Why GRADUATE STUDIES in NURSING?

Consider the Master of Nursing (Primary Health Care Nurse Practitioner) program for all it has to offer: well-developed skills in critical thinking, writing, and research, advanced knowledge in primary health care, and, perhaps more importantly, skills to facilitate change in today’s health care system. Graduate students and their work are an important part of an ongoing knowledge creation process that provides the health care system with the necessary tools to understand phenomena using various ways of knowing. Today’s job market seeks people with advanced practice skills who can critically analyze information and evidence, synthesize scholarly and public reports, create new knowledge, and lead change and transformation. Study Nursing and you will acquire such skills.

Why QUEEN’S?
The School of Nursing at Queen’s offers a challenging and innovative program to prepare graduates with the knowledge and skills to provide care to individuals and families in primary care settings, conduct small research projects, participate in research teams, and the critical appraisal skills needed for developing the scientific basis for nursing practice. Queen’s University School of Nursing collaborates in a consortium of nine Ontario universities to deliver the MN (PHCNP) program. Our students are taught primarily through small in-person graduate seminars, clinical placements, and self-directed online learning, in which they engage in a critical examination of theory and research, and apply their knowledge related to pathophysiology, health assessment, diagnostics, therapeutics and the nurse practitioner role. Students engage early and continuously in research and clinical practice and successfully complete the program in 2 years. Situated in an academic environment that embodies scholarship, graduates are well prepared for careers as leaders in clinical practice and education.

RESEARCH Areas

Practice environments
- Models of care
- Leadership
- Workplace culture, structure and health
- Communication strategies and systems

Populations with complex conditions
- Optimizing function and well-being
- Multimorbidity
- Mental health and/or addictions
- Outcomes monitoring

Health care quality
- Advancing safety
- Risk assessment and reduction
- Educational and technological innovations
- Health system service and delivery and more

Visit the School of Nursing website to learn more about the M.N. (PHCNP) program and its opportunities.

Program STRUCTURE

MN (PHCNP) (2 years): coursework, clinical placements, integrated practicum, and a project. Successful completion of the program allows the graduate to apply to complete the Canadian family/all-ages nurse practitioner licensure examination.

“Our professors are always looking for opportunities for us and getting us involved in different things. I would highly recommend this program to aspiring Nursing students looking for higher education.”
The map offers suggestions — you don’t have to do it all! To make your own custom map, use the My Major Map tool.

**What will I learn?**

A graduate degree in Nursing can equip you with valuable and versatile skills, such as:

- Knowledge and technical skills
- Ability to convey complex information to a diverse audience
- Information management: prioritize, organize, and synthesize large amounts of information
- Time management: meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Perseverance
- Capacity to work both independently and as part of a team
- Aware of sound ethical practices and understanding of research and cultural sensitivity
- Professionalism in all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

**Where can I go?**

The MN (PHCNP) will train graduates to become Primary Health Care Nurse Practitioners, and prepare them with a strong foundation for careers as:

- Educators
- Clinical Instructors
- Research Scientists
- Health Policy Analysts
- Healthcare Administrators

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.
Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Baccalaureate program in Nursing accredited by a provincial/territorial authority.
- Grade requirements: minimum B average.

ADDITIONAL REQUIREMENTS
- Equivalent of two years of relevant full-time practice as a Registered Nurse within the past five years (minimum of 3640 hours).
- Active registration as a Registered Nurse with the College of Nurses of Ontario.
- Two academic letters of reference (e.g. course professors in your undergraduate program) and one clinical letter of reference (e.g. your manager or supervisor).
- Undergraduate courses in research methodology and statistics.
- Copy of Curriculum Vitae (Resume).
- Completion of personal essay questions.

KEY DATES & DEADLINES
- Application due: February 1st, or until all seats are filled.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

We encourage all students to apply for external funding from professional associations, such as the RNAO Nursing Education Initiative Grant Program. For more information, see the School of Graduate Studies awards and scholarships.

What about CLINICAL PLACEMENTS?

Our placement catchment area covers an area along the north shore of Lake Ontario from Peterborough to Smiths Falls to Brockville. For students at Queen's University, clinical placements normally occur in communities within an hour’s drive of Queen’s. Clinical placements will be secured by the Clinical Placement Coordinator at Queen’s University. Students are responsible for transportation to and from clinical placements, therefore a vehicle will be necessary.
