Why GRADUATE STUDIES in GENDER STUDIES?

Gender studies opens doors for students to address growing concerns for inequity, equity and justice across national and global society. Gender affects everyone, making gender studies a space where our theory and our practice pay attention to the differences and connections among diverse peoples worldwide.

As an interdisciplinary field, gender studies helps students take up social science, humanities, arts, and natural science methods and connect them to produce innovative new knowledge. Graduates of the MA in Gender Studies at Queen's pursue advanced degrees in American studies, English, environmental studies, gender studies, legal studies, and medicine, and work in such fields as education, health, law, public policy, social research, social work, media, art and community organizing. Gender studies prepares students for both academic and nonacademic careers.

Why QUEEN'S?

Gender Studies at Queen's teaches critical race, gender and sexuality studies and their applications to work for social change. Students examine gender, our key category of analysis, in terms of its connections to race, class, nation, sexuality, disability, age, religion, colonialism and globalization. Our program emphasizes critical race conceptual frameworks at all levels of instruction.

Our world-class faculty hold SSHRC grants, supervise active research programs, serve as editors of peer-reviewed journals, and publish widely in Canadian and international presses. Faculty research and teaching are advancing feminist, queer, and trans studies by centering anti-racist, anti-colonial and transnational theories and methods. Our students conduct research in Canada and internationally and connect their scholarship to local and global work for social justice.
