Why GRADUATE STUDIES in CHEMICAL ENGINEERING?

As a PhD student in the field of Chemical Engineering, you can play a vital role in future developments in such areas as biological conversion, pollution prevention and treatment, tissue engineering, process control and optimization, (bio)chemical sensing, nanocomposites, and many other areas. Chemical Engineering has a wide range of applications that contribute to modern life and its technologies.

Graduate students and their work are an important part of an ongoing research process that provides the community with ways of understanding natural, cultural, imaginative, social, and technological phenomena.

Why QUEEN’S?

Queen's University is one of Canada’s leading research-intensive universities, with over $14 million in sponsored research funding and almost $5 million in revenues from technology transfer. It consistently ranks as one of the top three medical/doctoral universities in Canada and offers an unparalleled environment to facilitate academic development. Among Queen's goals is to attract and retain students with outstanding potential from across Canada and around the world.

The Chemical Engineering Department offers opportunities to collaborate with scientists in the Centre for Health Innovation and Computational Science and Engineering, as well as with co-supervising faculty in other departments.

The Department of Chemical Engineering at Queen's University is based in Dupuis Hall and the Biosciences Complex, which are multi-purpose facilities with extensive research laboratories, and large- and small-group teaching classrooms.

Areas of intense research in the department include: Biomedical engineering, polymer and reaction engineering, process systems engineering, sustainable energy sources, and environmental engineering. Activities range from developing new bio- and polymeric materials and production techniques, to understanding how the dynamic structure of a chemical process limits the performance that can be achieved. Significant collaborations across these fields exist within the department, and faculty members also collaborate extensively with other researchers across Queen's and at other institutions.

Program STRUCTURE

PhD (4 years): course work, research thesis, comprehensive exam, and two seminars.

RESEARCH Areas

- Bioengineering
- Clean Energy and Sustainable Environment
- Materials and Interfaces
- Process Systems Engineering and Systems Biology

We suggest that you review the specific research interests of individual faculty members to identify a potential supervisor. Please note, however, that contacting a faculty member does not guarantee acceptance and you will need to submit your full application in order to be considered.

Visit the Chemical Engineering Department website to read faculty profiles and learn more about faculty members’ research areas.

GRADUATE STUDIES AND POSTDOCTORAL AFFAIRS
## Chemical Engineering PhD Map

### What Will I Learn?
A graduate degree in Chemical Engineering will empower you with:
- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: organize, and synthesize large amounts of information
- Time management: meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, an understanding of sound ethical practices, social responsibility, responsible research, and cultural sensitivity
- Professionalism in all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

### Where Can I Go?
A PhD in Chemical Engineering can take your career in many directions. In Canada, less than 40% of all PhDs will work in post-secondary education – the majority will work in industry, government, or non-profit. Graduates from the Chemical Engineering PhD program have found careers in:
- Biocatalysis Engineering
- Biomedical Engineering
- Environmental Engineering
- Food Science
- Macromolecular Processes and products
- Microfluidics & Biosensors
- Process Systems Engineering

### Achieve Your Academic Goals

<table>
<thead>
<tr>
<th>YEAR I</th>
<th>YEAR II</th>
<th>YEAR III</th>
<th>YEAR IV</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ACHIEVE YOUR ACADEMIC GOALS</strong></td>
<td><strong>MAXIMIZE RESEARCH IMPACT</strong></td>
<td><strong>BUILD SKILLS AND EXPERIENCE</strong></td>
<td><strong>ENGAGE WITH YOUR COMMUNITY</strong></td>
</tr>
<tr>
<td>- Key priorities include forming your committee, coursework, field exams, and language exam.</td>
<td>- Think about audiences for your research.</td>
<td>- Serve on departmental, faculty, or university committees. Talk to the Chemical Engineering Graduate Student Association (CheGSA) about getting involved</td>
<td>- Consider volunteering with different community organizations. Connect to broader communities of engineers.</td>
</tr>
<tr>
<td>- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.</td>
<td>- Present your work at graduate conferences.</td>
<td>- Consider positions in student services, the SGPS, or media outlets like the Queen's Journal, CFRC, and the SGSPA Blog. Look in the AMS Clubs Directory.</td>
<td>- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.</td>
</tr>
<tr>
<td>- Look to Student Academic Success Services for a variety of supports.</td>
<td>- Expand your research audience through social media.</td>
<td>- Use a Teaching Assistant or Research Assistant position to develop your skills and experience.</td>
<td>- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups. If pursuing research abroad or outside Kingston, investigate options.</td>
</tr>

Graduate Studies FAQs

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Master of Applied Science or Master of Science.
- Grade requirements: minimum cumulative average of B+, with a minimum of 77% in last year of study.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application deadline: There is a constant intake so there is no set deadline for application. If you are international, we recommend that you have completed your application at least 4 months ahead of your admission cycle.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The level of financial support consequently varies among graduate students in the Department, with a guaranteed minimum level of $27,000 (PhD) for 2023-2024. As part of the minimum funding package, you may serve as a Teaching Assistant for at least one term per year.

We encourage all students to apply for external funding from OGS, NSERC, and other sources. Queen's will automatically issue a one time $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies and Postdoctoral Affairs’ information on awards and scholarships.

How do I make the most of my time at Queen’s?

Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone's journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources– our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.

What is the community like?

At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen’s more than 130 graduate programs within 50+ departments & research centres. With the world’s best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen’s is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston’s history and culture, see Queen's University’s Discover Kingston page.
