## **Health Sciences**

# Get to know HEALTH SCIENCES

The Bachelor of Health Sciences (BHSc) program is a direct-entry program designed for students interested in human health. Human health can be studied from the perspectives of biomedical and social science, and the BHSc program aims to address both perspectives. Students who develop a particular interest in an area of the health sciences may choose to take one (or more) specially-designed learning tracks. These provide a more specialized focus within a particular field, ranging from Infection, Immunity, and Inflammation to Global and Population Health.

Professions in the health sciences are varied and Queen's BHSc will introduce you to the depth and breadth of careers in this expansive field. In addition, many post-graduate health professional programs are increasingly competencybased, meaning that their graduates must achieve and demonstrate competency in specific health-related roles. This concept has been built into the BHSc curriculum, enabling our graduates to provide evidence of their achievements as leaders, communicators, professionals, scholars, collaborators, content experts, and advocates. This provides BHSc students with the language to communicate these gained skills in applications or interviews to professional programs or job positions, including those in research, government, or non-government organizations, or health administration.

Queen's BHSc is offered both on-campus and online, using interactive, engaging modules to deliver course content. The core courses in the on-campus program are offered in a blended format. This means that after completing weekly course modules, students come to class and interact with faculty members and peers to connect and apply learned concepts to problem solving scenarios, such as case studies, interpretation of scientific data, or mock conference presentations.

The online program is designed to ensure our students interact with their faculty members and peers as well, via discussion boards and video software.

## **Degree OPTIONS**

Bachelor of Health Sciences (Honours) 4 Years, 120 credits

Bachelor of Health Sciences (General) 3 Years, 90 credits

## Course HIGHLIGHTS

The Bachelor of Health Sciences program has been purpose-built to expose learners to a wide range of knowledge in the field of health sciences. Innovative courses have been developed such as:

- Biohacking and Gerontechnology
- Developmental Origins of Health and Disease
- Health Ethics, Law, and Policy
- · Evolutionary Biology of Cancer

In addition to these courses, the curriculum highlights a number of traditional fields within the health sciences, including Physiology, Pharmacology, and Anatomy, while also incorporating important topics such as Global and Population Health and Social and Physical Determinants of Health and Disease. Faculty members within the Health Sciences range from academics to practicing physicians, providing Queen's BHSc students with a unique perspective on undergraduate education.

## Queen's ADMISSIONS

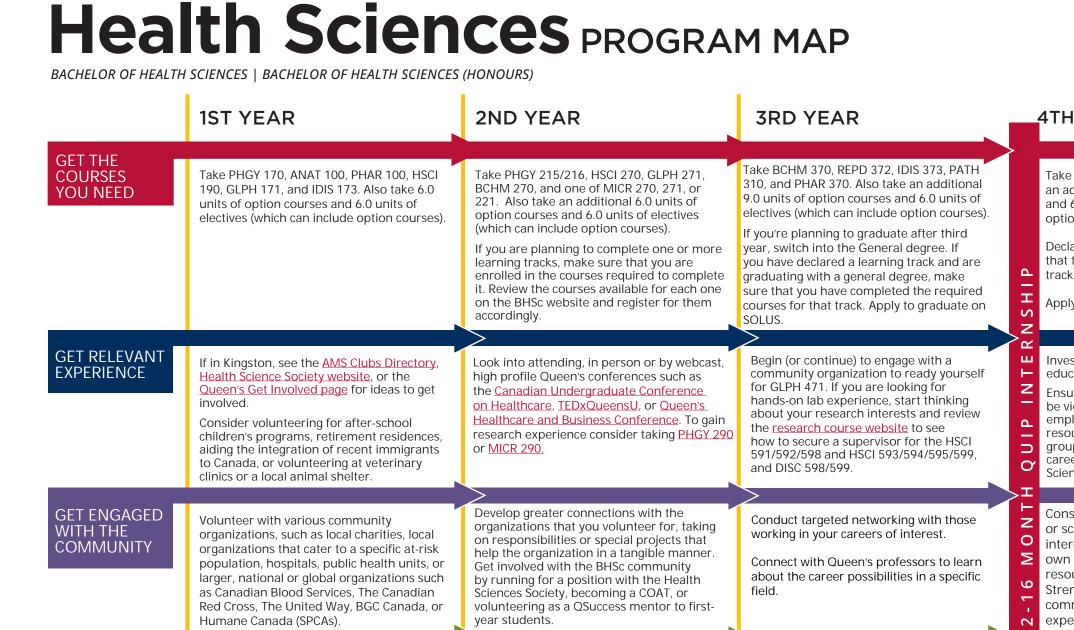

Applicants who have, or will successfully complete, a diploma from a Canadian or International high school will be considered through the traditional admission stream. Candidates can apply through OUAC (Code QH (on-campus), QHO (online), or through Queen's webapp (online). Applicants are required to have an 80% in 4U (or equivalent) English, 4U biology, 4U chemistry, and one of 4U Advanced Functions or 4U Calculus and Vectors, along with two additional 4U or 4M courses. Check online for courses required for students outside of Ontario. If you are applying to an on campus program (QH) you are also required to complete a supplementary essay.

