Why GRADUATE STUDIES in ELECTRICAL & COMPUTER ENGINEERING?

As a MASc student in the important field of Electrical and Computer Engineering (ECE), you can play a vital role in future developments in such areas as microchip design, bioelectronics, artificial intelligence, machine vision, IoT, autonomous vehicle & robots, speech and language processing, wireless and optical communications, nanoelectronics, photonics, power electronics and systems, green energy, cybersecurity, supercomputing, software engineering, and thousands of other areas. Almost every aspect of modern life is impacted by electrical and computer engineering.

Graduate students and their work are an important part of an ongoing research process that provides the community with ways of understanding natural, cultural, imaginative, social and technological phenomena. Check out whygradstudies.ca for more reasons to choose graduate studies in engineering.

Why QUEEN’S?

As a MASc student in ECE at Queen's you are part of one of the most research intensive universities in Canada. Our research program is internationally renowned with a wide range of research activities in all of the major specialization areas of electrical and computer engineering.

In addition to the general MASc program, Queen's ECE offers a Master of Applied Science with a Field of Study in Artificial Intelligence, as well as collaborative graduate programs in Biomedical Engineering, and Master's in Applied Sustainability. It also has a number of cross-disciplinary opportunities in collaboration with the departments of Mathematics & Statistics, Physics & Engineering Physics, Computing, Mechanical Engineering and the School of Kinesiology and Health Studies.

Our students come from all over the world. At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community.

Program STRUCTURE

MASc (2 years): 4 courses and seminars, plus a research thesis.

“As a graduate student at Queen’s, you’re part of a small, tightly-knit community and you have the opportunity to connect with the faculty and students in your department in a way that is simply not possible at other universities.”

— Dustin Dunwell, MASc (Eng)

RESEARCH Areas

- Communications and Signal Processing
- Computer and Software Engineering
- Microelectronics, Electromagnetics and Photonics
- Power Electronics
- Biomedical and Intelligent Systems

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Electrical and Computer Engineering website to read about research groups and faculty profiles. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work, area of research interest and related experience.

School of Graduate Studies
Create an impact
www.queensu.ca/sgs
### GETTING STARTED

- Start with key priorities like developing your relationship with your supervisor and completing your coursework.
- Consider how your course papers can contribute to your MASC thesis research.
- Start your research as soon as possible, aiming to get traction by the end of your first year.
- Attend the Departmental Speaker Series (ELEC 891).

### INTERMEDIATE STAGE

- Complete your coursework; continue to do your research and progressively write up your Master's research thesis.
- Find your way through the academic process with help from departmental and Expanding Horizons professional development workshops, the department Grad Chair and the SGS website.

### WRAPPING UP

- Present your research to ECE graduate students and faculty.
- Complete and defend your Master's research thesis.

## WHAT WILL I LEARN?

A graduate degree in Electrical and Computer Engineering can equip you with valuable and versatile skills, such as:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize and synthesize large amounts of information
- Time management: meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and Innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, an understanding of sound ethical practices, social responsibility, responsible research and cultural sensitivity
- Professionalism in all aspects of work, research, personal conduct, and professional conduct

## WHERE CAN I GO?

A Master's degree in Electrical and Computer Engineering can take your career in many directions. Many of our MASC students choose to continue their academic inquiry with a PhD. Our Master's students are equipped with a strong foundation for careers in numerous sectors, such as:

- Tech companies, such as Qualcomm, Ciena, Microsoft, Google, IBM, Cisco Systems, General Dynamics, Nvidia, Intel, Amazon, and Samsung
- Startups in all sectors, such as wearables, digital health, automotive, and entertainment
- Government organizations such as the National Research Council of Canada (NRC), Defence R&D Canada (DRC), and the Department of National Defence (DND)
- Service firms such as financial, insurance, and real estate
- Research and Development departments of large companies
- Consulting agencies
- Software and IT firms
- Academic roles such as teaching and research

## BUILD SKILLS AND EXPERIENCE

- Serve on departmental, faculty or university committees. Talk to the Graduate Electrical & Computer Engineering (ECE) student society for tips on getting involved.
- Use Research Assistant and Teaching Assistant positions to develop your research or teaching skills.
- Take part in professional development workshops from Expanding Horizons.

## ENGAGE WITH YOUR COMMUNITY

- Explore how you can connect with your community through experiential opportunities on- and off-campus.
- Consider volunteering with different community organizations or through the Engineering Society Design Teams.
- Participate in community engagement activities such as graduate student outreach programs, organizing conferences, and research groups.
- Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by OCAC and FODSC.
- If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

## LAUNCH YOUR CAREER

- Finding a career that fits starts with knowing yourself. Tune into IEEE messages and publications targeting student members and career building. Learn about the jobs and careers of other IEEE grades.
- Get help by taking a Career Services workshop or meeting with a career counsellor. Check out books like So What Are You Going to do With That? for advice on various career options.
- Start reading publications like University Affairs and the Chronicle of Higher Education. Browse non-academic labour market websites. Stay on the lookout for special events like School of Graduate Studies Career Week to explore your career pathways.
- Explore different careers of interest by using Queens Connects on LinkedIn to connect with Queen's alumni. Check out Career Cruising for more information.
- If you are considering a PhD, explore programs of interest reach out to faculty, and apply to PhD programs and external scholarships. Check admission test deadlines if needed for further studies.
- Participate in hiring committees and attend job talks. Research careers of interest. Craft your CV or Resume and job application materials.
- Start focusing on areas of interest. Research organizations of interest and start putting together your resume for potential positions of interest. Get help from Career Services with job searching, resumes, and interviews.
Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Bachelor degree in Engineering or closely related field.
- Grade requirements: Minimum cumulative average of 75% or B from Canadian or US Universities, or 80% for international students.

ADDITIONAL REQUIREMENTS
- Statement of Interest/Statement of Research.
- Curriculum Vitae.
- English Proficiency Requirements as listed on the ECE graduate website.

KEY DATES & DEADLINES
- Application due:
  - Fall Semester Start: January 31 (international), March 1 (domestic)
  - Winter Semester Start: August 15th
- Notification of acceptance: usually before the end of April for international students, end of May for domestic students.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

Minimum funding guarantee for MASc students is $23,000 (domestic & international) per year throughout years 1-2. Students are usually funded through a combination of research assistantships, teaching assistantships, and/or scholarships.

Apply for external funding from OGS, NSERC and other sources. Queen's will automatically issue a one time $5,000 top-up to Masters winners of federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships.
