Why GRADUATE STUDIES in ANATOMICAL SCIENCES?

The Department of Biomedical and Molecular Sciences at Queen’s University offers a 16 month Master of Science program in Anatomical Sciences. This program is structured around three pillars of competency (content, pedagogy, inquiry) and designed to educate students interested in the art of teaching and designing curricula in the anatomical sciences. Graduates of our MSc Anatomical Sciences program have pursued careers at both Canadian and foreign colleges and universities as health services education co-ordinators or have gone on to further their education as medical students or PhD students.

POTENTIAL RESEARCH at QUEEN’S

At Queen’s, our established strengths are in the areas of cancer, injury, obesity, disability, and mental health epidemiology as well as research in various health services contexts including public health, primary care, cancer care, and critical care. We also have some emerging strengths in the areas of Northern health, Indigenous health, and global health studies.

Program STRUCTURE

MSc (Anatomical Sciences): 16 months Full Time

Course WORK

- Advanced Gross Anatomy
- Advanced Topics in Embryology
- Advanced Topics in Histology & Histology Techniques
- Advanced Topics in Neuroanatomy
- Curriculum Design
- Independent Studies in Anatomy & Cell Biology/Pedagogy
- Microteaching
- Principles of Teaching & Learning

PRACTICUM

- Digital Imaging Techniques for Gross Anatomy
- Electronic Media
- Embalming Techniques
- Freeze Drying Techniques
- Histology
- Lecturing & Demonstrating
- Museum Specimen Production
- Neuroanatomy
- Plastination Techniques

“This program is one of the most well rounded and well equipped of its kind. It presents students with an array of opportunities for skill development, and the people that are/or have been a part of it are the testament to this fact. While challenging at times, the knowledge and experiences you gain are totally worth it.”

– Maria Komisarenko, Class of 2011

Visit the Biomedical & Molecular Medicine website for more details on research areas. When you find a faculty member with similar research interests to yours, contact them and tell them about your interest in graduate work and related experience.
Anatomical Sciences MSc MAP

2023-2024

GETTING STARTED

ACHIEVE YOUR ACADEMIC GOALS

- Begin your coursework.
- Find your way through the academic process with help from departmental and SGSPA professional development workshops, the department Grad Chair, and the SGSPA website.

MAXIMIZE RESEARCH IMPACT

- Connect with the Professional Development Officer to discuss your practicum placement goals.
- Apply to various practicum placement opportunities or negotiate your own placement.
- Confirm your placement and preceptor and complete the administrative requirements.

BUILD SKILLS AND EXPERIENCE

- Consider positions in student services, the SGPS, or media outlets like the Queen’s Journal, CFRC, Studio Q, and the SGSPA Blog. Look in the AMS Clubs Directory for more ideas.
- Serve on departmental, faculty, or university committees.
- Check out professional development workshops from School of Graduate Studies and Postdoctoral Affairs professional development.

ENGAGE WITH YOUR COMMUNITY

- Explore how you can connect with your community through experiential opportunities on and off-campus.
- Consider volunteering with different community organizations, such as Kingston General Hospital.

LAUNCH YOUR CAREER

- Finding a career that fits starts with knowing yourself. Get help by taking a Career Services workshop or meeting with a career educator or coach. Check out the Career Resource Area for advice on various career options.
- Start reading publications like University Affairs and the Chronicle of Higher Education. Browse non-academic labour market websites. Stay on the lookout for special events like Graduate Student Career Week to explore your career pathways.
- Check admission test deadlines if needed for further studies.

INTERMEDIATE STAGE

INTERMEDIATE STAGE

- Complete your course work.
- Finalize your MSc (AS) project.

WRAPPING UP

LEVERAGE YOUREXPERIENCE

- Leverage your practicum experience to clarify your professional goals, and help you transition from graduate studies to professional work in anatomical sciences.
- Attend a major conference in your field. There are many to choose from, so talk to your supervisor for advice on which ones would be most relevant.
- Consider putting an article in The Conversation.

WHERE CAN I GO?

A Master’s degree in Anatomical Sciences can take you in many directions. Our Master’s students are equipped with a strong foundation for careers in:
- Academic and research labs
- Data Analysis (Health units, government agencies)
- Health research (research associates in universities, hospitals, government, public health units)
- Project management in pharmaceutical and scientific research industries
- Scientific supply companies
- Teaching positions in academic institutions or the private sector
- Technical positions in academic institutions or the private sector

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

WHAT WILL I LEARN?

A graduate degree in Anatomical Sciences can equip you with valuable and versatile skills, such as:
- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize, and synthesize large amounts of information
- Time management: meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and Innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, an understanding of sound ethical practices, social responsibility, responsible research, and cultural sensitivity

Professional skills in all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

Options to refine skills in:
- Project management
- Leadership: initiative and vision leading people and discussion
- Communication skills: meet deadlines
- Critical thinking: an understanding of sound ethical practices, social responsibility, responsible research, and cultural sensitivity

WHERE CAN I GO?

A Master’s degree in Anatomical Sciences can take you in many directions. Our Master’s students are equipped with a strong foundation for careers in:
- Academic and research labs
- Data Analysis (Health units, government agencies)
- Health research (research associates in universities, hospitals, government, public health units)
- Project management in pharmaceutical and scientific research industries
- Scientific supply companies
- Teaching positions in academic institutions or the private sector
- Technical positions in academic institutions or the private sector

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions - you don’t have to do it all. To make your own custom map, use the My Grad Map tool.

Graduate Studies FAQs

How do I make the most of my time at Queen's?

Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone's journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources - our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.

What is the community like?

At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen's more than 130 graduate programs within 50+ departments & research centres. With the world's best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen's is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston's history and culture, see Queen's University's Discover Kingston page.

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Recognized BSc degree with a background in Biology or Health Sciences or equivalent professional degrees (BNSc, BSc PT).
- Grade requirements: Minimum B+ over 2nd to 4th years, over all courses taken.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening.
- If required, TOEFL scores of 550 (paper-based) or TOEFL iBT minimum scores of: writing (24/30); speaking (22/30); reading (22/30); listening (20/30), for a total of 88/120. Applicants must have the minimum score in each test as well as the minimum overall score.

KEY DATES & DEADLINES
- Application due: February 15.
- Short listed candidates will be interviewed in April for a September start.

Before you start your application, please review the Graduate studies application process.
