Why GRADUATE STUDIES in CULTURAL STUDIES?

Cultural Studies is an emphatically interdisciplinary area of inquiry that intersects the humanities, science studies, social sciences, and the arts. Its researchers theorize the forces that shape the lived reality of people in the 21st century.

What distinguishes Cultural Studies from other approaches to the study of culture is its recognition that no single disciplinary approach can address the complexity of cultural and social forms and experiences. Cultural Studies researchers investigate values, beliefs and belongings, cultural processes and cultural objects, economic and social relations, institutions, and identities. Cultural Studies therefore draws on a range of methods and critical theories and strives to do so self-reflexively. We aim to break down conventional divisions not only among academic disciplines but also between academia and activism, and between theoretical analysis and cultural production. It is our expectation that analyses of class, race, and gender, alongside other axes of social difference and inequality, will pervade all teaching and research conducted in our program. Our students produce work in a variety of media and formats, from the monograph thesis to visual arts and community-engaged projects.

Our goal is to create an intellectual environment that combines a high level of academic scholarship and ongoing meaningful engagement with local and global communities.
