Why GRADUATE STUDIES in BIOMEDICAL & MOLECULAR SCIENCES?

Graduate students and their work are an important part of an ongoing research process that provides the scientific community with ways of understanding fundamental biomedical and molecular processes underlying normal cellular and microbial processes, organ system function, and human disease. The faculty, staff, and trainees in Biomedical and Molecular Sciences are engaged in world-class research and teaching, attracting and mentoring the best students, the finest educators, dedicated support staff, and internationally-competitive researchers. We value curiosity, creativity, commitment, and collegiality.

Why QUEEN’S?

The Biomedical and Molecular Sciences Department at Queen’s provides a cross-disciplinary environment and delivers the programs in a collaborative and integrated manner. This interdisciplinary approach gives candidates access to over 80 faculty members engaged in a broad spectrum of biomedical research, using techniques to address questions concerning single molecules, cellular/microbial function, organ-systems, and whole-animal biology.

Program STRUCTURE
PhD (4 years, full time): Research and comprehensive exam, thesis, and oral defense.

Fields of SPECIALIZATION
- **Biochemistry and Cell Biology**: focuses on understanding the fundamental processes of life and human disease.
- **Experimental Medicine**: employs interdisciplinary methods to explore the processes responsible for both the normal and diseased state.
- **Microbes, Immunity, and Inflammation**: focuses on questions at the cellular and molecular level involving viral and bacterial organisms and the immune system.
- **Reproduction and Developmental Sciences**: spans clinical and basic science, with a focus on fertilization and embryo implantation, perinatal health, women’s health, and more.
- **Therapeutics, Drug Development, and Human Toxicology**: focuses on the effects, both beneficial and deleterious, of chemicals including drugs and environmental contaminants, on human health.

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Biomedical and Molecular Sciences website to read faculty profiles, and learn more about faculty members’ research areas and research groups. When you find a faculty member with similar research interests to yours, contact them and tell them about your interest in graduate work and related experience.

See the Biomedical and Molecular Sciences Graduate Student Handbook online for more detailed information about the program.

"DBMS provides graduate trainees the opportunity to conduct novel research in a collaborative, inclusive, and close-knit environment. Faculty promote cross-disciplinary learning by ensuring students are exposed to various scientific themes and cutting edge research techniques."

- Rylend Mulder, PhD Candidate
### Biomedical & Molecular Sciences PhD Map

**DOCTOR OF PHILOSOPHY**

#### ACHIEVE YOUR ACADEMIC GOALS

**YEAR I**
- Key priorities include your relationship with your supervisor, completing required health and safety, and animal research ethics training, and any required coursework, and developing your research proposal.
- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.

**YEAR II**
- Priorities include completing your comprehensive examination and pursuing substantive research.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Find your way through the academic process with the help of School of Graduate Studies and Postdoctoral Affairs professional development, and the SGSPA website.
- Complete ADDA training in accessible customer service.
- Seek experiential/professional development opportunities.

**YEAR III**
- Continue to meet regularly with your supervisor, review research progress, and write your dissertation. Check out the SGSPA Dissertation Boot Camp or Dissertation on the Lake.
- Use conference presentations to create, discuss, and explore ways to disseminate research findings.
- Begin discussion of potential thesis defence examiners.
- Plan date of thesis submission for examination.
- Present your research to graduate students and faculty or at conferences and work with your department to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.

**YEAR IV & TRANSITIONING**
- Continue to attend conferences and connect with scholars in your field and with community partners.
- Continue public outreach through social media and the Queen's Media Centre.
- Practice articulating the skills you have developed in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Attend a major conference in your field, such as a Canadian Society for Molecular Biosciences Annual Meeting. There are many to choose from, so talk to your supervisor for advice on which ones would be most relevant.

