Mining Engineering

MAJOR MAP

Succeed in the workplace

What employers want

The Canadian Council of Chief Executives list the top 6 skills sought by employers as:
1. People skills
2. Communication skills
3. Problem-solving skills
4. Analytical abilities
5. Leadership skills
6. Industry-specific knowledge

It is important to develop a balanced skillset. Take the time to think about the unique skills you have developed at Queen's, starting with the ones listed here for ideas. Exploring your strengths with compelling examples will be important for applications to employers and further education. For help, check out Career Services workshops.

What can I learn studying MINING ENGINEERING?

• Proficiency in mathematics and physical sciences
• Proficiency in mining sciences
• Relevant analysis and designing skills
• Relevant work experience in mining engineering
• Working knowledge of design software for mining engineering
• Written and oral communication skills
• Time and resource management
• Ability to work independently and in a team on projects

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified us as one of the GREATEST UNIVERSITY TOWNS in the world – and is often awarded the safest city in Canada. We are a university at the core, just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s - and graduate with a degree that is globally recognized among the best.

Get to know MINING ENGINEERING

Aside from the plant material we harvest, all of the raw material used by human society comes from minerals extracted from the earth. This program prepares you for careers in both the minerals industry and related environmental and technological fields. As a Mining Engineering student, you will study a broad range of disciplines involved in locating, extracting, refining, and disposing of mineral and metal products and byproducts. The program teaches students how these processes can be carried out efficiently and competitively, with a focus on sustainability and the environment.

Queen’s ADMISSIONS

Students apply to Queen’s Engineering (IE) through the OUAC (Ontario University Application Centre) website. Secondary School prerequisites include five 4U and 4M courses, one of which must be English 4U. Calculus and Vectors 4U, Chemistry 4U, and Physics 4U are all required along with one of Advanced Functions 4U, Biology 4U, Data Management 4U, Computer Science 4U, Earth and Space Science 4U. A final grade of 70% must be obtained in English 4U. Applicants outside of Ontario may have additional requirements.

A Common START

Queen’s is unique in offering a common First Year along with an open discipline choice. When you do choose your program, you don’t have to worry about caps or quotas. Provided you pass all of your First Year courses, you are guaranteed a place in your engineering program of choice. Queen’s also offers Section 900, a special extended program for students struggling with First Year courses. Take things at a slower pace and recover in time for Second Year.

Acquire Skills. Gain Experience. Go Global. That is a degree from Queen’s.

Degree OPTIONS

Bachelor of Applied Science
Option in Mining / Minerals Processing and Environmental / Mine-Mechanical

Course HIGHLIGHTS

Mining Engineering students have the opportunity to take a wide range of technical courses to help prepare them for the many possible career destinations available. Such courses include:
- Mine Design and Planning
- Drilling and Blasting
- Mining and Sustainability
- Chemical Extraction of Metals
- Mineral Industry Economics
- Equipment Reliability and Maintenance

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Acquire Skills. Gain Experience. Go Global. That is a degree from Queen’s.
Mining Engineering

BACHELOR OF APPLIED SCIENCE | BACHELOR OF APPLIED SCIENCE WITH PROFESSIONAL INTERNSHIP

1ST YEAR
- Courses: Solid Mechanics, Differential Equations, Mining & Mineral Processing, Computer Applications & Instrumentation in Mining, Engineering Economics, Electric Circuits & Machines, Numerical Methods and Underground Mining. You will take the second EDPS course – APSC200. Your other 3-4 courses depend on your option!

2ND YEAR

3RD YEAR
- Courses: Reliability, Maintenance, & Risk Assessment, Mining & Sustainability, Occupational Health & Safety, as well as your 4th year project course. Your other courses depend on your option! Apply to graduate on SOLUS.

4TH OR FINAL YEAR
- Investigate requirements for full-time jobs or other opportunities related to careers of interest. Are you considering grad school or other adventures? Get help from Career Services with your technical knowledge. Apply for EIT (Engineer-in-Training) status.

GET THE COURSES YOU NEED
- Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing and Earth Systems Engineering. Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focusing on problem solving, experimentation principles and finishing off with a team-based engineering project. Discipline selection will take place in February!

GET RELEVANT EXPERIENCE
- Join teams or clubs on campus such as the Queen’s University Experimental Sustainability Team (QUEST). See the AMS Clubs Directory or the Queen’s Get Involved page for more ideas.

GET CONNECTED WITH THE COMMUNITY
- Volunteer on or off campus with different community organizations such as Engineers without Borders (EWB). Consider joining an intramural sports or an athletics team. Check out the Athletics & Recreation site.

GET THINKING GLOBALLY
- Speak to a QUIC advisor or get involved in their programs, events and training opportunities. Prepare for work or studies in a multi-cultural environment by taking QUIC’s Intercultural Competency Certificate, and research possible immigration regulations.

GET READY FOR LIFE AFTER GRADUATION
- Grappling with program decisions? Go to the Orientation Evenings held by different Engineering departments and attend the various Career Fairs during the year. Get some help deciding by visiting Career Services.

Where could I go after graduation?
- Academia
- Banking and venture capital
- Business management (mine manager, director, vp, ceo, president)
- Environmental management
- Equipment designer
- Government (mine inspector, health and safety, environment)
- International development
- Law
- Mine construction
- Mine engineer
- Mine planner and scheduler
- Mine supervisor
- Mineral exploration
- Mineral processing
- Metallurgist
- Mining consultant
- Mining financial analyst
- Mining sales representative
- Mining supplier
- Occupational health and safety
- Petroleum and gas industry
- Project engineer
- Project manager
- Renewable resources
- Sustainability
- Technical specialist
- Waste management

*some careers may require additional training. Careers listed here are only suggestions.
