join groups on LinkedIn reflecting specific careers or topics of interest in Chemical Engineering. | • Consider volunteering with different community organizations. |
| • Connect to broader communities of engineers. | • If pursuing research abroad or outside Kingston, investigate options. | • Consider publishing elements of your research. | • Continue to present at conferences. |

**LAUNCH YOUR CAREER**

| • Finding career fit starts with knowing yourself: Take a Career Services career planning workshop or meet with a career counsellor for help. Check out books like So What Are You Going to Do With That? For advice on various career options. | • Start building your teaching portfolio including student evaluations, and seeking mentorship. | • Participate in hiring committees and attend job talks. Research academic careers of interest. Craft your CV and job application materials. | • Build connections with faculty outside of your department. Pursue internships with faculty positions and apply for post-doc fellowships and positions. |
| • Start reading publications like University Affairs and the Chronicle of Higher Education. Know non-academic market websites. | • Explore different careers of interest by reading alumni profiles on the SGS website, and using Queen Connects on LinkedIn to connect with Queen’s alumni, or find alumni in various careers through Ask an Alumni! For more information check out Career Counseling. | • Start focusing on non-academic areas of interest. Research organizations of interest and start putting together your industry resume and begin your job search plan. | • Apply to jobs or make plans for other adventures. |
| • Stay on the lookout for special events like Graduate Student Career Week to explore your career pathways. | • Investigate requirements for professional positions or other opportunities related to careers of interest. | • Check out the free online modules at MyGradSkills to help you plan your career. | • Help from a Collaborative Worker. |

**WHAT WILL I LEARN?**

A graduate degree in Chemical Engineering can equip you with valuable and versatile skills, such as:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Persuasiveness
- Independence and experience as a collaborative worker
- Awareness, an understanding of social ethical practices, social responsibility, responsible research and cultural sensitivity
- Professionalism in all aspects of work, research, and interaction
- Leadership: Initiative and vision leading people and discussion

**WHERE CAN I GO?**

A PhD in Chemical Engineering can take your career in many directions. In Canada, less than 40% of all PhDs will work in post-secondary education – the majority will work in industry, government, or non-profits. Graduates from the Chemical Engineering PhD program have found careers in:

- Biochemical Engineering
- Biomedical Engineering
- Environmental Engineering
- Fuel Cells
- Macro-molecular Processes and Products
- Microfluidics & Biosensors
- Process Systems Engineering
- Technology: Develop career options, build experience, and network to help you have a smooth transition to the world of work after graduation.

Graduate Studies FAQs

How do I use this map?

Whether you are considering or have embarked on graduate studies at Queen’s, use this map to plan for success in five overlapping areas of your career and academic life. The map helps you explore possibilities, set goals and track your individual accomplishments. Everyone’s journey is different – the guide offers options for finding your way at Queen’s and setting the foundation for your future. To make your own customized map, use the online My Grad Map tool.

Where can I get help?

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGS HABITAT for available resources.

What is the community like?

At Queen’s, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen’s more than 130 graduate programs within 50+ departments & research centres. With the world’s best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen’s offers a wonderful environment for graduate studies. Queen’s is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston’s history and culture, see Queen’s University’s Discover Kingston page.

Application FAQs

What do I need to know to APPLY?

**ACADEMIC REQUIREMENTS**

- Master of Applied Science or Master of Science.
- **Grade requirements**: minimum cumulative average of B+, with a minimum of 77% in last year of study.

**ADDITIONAL REQUIREMENTS**

- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The School of Graduate Studies requires the following minimum scores: TOEFL (paper-based): 550, (2) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30), for a total of 88/120 (applicants must have the minimum score in each test as well as the minimum overall score), or (3) IELTS: 7.0 (academic module overall band score), or (4) PTE Academics: 65.

**KEY DATES & DEADLINES**

- **Application deadline**: There is a constant intake so there is no set deadline for application. If you are international, we recommend that you have completed your application at least 4 months ahead of your admission cycle. Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The level of financial support consequently varies among graduate students in the Department, with a guaranteed minimum level of $25,000 (Masters and PhD) for 2016-2017. As part of the minimum funding package, you may serve as a Teaching Assistant for at least one term per year.

We encourage all students to apply for external funding from OGS, SSHRC and other sources. Queen’s will automatically issue a $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships.
