Civil Engineering

Get to know CIVIL ENGINEERING

Civil Engineers create the infrastructure of society: homes, schools, office buildings, highways, bridges, subway systems, airports, river and coastal protection, green landfills, water and wastewater treatment plants. Are you concerned about climate change? In this program you will learn how to plan, design, build, and maintain Civil and natural systems, and addressing climate change impacts. As part of its real-world preparation, this innovative program emphasizes self-learning, teamwork, communication, leadership, and problem solving. Courses and electives are grouped into structural, environmental, hydrotechnical, and geotechnical streams.

Degree OPTIONS

Bachelor of Applied Science in Engineering
Bachelor of Applied Science in Engineering with Professional Internship

Specialization in Structural Design, Geotechnical Engineering, Hydraulics, and Environmental Engineering

Queen’s ADMISSIONS

Students apply to Queen’s Engineering (QE) through the OUAC (Ontario University Application Centre) website. Secondary School prerequisites include these five 4U courses, English 4U, Calculus and Vectors 4U, Advanced Functions 4U, Chemistry 4U, and Physics 4U. Applicants outside of Ontario may have additional requirements.

A Common START

Queen's is unique in offering a common first year along with an open discipline choice. When you do choose your program, you don't have to worry about caps or quotas. Provided you pass all of your first year courses, you are guaranteed a place in your engineering program of choice. Queen's also offers Section 900, a special extended program for students struggling with first year courses. Take things at a slower pace and recover in time for second year.

Acquire Skills. Gain Experience. Go Global. That is a degree from Queen’s.

Civil Engineering MAJOR MAP

GET THE COURSES YOU NEED

Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing, and Earth Systems Engineering.

Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focuses on problem solving, experimentation principles and finishing off with a team-based engineering project. Discipline selection will take place in February!

GET RELEVANT EXPERIENCE

Join teams or clubs on campus such as the Concrete Toboggan Team, Concrete Canoe Team, and the Bridge Building Club.

See the AMS Clubs Directory or the Queen's Get Involved page for more ideas.

GET CONNECTED WITH THE COMMUNITY

Volunteer on- or off-campus with different community organizations, such as Let's Talk Science (LTS), Science Quest, and Engineers without Borders (EWB).

Consider joining an intramural sports or an athletics team. Check out the Athletics & Recreation site.

GET THINKING GLOBALLY

Speak to a QUIC advisor or get involved in their programs, events and training opportunities.

Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUIC and Four Directions Indigenous Student Centre.

GET READY FOR LIFE AFTER GRADUATION

Grappling with program decisions? Go to the Orientation Evenings held by different Engineering departments to attend the various Career Fairs during the year.

Get some help about career options from Career Services.

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

2023-2024

1ST YEAR

Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing, and Earth Systems Engineering.

Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focuses on problem solving, experimentation principles and finishing off with a team-based engineering project. Discipline selection will take place in February!

2ND YEAR

Students will start their second year by participating in Civil Week, a group based design challenge.

Courses include: Chemistry, Mechanics, Applied Mathematics, Materials, Numerical Methods, Hydraulics, and Engineering Economics.

You will also take the second EDPS course – APSC200. Finally, you will take one List A (Humanities and Social Science) Complementary Studies course.

3RD YEAR

Courses include: Structural Analysis, Geotechnical Engineering, Hydraulics, Groundwater Engineering, Structural Steel Design, Water & Wastewater Engineering, and Design & Practice.

You will also take one List A Complementary Studies course, plus one Management Elective.

Stay during the summer as an assistant to a faculty member or apply for an external summer research opportunity. If interested, apply to do a 12-16 month QUIP internship between your third and fourth year.

Civil's Industry Open House allows students to discuss career opportunities with industry professionals.

CONSIDER A 12 -16 MONTH QUIP INTERNSHIP

Investigate requirements for full-time jobs or other opportunities related to careers of interest.

Assess what experience you’re lacking and fill in gaps with volunteering, clubs, or internships – check out Career Services workshops for help.

Make some connections with alumni working in careers of interest by joining the LinkedIn group Queen's Engineers Ontario (PEO).

Join groups on LinkedIn reflecting specific careers or topics of interest in Civil Engineering.

4TH OR FINAL YEAR

All Civil students take a core course in Civil Engineering Design and Practice. You will also need to take 8 Technical Electives, which provide the opportunity to specialize or do a research thesis (CIVL 500) as one of the electives.

Finally, you will need to choose one List A or B Complementary Studies course, and you are set to graduate!

Consider registering with Professional Engineers Ontario (PEO).

Join groups on LinkedIn reflecting specific careers or topics of interest in Civil Engineering.

International students interested in staying in Canada can speak with an International Student Advisor.

Employability skills

Your time at Queen's will give you valuable skills to boost your employability, including:

• Knowledge of civil engineering methods and theory
• Apply principles of physics and mathematics to the design of physical environments such as bridges, buildings, and dams
• Knowledge of the interactions among land use, water use, and environment quality
• Work independently and become a lifelong learner
• Team work - work with other students on a project
• Oral and written communication - engineering report writing skills and presentation skills
• Leadership
• Time management and organization – manage several ongoing projects

Where could I go after graduation?

• Archaeology
• Architecture
• Environmental engineering
• Design engineer
• Geographic information systems
• Geomatics
• Industrial engineering
• International development
• Landscape architecture
• Mapping, surveying & cartography
• Materials engineering
• Mining engineering
• Occupational health and safety
• Public administration
• Real estate
• Strategic planning
• Structural engineer
• Water resources engineering
• Urban and regional planning

Taking time to explore career options, build experience, and network can help you have a smoother transition to the world of work after graduation.

Civil Engineering

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen's, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally. Queen's wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For over 175 years, our community has been more than a collection of bright minds – Queen's has attracted students with an ambitious spirit. Queen's has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research-intensive university focused on the undergraduate experience. The BBC has identified Kingston as one of the GREATEST UNIVERSITY TOWNS in the world – and it is often identified as the safest city in Canada. It is a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. At a university with more clubs per capita than any other university in Canada, and in a city with more restaurants per capita than any other city in North America, you will have the experience of a lifetime at Queen's – and graduate with a degree that is globally recognized among the best.
