Why GRADUATE STUDIES in SCREEN CULTURES AND CURATORIAL STUDIES?

Housed in the state-of-the-art Isabel Bader Centre for the Performing Arts, the new PhD in Screen Cultures and Curatorial Studies is unique because of its linkage of adjacent disciplines: film and media studies and, more generally, the study of screen cultures, film and media production, and curatorial studies and practice. This multidisciplinary and professionally-oriented program provides students with a wide range of course options and professional opportunities, including academia, arts management, programming, media production (from mainstream media, to artistic and activist production), and curation.

Why QUEEN’S?

The program’s three strongly interconnected areas of focus – studies, production, and curation – are designed to stimulate creative dialogue in ways that ensure their mutual and respective influence, and in ways that open exciting points of access to multiple disciplinary formations not offered in any other film, media, cinema or communications PhD program in Ontario.

Visiting scholars, filmmakers, artists, and curators in the core professional development course provide opportunities for practice-based learning, integrating new knowledge gained from other graduate level course work, and implementing some of their newly acquired skills in and beyond the gallery, festival, and museum.

Exhibition space is available to students at the Art & Media Lab in The Isabel Bader Center and the Union Gallery to accommodate curatorial projects.

The program is also uniquely offered in partnership with the Agnes Etherington Art Centre (AEAC), a university and public art museum with physical display space paralleled by an active online program presence. The slate of courses offered by this partnership provide robust opportunities to participate in and benefit from experiential, applied learning.

Program STRUCTURE

PhD (4 years, full-time). Three core courses + two elective courses + qualifying exam + dissertation/project.

The structure of this program is designed to maximize flexibility allowing students to do traditional academic research, engage in creative and/or community projects and develop professional profiles suitable to a wide variety of academic and non-academic career pathways.

Visit the Film and Media website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact them and tell them about your interest in graduate work and related experience.
