Why GRADUATE STUDIES in ELECTRICAL & COMPUTER ENGINEERING?

As a PhD student in the important field of Electrical and Computer Engineering (ECE), you can play a vital role in future developments in such areas as microchip design, bioelectronics, artificial intelligence, machine vision, IoT, autonomous vehicle & robots, speech and language processing, wireless and optical communications, nanoelectronics, photonics, power electronics and systems, green energy, cybersecurity, supercomputing, software engineering, and thousands of other areas. Almost every aspect of modern life is impacted by electrical and computer engineering.

Graduate students and their work are an important part of an ongoing research process that provides the community with ways of understanding natural, cultural, imaginative, social and technological phenomena. Check out whygradstudies.ca for more reasons to choose graduate studies in engineering.

Why QUEEN’S?

As a PhD student in ECE at Queen’s you are part of one of the most research intensive universities in Canada. Our research program is internationally renowned with a wide range of research activities in all of the major specialization areas of electrical and computer engineering.

Queen’s ECE offers a number of cross-disciplinary opportunities in collaboration with the departments of Mathematics & Statistics, Physics, Computing, Mechanical Engineering, Mining, the School of Kinesiology and Health Studies, as well as the collaborative graduate program in Biomedical Engineering.

Our students come from all over the world. At Queen’s, graduate students from all disciplines learn and discover in a close-knit intellectual community.

Program STRUCTURE

PhD (4 years): 4 courses and seminars, thesis background and proposal exams, and thesis defense.

“Thanks to Queen’s ECE, where my MASc and PhD study paved the way for my rewarding career as a professor. Besides my thesis supervisor, I also collaborated with student and faculty researchers at Queen’s and other universities. I presented my research at companies and government labs to cultivate connections, and I took stints as a visiting researcher at a university and a company in Europe.”

— Tiago Falk, MASc, PhD

RESEARCH Areas

- Communications and Signal Processing
- Computer and Software Engineering
- Microelectronics, Electromagnetics and Photonics
- Power Electronics
- Biomedical and Intelligent Systems

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Electrical and Computer Engineering website to read about research groups and faculty profiles. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work, area of research interest and related experience.
YEAR I

ACHIEVE YOUR ACADEMIC GOALS

- Key priorities include your relationship with your supervisor, your committee, coursework, and comprehensive exams.
- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.
- Look to Student Academic Success Services and Expanding Horizons for supports and workshops.
- Attend the Departmental Speaker Series (ELEC 891).
- Write and defend your thesis proposal.
- Embark on your substantive research.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Find your way through the academic process with help from Expanding Horizons, professional development workshops, and the SGS website.
- If an industry internship is of interest, consult your supervisor. Seek experiential/professional development opportunities.

MAXIMIZE RESEARCH IMPACT

- Think about audiences for your research.
- Apply to NSERC, OGS, and other funding.
- Apply for the Graduate Dean’s Travel Grant for your work at IEEE and other research conferences as often as possible.
- Expand your research audience through social media.
- Consider publishing elements of your research in (e.g., IEEE, ACM) journals. Learn from the Expanding Horizons publishing workshop.
- Present your work at IEEE and other research conferences as often as possible.
- Consider targeting your research outputs for supports and workshops.

BUILD SKILLS AND EXPERIENCE

- Serve on faculty or university committees. Talk to the Graduate Electrical & Computer Engineering (GEC) student society for tips on getting involved.
- Consider positions in student services, the SGPS, or media outlets like the Queen’s Journal, CFRIC, and the SGS Blog. Look in the AMS Club Directory.
- Use Teaching Assistant and Research Assistant positions to develop your skills and experience.
- Set starting an eportoflio of your skills, experiences, and competences.
- For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SG5592 or the PUT Certificate for more professional development in teaching and learning.
- Start building your teaching portfolio including student evaluations, and seeking mentorship.
- Explore different careers of interest by using Queen’s Connects on LinkedIn to connect with Queen’s alumni. For more information check out Career Cruising.
- Participate in conferences at the 3 Minute Thesis (3MT) competition.
- Attend the Departmental Speaker Series (ELEC 891) and the SGS website.
- Consider volunteering with different Engineering Society Design Team.
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Do some targeted networking with people working in areas of interest, through Queen’s Connects on LinkedIn, the Queen’s Alumni Association, professional associations, and at conferences.
- Get help from a Career Services workshop.

ENGAGE WITH YOUR COMMUNITY

- Consider volunteering with different engineering organizations, such as an Engineering Society Design Team.
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Do some targeted networking with people working in areas of interest, through Queen’s Connects on LinkedIn, the Queen’s Alumni Association, professional associations, and at conferences.
- Get help from a Career Services workshop.
- Participate in the various international, multidisciplinary opportunities, and collaborate with other departments, such as Mechanical, Math and Eng., Mining Engineering, School of Computing, and ECE at RMC.
- Join professional associations like the Institute of Electrical and Electronics Engineers (IEEE).
- Join groups on LinkedIn reflecting specific careers or topics of interest.

WHERE CAN I GO?

- Tunique into IEEE messages and publications targeting student members and career building. Learn about the jobs and careers of other ECE graduates.
- Take a Career Services workshop or meet with a career counselor for help.
- Start building your teaching portfolio including student evaluations, and seeking mentorship.
- Explore different careers of interest by using Queen’s Connects on LinkedIn to connect with Queen’s alumni. For more information check out Career Cruising.
- Investigate requirements for professional positions or other opportunities related to careers of interest.
- Build connections with faculty outside of your department. Plan your career and job search.
- Build relationships with faculty and industry. Attend career fairs and industry events.
- Attend the Departmental Speaker Series (ELEC 891)
- Plan date of thesis submission for examination.
- Present your research to ECE graduate students and faculty at or conferences and work with supervisor to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.
- Discuss career pathways, references letters, and publication options with your supervisor.

WHAT WILL I LEARN?

- A graduate degree in Electrical and Computer Engineering can equip you with valuable and versatile skills, such as:
  - Knowledge and technical skills
  - Effective communication skills in multiple forms for diverse audiences
  - Information management: prioritize, organize and synthesize large amounts of information
  - Time management: Meet deadlines and manage responsibilities despite competing demands
  - Project management: develop ideas, gather information, analyze critically, appraise findings, draw and act on conclusions
  - Creativity and innovation
  - Perseverance
  - Independence and experience as a collaborative leader
  - Awareness, an understanding of sound ethical practices, social responsibility, research and cultural sensitivity
  - Professionalism in all aspects of work, research, and interactions
  - Leadership: initiative and vision leading people and discussion

Applications FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Master of Applied Science or Master of Science.
- Grades Required: minimum cumulative average of 75% or B from Canadian or US Universities, or 80% for international students.

ADDITIONAL REQUIREMENTS
- Statement of Interest/Statement of Research.
- Curriculum Vitae.
- English Proficiency Requirements as listed on the ECE graduate website.

KEY DATES & DEADLINES
- Application due:
  - Fall Semester Start: January 31 (international), March 1 (domestic).
  - Winter Semester Start: August 15th
- Notification of acceptance: usually before the end of April for international students, end of May for domestic students.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

Minimum funding guarantee for PhD students is domestic/international PhD students is $25,000 per year throughout years 1-4. Students are usually funded through a combination of research assistantships, teaching assistantships, and/or scholarships. Funding for international students offsets their higher tuition fees.

You are encouraged to apply for external funding from OGS, NSERC and other sources. Queen's will automatically issue a one time $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies' information on awards and scholarships.