Acquire Skills. Gain Experience. Go Global.

That is a degree from Queen's.

GET ENGAGED GLOBALLY

Think about incorporating topics like international affairs and global health issues into your degree.

in French through Queen's courses or language clubs, city-run programs, or through apps such as Duolingo, Rosetta Stone, or Babble.

Consider increasing your proficiency

**GET CAREER** 

Explore the BHSc program website to see how it can act as a stepping stone to a new healthcare career.

Need career advice? You can book an appointment with a career educator and coach through MyCareer or call the Career Services reception at 613.533.2992.

Grappling with program decisions? Talk to one of the BHSc Academic Advisors by emailing bhscadvisor@queensu.ca. Look for opportunities to get hands-on experience in your field by completing an internship through QUIP, volunteering in hospitals, veterinarian or dental clinics, or through summer work opportunities at Queen's through SWEP or outside of Queen's through government/private laboratories.

If you're looking to internationalize your

4TH YEAR (HONOURS)

Take GLPH 471 and REPD 473. Also take an additional 18.0 units of option courses and 6.0 units of electives (which can include option courses).

Declare your learning track and make sure that the required courses to complete your track(s) are taken.

Apply to graduate on SOLUS.

Investigate full-time jobs or further education related to careers of interest.

Ensure your LinkedIn profile is ready to be viewed by recruiters and potential employers; use Queen's Career Services resources to improve your profile. Join groups on LinkedIn reflecting specific careers or your topics of interest in Health Sciences.

Consider joining professional associations or scientific societies in your field of interest. Some of associations have their own internal field-specific job boards or resources that could be useful to you. Strengthen your ability to respond to community health needs and gain practical experience by taking GLPH 493.

Check Queen's University International Centre (QUIC) resources for ideas to work/ intern, or volunteer abroad.

Find impactful work that aligns with your values using the Queen's Career Guide to the UN Sustainable Development Goals.

## **Knowledge & Workplace Skills**

Your time at Queen's will give you valuable skills to boost your employability, including:

- Knowledge of cellular structures, organic systems, organic chemistry, and the functions of the human body
- Understanding of statistical research methods, the scientific method, and experimental design
- An appreciation for the **social and** scientific aspects that contribute to health and healthcare
- Research skills ability to draw relevant information out of a large amount of data
- Attention to detail analyze and interpret scientific data
- Problem solving adopt a systematic approach to problems
- Oral and written communication - produce laboratory reports and present a report to a group
  - Resource and time management
- Advocacy on behalf of different stakeholders/populations with the ability to craft messages based on the
- Collaborating with peers to achieve common goals

## **Career Possibilities**

- Biotechnology
- Dentistry
- Drug development
- Environmental management
- **Forensics**
- Health administration and public
- Medical and clinical research
- Medicine
- Microbiology
- Neuroscience
- Occupational health and safety
- Optometry
- Toxicology
- Veterinary medicine

\*some careers may require additional training and you may need to ensure your BHSc course selections fulfill the required pre-requisites. Career paths are suggestions only.

#### How to use this map

## Health Sciences

## Distinguishing HEALTH SCIENCES

Of the health-focused programs at Queen's, Health Sciences provides a balance between the biomedical side of health, a focus of the Life Sciences and Biochemistry programs, and the social sciences side of health, a focus of the Health Studies program. Queen's Health Sciences has an emphasis on skill (competency) building by ensuring students have the opportunity to practice these skills in their course assessments.

## Online HEALTH SCIENCES

Our online BHSc program offers maximal flexibility for our students. Students can complete courses on a timetable that best suits their lifestyle. The degree may be completed on either a full-time or part-time basis, there are different entry points throughout the year, and students can choose from a General or Honours degree. Admission requirements for direct entry are the same as the on-campus program, however for students who lack the traditional requirements, there is an alternate route of admission to the online program. Applicants would apply as a non-degree student initially, and work towards progressing into the degree program by taking three specified first year courses and attaining a cumulative GPA of 3.0 in those courses. Ask an advisor (bhscadvisor@queensu.ca) for more details on this admission route. Finally, the online courses offered by the BHSc program are highly interactive, providing content through a variety of multimedia, along with the opportunity for reflection and self-assessment along the way.

# QUEEN'S UNDERGRADUATE INTERNSHIP PROGRAM

## START DATES

in May, September, or January

## **POSITIONS**

are paid and full-time

### **WORK TERMS**

are 12-16 months long

## PROGRAM OVERVIEW

- Graduate with "Professional Internship" on your degree
- Learn about current advances, practices and technologies in business and industry
- Explore a career path, earn a salary, and build workplace skills

**ELIGIBILITY** 

- Complete 1st year before you register
- Complete 2nd or 3rd year before your internship
- Minimum GPA of 1.9
- Return to Queen's after your internship to finish your degree

WHY QUIP?

- Gain a year of career-related work experience
- Build network connections
- Receive support from Queen's staff in job search and during internship

# SAMPLE PAST INTERNSHIPS Indigenous Wellbeing Student Intern Laboratory Research Assistant Ouality Control Microbiology
