Art History

A rewarding career in the arts industries, heritage management, or museum sector begins with an art history degree. An art history degree also prepares you for a wide array of other career possibilities which require strong intercultural skills, visual literacy, and research strengths. Students in art history explore and understand key topics in global arts and material culture, and critically examine the role of museums and galleries in our contemporary world. Our students have first-hand engagements with art outside the classroom—such as through internships, field trips, or our Venice Biennale Summer School—and gain valuable learning experiences that prepare them to be innovative thinkers and leaders in the arts and cultural sector. The department is home to an array of distinguished scholars and curators in the fields of global arts, architecture, and museum studies, and offers students the opportunity to be creative, rigorous, and socially engaged.
