Why GRADUATE STUDIES in GEOLOGICAL ENGINEERING?

Geological Engineering is the application of geological knowledge to working with earth materials – whether for sustainable development of resources including water, oil, gas, and minerals; for construction of projects on, in or of soil and rock; or to safeguard the public from geohazards. At Queen’s, students in these fields will be exposed to geology from the field to the laboratory scale, and to analysis and decision-making in Earth Sciences, enjoying multiple field trips, and utilizing world-class labs for chemical and physical characterization of Earth materials, and numerical modelling of their behaviour.

Graduate students and their work are an important part of an ongoing research process that provides the community with ways of understanding natural, cultural, imaginative, social, and technological phenomena.

Why QUEEN’S?

As a PhD student in Geological Engineering at Queen’s you are part of one of the most research intensive universities in Canada. Our research program is internationally renowned with a wide range of research activities in all of the major specialization areas of geological engineering.

The Department of Geological Sciences and Geological Engineering provides opportunities for advanced studies and research in the Earth Sciences. Faculty interests span disciplines in Applied Geoenvironmental Sciences and Geotechnique, Geophysics and Geochronology, Economic Geology and Mineral Exploration, Petrology and Structural Geology, Sedimentology, Sedimentary Geochemistry, and Paleobiology often in a multi-disciplinary fashion and including applications to economic and environmental problems.

Our students come from countries all over the world, such as Brazil, Chile, Greece, and China. At Queen’s, graduate students from all disciplines learn and discover in a close-knit intellectual community.

“I wanted a challenge and saw geomechanical engineering as the answer; it would provide that challenge while simultaneously providing me an opportunity to use my structural engineering background. I came to Queen’s for my Masters, which developed into a PhD candidacy, and I haven’t looked back since.”

— Jeffrey Oke, PhD

Program STRUCTURE

PhD (4 years): Required to take a minimum of four term length graduate courses (or equivalent) beyond the Master’s degree course requirement and thesis.

RESEARCH Areas

With high-tech geochemistry and geophysics labs, geomechanics computing tools, and Queen’s Facility for Isotope Research lab, our students have the opportunity to engage in cutting-edge geoscience and geoenvironmental research. As well, students collaborate with industrial partners, government laboratories and surveys, academic institutions worldwide and engage in extensive fieldwork on six continents, making our program truly a world-class experience. Students can avail themselves of opportunities to collaborate with other departments at Queen’s, including the GeoEngineering Centre at Queen’s and RMC, Mining, Environmental Studies, and Civil Engineering.
**Geological Engineering PhD Map**

**DOCTOR OF PHILOSOPHY (PhD)**

**WHAT WILL I LEARN?**

A graduate degree in Geological Engineering can equip you with valuable and versatile skills, such as:

- **Knowledge and technical skills**
- **Effective communication skills** in writing and oral presentations.
- **Analytical and critical thinking skills**.
- **Information management**: prioritize, organize, and synthesize large amounts of information.
- **Time management**: meet deadlines and manage responsibilities despite competing demands.
- **Project management**: develop ideas, gather information, analyze critically, appraise findings, draw and act on conclusions.
- **Creative and innovative thinking**.
- **Perseverance**.
- **Independence and experience** as a collaborative worker.
- **Awareness**: an understanding of sound ethical practices, social responsibility, research integrity, and cultural sensitivity.
- **Professionalism** in all aspects of work, research, and interactions.
- **Leadership**: initiative and vision leading people and discussion.

**WHERE CAN I GO?**

A PhD in Geological Engineering can take your career in many directions. In Canada, less than 40% of all PhDs work in post-secondary education – the majority will work in industry, government, or non-profits. Graduates from the Geological Engineering PhD program have found careers within:

- **Academia and Research**
- **Consulting**
- **Environment assessment**
- **Mineral and oil exploration**
- **Policy analysis**
- **Protection and rehabilitation**
- **Resource management**
- **Surface and underground construction**

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

---

### ACHIEVE YOUR ACADEMIC GOALS

**YEAR I**
- Key priorities include your relationship with your supervisor, forming your research committee, coursework, and comprehensive exams.
- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.
- Look to **Student Academic Success Services** for a variety of supports.

**YEAR II**
- Priorities include completing your comprehensive examination and pursuing substantive research.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Find your way through the academic process with the help of **School of Graduate Studies and Postdoctoral Affairs** (PhD development) and the **SGSPA website**.

**YEAR III**
- Continue to meet regularly with your supervisor, review research progress, and write your dissertation.
- Use conference presentations to create, discuss, and explore ways to disseminate research findings.
- Begin discussion of potential thesis defence examiners.

**YEAR IV**
- Plan date of thesis submission for examinations.
- Present your research at conferences and work with supervisor to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.

### MAXIMIZE RESEARCH IMPACT

**YEAR I**
- Think about audiences for your research.
- Complete CORE online module on research ethics if doing research regarding sensitive topics.
- Apply to NSERC, OGS, and other funding.
- Apply for the **Graduate Dean’s Travel Grant for Doctoral Field Research**.

**YEAR II**
- Attend or present at a graduate conference such as the **Advances in Earth Science Research Conference**.
- Expand your research audience through social media such as Twitter or a blog.
- Consider publishing elements of your research.

