# Why HEALTH PROFESSIONS EDUCATION?

The Master of Health Professions Education (MHPE) program prepares health professionals to develop competencies and skills to succeed as educators and practitioners who will advance innovations and enhancements in health professions education in academic, clinical, and professional settings. The MHPE program provides an interdisciplinary and collaborative learning, teaching, and scholarship approach.

The Master of Health Professions Education (MHPE) program at Queen's fulfills a niche that is not currently being met in Canada. Our program is the only one available to all health professions (e.g., dentists, doctors, massage therapists, nurses, nutritionists, occupational therapists, paramedics, physiotherapists, public health professionals, veterinarians, etc.) that is both course-based and competency-based. Our program:

- Is designed by health professionals and education experts from a multitude of disciplines.
- Uses team teaching techniques to ensure multiple perspectives are represented.
- Is designed using adult learning principles and adhere to current best practices in online learning.
- Is curriculum mapped and aligned to ensure learners are introduced to key concepts and application of knowledge; these are reinforced and mastered throughout the program.
- Is mapped onto competencies within different health professions.
- Embeds Indigenous perspectives throughout the program, specifically addressing the Truth and Reconciliation Commission Calls to Action.
- Provides an Indigenous Health
   Professions course team-taught by an
   Indigenous health professional and an
   allied education specialist with specific
   training in this area.
- Focuses on collaborative and interdisciplinary practice.

### **Program STRUCTURE**

The MHPE is a two-year, cohort-based, part-time, professional master's program comprised of eight blended courses which creates opportunities for face-to-face and online engagement.

- •The first and fifth courses are in-person during mandatory one-week summer intensives, where opportunities are afforded to build a learning and mentoring community with peers, faculty, and staff.
- •The five online courses are designed to promote learner engagement with the material, peers, and faculty.
- •The final course, a capstone experience, consists of a project that provides an opportunity to link theory to practice and is designed to meet individual needs.

### Part-Time STUDIES

The Master of Health Professions Education degree is delivered on a part-time basis over two years which allows health professionals the flexibility to continue working to meet professional obligations while enhancing their skills and competencies.

Visit the MHPE program website to learn more about the program.

"The content is incredibly relevant to my work as a health practicioner as well as to my teaching role. My diverse group of peers are a joy to work with and learn from. The faculty are exceptionally qualified, supportive, and invested in our learning"

### WHAT WILL I LEARN?

A degree in Health Professions Education can equip you with:

- Time Management skills as you learn to balance work/life commitments
- Communication skills through the completion of multiple projects and presentations
- **Professionalism** in all areas of your career
- Collaboration strategies as you work with professionals across disciplines
- Leadership as you learn to take your health professions teaching to the next level
- Awareness of Indigenous worldview and ways in which you can contribute to reconciliation
- Knowledge of best practices in areas of scholarship, curriculum, and design
- Improved advocacy skills

#### WHERE CAN I GO?

A Master of Health Professions Education degree will help you take the next step in your existing career or equip you with the skills to embark on a new career!

The MHPE Program is a fantastic way to build your resume while still allowing you to maintain your skills on the job. The MHPE experience will provide you with a foundation to launch into training the next generation of health professionals and beyond.

### How to use this map

# Graduate Studies FAQs

# How do I make the most of my time at Queen's?

Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone's journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

## Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.
