Why **GRADUATE STUDIES in COMPUTING?**

The School of Computing is active in research on a broad range of topics, with a strong research record. Research areas include: Biomedical Computing, Cloud Computing, Databases, Data Mining, Mobile Networks, Software Engineering, Human-Machine Learning, Algorithms, Computational Linguistics, Theoretical Computer Science, Computational Geometry, Graph Theory, Artificial Intelligence, Parallel Systems, and Programming Languages. We are finding methods to make data more secure, software more reliable, and computers more intelligent.

“The cutting-edge research, world-renowned supervisors, unparalleled social experience, and a devotion to school life […] result in nothing short of awesome.”

– Eric Rapos, PhD student

Why **QUEEN’S?**

The Queen’s **School of Computing** offers a graduate program that is unique in its quality, diversity, innovation and reach. Our faculty and students are engaged in research projects that span the spectrum of traditional computer science, while at the same time exploring areas never visited before. Some of us are discovering properties of certain computers that are radically different from the ones we have today, in the sense that a bit is the spin of an atom, or a register is a strand of DNA. Others are building organic interfaces for humans to communicate with computers. At Queen’s you will find a School reputed for its academic excellence and the wonderful atmosphere it enjoys.

Program **STRUCTURE**

- Research MSc (4-6 terms) course work and thesis, funded
- Project MSc (2-3 terms): course work and project, unfunded
- Course work MSc (2 terms)

**RESEARCH** Areas

- Artificial Intelligence
- Biomedical Computing
- Data Analytics
- Databases and Cloud Computing
- Data Mining
- Game Development
- Human Computer Interaction
- Mobile Computer Networking
- Software
- Theory

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the **School of Computing website** to read **faculty profiles** and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience.
2021-2022
Computing MSc Map *
MASTER OF SCIENCE (MSc)

GETTING STARTED

- Achieve your academic goals:
  - Start with key priorities like developing your relationship with your supervisor, exploring possible research problems, and doing your coursework.
  - Find your way through the academic process with help from departmental and Expanding Horizons professional development workshops, the department Grad Chair and the SGS website.
- Maximize research impact:
  - Start to think about the audiences for your research.
  - If you will be continuing graduate studies, apply for NSERC and OGS funding.
- Build skills and experience:
  - Consider positions in student services, the SOPS, or media outlets like the Queen's Journal, CFCR, or the SGS Blog. Look in the AMS Clubs Directory for more ideas.
  - Serve on departmental, faculty or university committees. Talk to the Queen's Graduate Computing Society or the Queen's Journal for tips on getting involved.
  - Check out professional development workshops from Expanding Horizons and the Computing Department.
- Engage with your community:
  - Women are encouraged to take part in the annual Canadian Celebration of Women in Computing (CAN CWIC).
  - Explore how you can connect with your community through experiential opportunities on- and off-campus.
  - Consider volunteering with different local community organizations, such as Martha's Table, Loving Spoonful.
  - Enjoy a hot beverage on Tuesday and Thursday coffee breaks with faculty and peers.
- Launch your career:
  - Finding a career that fits starts with knowing yourself. Get help by taking a Career Services workshop or meeting with a career counselor. Check out books like So What Are You Going to Do With That? from the Career Resource Area for advice on various career options.
  - Start reading publications like University Affairs and the Chronicle of Higher Education. Browse non-academic labour market websites. Stay on the lookout for special events like School of Graduate Studies Career Week to explore your career pathways.
  - Check admission test deadlines if needed for further studies.