**YEAR III**
- Continue to present at conferences.
- Consider participating in the **3 Minute Thesis (3MT) competition**.
- Contact the **Queen’s Media Centre** for guidance on speaking to news outlets about your work.
- List yourself on the **Faculty of Engineering and Applied Science research website**.

**YEAR IV**
- Practice articulating the skills you have been developing in setting outside the university, such as casual conversation, networking, and interviews.
- Get help from a Career Services workshop.
- Prepare for work or studies in a multicultural environment.
- Do some targeted networking with people working in careers of interest, through **Queens Connects**.
- Attend a major conference in your field, such as the **Canadian Geotechnical Society Annual Meeting**.
- Visit **SGSPA website** for tips on getting involved.

### BUILD SKILLS AND EXPERIENCE

**YEAR I**
- Serve on faculty or university committees. Talk to the **Society of Graduate and Professional Students (SGPS)** for tips on getting involved.
- Consider positions in student services, the SGPS, or media outlets like the Queen’s Journal, CFRC, and the SGSPA Blog. Look in the **AMS Club Directory**.
- Use a Teaching Assistant or Research Assistant position to develop your skills and experience.

**YEAR II**
- **Hone** skills for non-academic employment by continuing involvement on committees in community.
- **Start** keeping an up-to-date list of your skills, experiences, and competencies.
- For help with teaching, get support from **Career Services**.
- **Prepare** for public outreach through social media by taking the **InterCultural Awareness Training Certificate** hosted by **QLC** and **FDISC**.

**YEAR III**
- Investigate internships from **MITACS** and other sources.
- **Find** opportunities for extra training through **CGS** or **SGSPA** professional development, **MITACS**, or other sources to boost your skills.
- Consider joining professional associations like **Canadian Geotechnical Society**.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.

**YEAR IV**
- Consider joining professional associations like **Canadian Geotechnical Society**.
- **Join** groups on LinkedIn reflecting specific career or topics of interest.
- Participate in hiring committees and attend job talks. Research academic careers of interest, through **Queens Connects**.
- **Build** connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
- **Join** groups on LinkedIn reflecting specific career or topics of interest.
- Participate in hiring committees and attend job talks. Research academic careers of interest, through **Queens Connects**.
- **Consult** with the **Centre for Teaching and Learning**.

### ENGAGE WITH YOUR COMMUNITY

**YEAR I**
- Consider volunteering with different community organizations, such as **Sustainable Kingston**.
- Connect to broader communities of engineers by joining an **Engineering Society Design Team**.

**YEAR II**
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Consider signing up for the **PhD Community Initiative program** run by the **SGSPA**.

**YEAR III**
- Do some targeted networking with people working in careers of interest, through **Queens Connects**.
- **Join** groups on LinkedIn reflecting specific career or topics of interest.
- Consider joining professional associations like **Canadian Geotechnical Society**.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.

**YEAR IV**
- Connect to broader communities of engineers by joining an **Engineering Society Design Team**.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.
- **Serve** on faculty or university committees. Talk to the **SGSPA website** for tips on getting involved.

### LAUNCH YOUR CAREER

**YEAR I**
- Finding a career fit starts with knowing yourself. Take a **Career Services workshop** or meet with a career educator and coach for help.
- Start reading publications like **University Affairs** and the **Chronicle of Higher Education**. Browse non-academic, labour market websites.
- Stay on the lookout for special events like School of Graduate Studies and Postdoctoral Affairs Career Week to explore your career pathways.

**YEAR II**
- **Start** building your teaching portfolio including student evaluations, and seeking mentorship.
- **Explore** different careers of interest by using **Queens Connects** on LinkedIn to connect with Queen’s alumni. For more information check out **Career Coaching**.
- **Investigate** requirements for professional positions or other opportunities related to careers of interest.

**YEAR III**
- **Participate** in hiring committees and attend job talks. Research academic careers of interest, through **Queens Connects**.
- **Consult** with the **Centre for Teaching and Learning**.
- **Start** focusing on non-academic areas of interest. Research organizations of interest and start putting together your industry resume and begin your job search plan.

**YEAR IV**
- **Build** connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
- **Apply** to jobs or make plans for other positions and apply for post-doc fellowships and positions.
- **Participate** in hiring committees and attend job talks. Research academic careers of interest, through **Queens Connects**.

**HOW TO USE THIS MAP**

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all. To make your own custom map, use the **My Grad Map tool**.
Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Master’s degree in Geological Sciences or Geological Engineering, Mining Engineering, or Civil Engineering are acceptable. Degrees in related fields such as Biology, Chemistry, Physics, Environmental Sciences, or Geography are considered, but may require additional Geology courses.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application deadline: February 1 for September admission.
- Notification of acceptance: Typically, 4 weeks after the full application has been received.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The level of financial support consequently varies among graduate students in the Department, with a guaranteed minimum level of $23,000 for PhD students. As part of the minimum funding package, you may serve as a Teaching Assistant.

You are encouraged to apply for external funding from OGS, NSERC, and other sources. Queen's will automatically issue a one time $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies and Postdoctoral Affairs' information on awards and scholarships.

Graduate Studies FAQs

How do I make the most of my time at Queen’s?

Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone's journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources - our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.

What is the community like?

At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen's more than 130 graduate programs within 50+ departments & research centres. With the world's best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen's is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston's history and culture, see Queen's University's Discover Kingston page.