#### MAXIMIZE RESEARCH IMPACT

**BUILD SKILLS AND EXPERIENCE**

- Think about audiences for your research.
- Complete Core online module on research ethics if doing research with living people or sensitive data.
- Apply to CIHR, NSERC, OGS, and other funding.
- Attend conferences in your field.
- Serve on departmental, faculty, or university committees. Talk to the graduate representative for tips on getting involved.
- Consider positions in student services, the SGSPA, or media outlets like the Queen's Journal, QFRE, and the SGSPA Blog - Gradifying and the SGSPA website. Look in the CAS, Clubs, Directory.
- Use a Teaching Assistant or Research Assistant position to develop your skills and experience.
- Hone skills for non-academic employment by continuing involvement on committees and in community.
- Start keeping an ePortfolio of your skills, experiences, and competencies.
- For help with teaching, get support from the Centre for Teaching and Learning. Enrol in SGO03 or the Fislic Certificate for more professional development.
- Find opportunities for extra training through CIT, School of Graduate Studies and Postdoctoral Affairs professional development, Mitacs, or other sources to boost your skills.
- Prepare for work or studies in a multicultural environment by taking the International Awareness Training Certificate hosted by QUIC and PDSC.
- Do some targeted networking with people working in careers of interest through Queen'sConnects on LinkedIn, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Consider signing up for the PhD-Community Initiative program run by the SGSPA.
- Participate in graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- If pursuing research abroad in other Kingston, investigate options for funding with your supervisor or the Program Director.
- Do some targeted networking with people working in careers of interest through Queen'sConnects on LinkedIn, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Consider joining one of the many professional associations related to biomedical & molecular sciences, such as the Canadian Society for Molecular Biosciences (CSMB).
- Continue targeted networking with people working in careers of interest. Join groups on LinkedIn reflecting specific careers or topics of interest in biomedical & molecular sciences.
- Consider joining one of the many professional associations related to biomedical & molecular sciences, such as the Canadian Society for Molecular Biosciences (CSMB).
- Continue targeted networking with people working in careers of interest. Join groups on LinkedIn reflecting specific careers or topics of interest in biomedical & molecular sciences.
- Start building your teaching portfolio including student evaluations and seeking mentorship.
- Explore different careers of interest by using Queen'sConnects on LinkedIn to connect with Queen's alumni. For more information check out Career Services.
- Investigate requirements for professional positions or other opportunities related to careers of interest.
- Start building your teaching portfolio including student evaluations and seeking mentorship.
- Explore different careers of interest by using Queen'sConnects on LinkedIn to connect with Queen's alumni. For more information check out Career Services.
- Investigate requirements for professional positions or other opportunities related to careers of interest.
- Participate in hiring committees and attend job talks. Research academic careers of interest. Craft your CV and job application materials.
- Start focusing on non-academic areas of interest and start putting together your industry resume and begin your job search plan.
- Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
- Apply to jobs or make plans for other adventures. Get help from Career Services with job searching, resumes, or interviews.
- If considering jobs abroad, research possible immigration regulations. If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

#### ENGAGE WITH YOUR COMMUNITY

- Consider volunteering with different community organizations, such as Kingston General Hospital.
- Connect to broader communities of biomedical and molecular science professionals.
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- If pursuing research abroad in other Kingston, investigate options for funding with your supervisor or the Program Director.
- Do some targeted networking with people working in careers of interest through Queen'sConnects on LinkedIn, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Consider signing up for the PhD-Community Initiative program run by the SGSPA.
- Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
- Apply to jobs or make plans for other adventures. Get help from Career Services with job searching, resumes, or interviews.
- If considering jobs abroad, research possible immigration regulations. If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

#### LAUNCH YOUR CAREER

- Finding a career that fits starts with knowing yourself. Take a Career Services workshop or meet with a career educator and coach for help. Check out the Career Resource Area for advice on various career options.
- Stay on the lookout for special events like Graduate Student Career Week to explore your career pathways.
- Start building your teaching portfolio including student evaluations and seeking mentorship.
- Explore different careers of interest by using Queen'sConnects on LinkedIn to connect with Queen's alumni. For more information check out Career Services.
- Investigate requirements for professional positions or other opportunities related to careers of interest.
- Start building your teaching portfolio including student evaluations and seeking mentorship.
- Explore different careers of interest by using Queen'sConnects on LinkedIn to connect with Queen's alumni. For more information check out Career Services.
- Investigate requirements for professional positions or other opportunities related to careers of interest.
- Participate in hiring committees and attend job talks. Research academic careers of interest. Craft your CV and job application materials.
- Start focusing on non-academic areas of interest and start putting together your industry resume and begin your job search plan.
- Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
- Apply to jobs or make plans for other adventures. Get help from Career Services with job searching, resumes, or interviews.
- If considering jobs abroad, research possible immigration regulations. If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

#### WHAT WILL I LEARN?

A graduate degree in Biomedical and Molecular Sciences can equip you with:
- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize, and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Perseverance
- Independence and experience as a professional
- Awareness: an understanding of the role of biomedical and molecular sciences in society
- Professionalism in all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

#### WHERE CAN I GO?

A Master's degree in Biomedical & Molecular Sciences can take your career in many directions. Many of our MSc students choose to continue their academic inquiry with a PhD. Our MSc students are equipped with a strong foundation for careers in:
- Academic, Health Care, Government, Private Sector Administration
- Educational specialization in Patent Law, Public Health, Business
- Entrepreneurial Ventures
- Health Care
- Marketing positions in Private Sector Pharmaceutical Industry
- Research in Academic and Private Sectors
- Teaching in Academic Institutions or Private Sector

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.
Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- A Master's degree is normally required for admission to the PhD program. In certain circumstances, direct admission to the PhD program is possible.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application due: March 1st (To be considered for internal awards). Flexible deadline.
- Notification of acceptance: Pending confirmation of a supervisor.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The total minimum guaranteed stipend is $28,500 per academic year for PhD students in Biomedical and Molecular Sciences. This includes $4,500 in TAship earnings per year.

There will also be opportunities for additional TAship earnings throughout the academic year for PhD students that are on top of the minimum guaranteed stipends.

We encourage all students to apply for external funding from OGS, SSHRC, and other sources. Queen's will automatically issue a one time $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies and Postdoctoral Affairs' information on awards and scholarships.

How do I use this map?

Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone’s journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.

What is the community like?

At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen's more than 130 graduate programs within 50+ departments & research centres. With the world’s best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen's is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston's history and culture, see Queen's University's Discover Kingston page.