INTERMEDIATE STAGE

- Complete your coursework, begin to research and write your thesis or begin working on your project.
- Attend or present at a graduate conference such as the Queen's Computing Student Research Conference.
- Consider participating in the 3 Minute Thesis (3MT) competition.
- Expand your research audience through social media such as Twitter or a blog.
- Set up a meeting with the School of Graduate Studies for a Grad Chat to discuss your research interests.
- Start keeping an ePortfolio of your skills, experiences and competencies.
- Use a Research Assistant or Teaching Assistant position to develop your research or teaching skills.
- For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SG5092 or the PUTL Certificate for more professional development in teaching and learning.
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUIC and the Intercultural Awareness Training Program.
- Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Check out opportunities for extra training through CTL, Expanding Horizons, MITACS, or other sources to boost your skills.
- Do some targeted networking with people working in careers of interest, through Queen's Alumni Association, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Consider joining professional associations like the Association for Computing Machinery (ACM) and IEEE.
- Attend a conference or workshop, such as the International Conference on Software Engineering (ICSE), SPIE Medical Imaging conference, Conference on Human Factors in Computing Systems (CHI), or the Canadian Conference on Computational Geometry (CCCG).
- Consider putting an article in The Conversation.
- Participate in hiring committees and attend job talks. Start focusing on areas of interest. Research organizations of interest and start putting together your CV or resume for potential positions of interest. Get help from Career Services with job searching, resumes, and interviews.
- Explore different careers of interest by using Queens Connects on LinkedIn to connect with Queen's alumni. Check out Career Cruising for more information.
- If you are considering a PhD, explore programs of interest reach out to your current supervisor, exploring possible research problems, and doing your coursework.
- Complete and defend your thesis or present your project.

WRAPPING UP

- Consider publication options for your research.
- Attend a conference or workshop, such as the International Conference on Software Engineering (ICSE), SPIE Medical Imaging conference, Conference on Human Factors in Computing Systems (CHI), or the Canadian Conference on Computational Geometry (CCCG).
- Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Check out opportunities for extra training through CTL, Expanding Horizons, MITACS, or other sources to boost your skills.
- Do some targeted networking with people working in careers of interest, through Queen's Alumni Association, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Consider joining professional associations like the Association for Computing Machinery (ACM) and IEEE.
- Attend a conference or workshop, such as the International Conference on Software Engineering (ICSE), SPIE Medical Imaging conference, Conference on Human Factors in Computing Systems (CHI), or the Canadian Conference on Computational Geometry (CCCG).
- Consider putting an article in The Conversation.
- Participate in hiring committees and attend job talks. Start focusing on areas of interest. Research organizations of interest and start putting together your CV or resume for potential positions of interest. Get help from Career Services with job searching, resumes, and interviews.
- Explore different careers of interest by using Queens Connects on LinkedIn to connect with Queen's alumni. Check out Career Cruising for more information.
- If you are considering a PhD, explore programs of interest reach out to your current supervisor, exploring possible research problems, and doing your coursework.
- Complete and defend your thesis or present your project.

WHAT WILL I LEARN?
A graduate degree in Computing can equip you with:
- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, an understanding of sound ethical practices, social responsibility, responsible research and cultural sensitivity
- Professionalism in all aspects of work, research, and interactions
- Leadership initiative and vision leading people and discussion

WHERE CAN I GO?
A Master's degree in Computing can take your career in many directions. Some of our Research MSc may continue on to a PhD. In addition our MSc students are equipped with a strong foundation for careers in:
- Systems Software Developer
- Telecommunications/Network Engineer
- Biomedical Engineer/Biorninformatics specialist
- Computer Systems/Database Manager
- Operations Research Specialist
- Systems Analyst/Operating Systems Specialist
- Management positions in public, private and non-profit organizations
- Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

* This map is intended to provide suggestions for activities and careers, but everyone’s abilities, experiences, and constraints are different. Build your own Grad Map using our online My Grad Map tool.
Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Undergraduate degree with a concentration in Computing Science.
- Candidates with high academic standing in an undergraduate degree other than computing science, who have some computing science background may be admitted as graduate preparatory students.
- Grade requirements: minimum upper second class standing (B+ average).

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application due: January 15th for both September and January admissions.
- Notification of acceptance: Between February and June.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

MSc students in the research stream receive minimum funding of $20,000 per year. The other streams (course work and project) are funded by the student.

Apply for external funding from OGS, NSERC and other sources. Queen's will automatically issue a one time $5,000 award to incoming Masters students who have won federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships.
