Why GRADUATE STUDIES in MATHEMATICS and STATISTICS?

A graduate degree in Mathematics and Statistics is essential for anyone aspiring to research or academic positions, and is very useful for those who want to assume a leadership role in government, business and industry. A Master’s degree in mathematics and statistics prepares students for a wide variety of research and industry career options.

Why QUEEN’S?

Queen’s is an ideal place to pursue graduate study in Mathematics and Statistics. We have an outstanding group of faculty researchers who are internationally recognized in their fields of specialization. They represent a wide variety of areas including pure mathematics (number theory, algebra, algebraic geometry, combinatorics, operator algebras, random matrices and dynamical systems), mathematical physics, mathematics applied to engineering (control theory, communication theory), mathematical biology, and both theoretical and applied statistics.

Program STRUCTURE

- MSc Pattern I (18-24 months): course work and a research thesis.
- MSc Pattern II (12 months): course work and research project.
- MASc (18-24 months): course work and a research thesis.

RESEARCH Areas

MSc

- Algebra and Number Theory
- Analysis, Geometry, and Topology
- Applied Mathematics
- Mathematics and Engineering
- Probability and Statistics

MASc

- Mathematics and Engineering

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Department of Mathematics and Statistics website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience.

“The graduate mathematics community at Queen’s is vibrant, international, and intellectually stimulating.”

–John Treilhard, MSc
**2021-2022**

**Mathematics & Engineering, Mathematics & Statistics**

**MASTER OF APPLIED SCIENCE (MSc), MASTER OF SCIENCE (MSc)**

### Achieve Your Academic Goals

- Start with key priorities like developing your relationship with your supervisor and doing your coursework.
- Find your way through the academic process with help from departmental and Expanding Horizons professional development workshops, the department Grad Chair, and the SGSS website.

### Maximize Research Impact

- Start to think about the audiences for your research.
- If you will be continuing graduate studies explore graduate programs and apply for external scholarships such as NSERC, or OGS.
- Check admission test deadlines if needed for further studies.
- Start keeping an eportfolio of your skills, experiences and competencies.

### Build Skills and Experience

- Consider positions in student services, the SGSS, or media outlets like the Queen’s Journal, CFRC, and the SGS Blog. Look in the AMS Clubs Directory for more ideas.
- Serve on departmental, faculty, or university committees.
- Check out professional development workshops from Expanding Horizons.
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUC and Four Directions Indigenous Student Centre.

### Engage with Your Community

- Explore how you can connect with your community through experiential opportunities on- and off-campus.
- Consider volunteering with different community organizations, such as Math Quest, a math camp for girls.
- Find a career that fits starts with knowing yourself. Get help by taking a Career Services workshop or meeting with a career counsellor. Check out books like What Are You Going to Do With That? or The Academic Job Search from the Career Resource Area for advice on various career options.
- Start reading publications like University Affairs and the Chronicle of Higher Education. Browse non-academic labour market websites.
- Stay on the lookout for special events like School of Graduate Studies Career Week to explore your career pathways.
- Check admission test deadlines if needed for further studies.

### Launch Your Career

- Explore different careers of interest by using Queen's Connects on LinkedIn to connect with Queen's alumni. Check out Career Cruising for more information.
- If you are considering a PhD, explore programs of interest reach out to faculty, and apply to PhD programs and external scholarships.
- Do some targeted networking with people working in careers of interest, through Queen's Connects on LinkedIn, the Queen’s Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Participate in hiring committees and attend job talks. Start focusing on areas of interest. Research organizations of interest and start putting together your CV or resume for potential positions of interest. Get help from Career Services with job searching, resumes, and interviews.

### Getting Started

- **Complete your coursework, begin to research and write your project or thesis.** Attend the weekly Math & Stats Department Colloquium.

### Intermediate Stage

- **Complete and defend your project or thesis.**
- **Consider putting an article in The Conversation.**
- **Consider publishing options for your research.**
- **Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews.** Get help from a Career Services workshop.
- **Start to think about the audiences for your research.**

### Wrapping Up

- **Check out opportunities for extra training through CTL, Expanding Horizons, MITACS, or other sources to boost your skills.**
- **Attend the weekly Math & Stats Department Colloquium.**
- **Consider participating in the 3 Minute Thesis (MTh) competition.**
- **Expand your research audience through social media such as Twitter or a blog.**
- **Set up a meeting with the School of Graduate Studies for a Grad Chat to discuss your research interests.**
- **Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews.** Get help from a Career Services workshop.
- **Consider putting an article in The Conversation.**
- **Start an eportfolio of your skills, experiences and competencies.**
- **Use a Research Assistant or Teaching Assistant position to develop your research or teaching skills.**
- **For help with teaching, get support from the Centre for Teaching and Learning.** Enroll in SGSS902 or the PUTL Certificate for more professional development in teaching and learning.
- **Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.**
- **Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUC and Four Directions Indigenous Student Centre.**
- **If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.**

### Where Can I Go?

A Master's degree in Mathematics and Statistics or Mathematics and Engineering can take your career in many directions. Many of our MSc students choose to continue their academic inquiry with a Ph.D. Our Master's students are equipped with a strong foundation for careers in:

- **Academia**
- **Biostatistics**
- **Clinical Data Analysis**
- **Business Analysis**
- **Finance**

*Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.*

### What Will I Learn?

A graduate degree in Mathematics and Statistics or Mathematics and Engineering can equip you with valuable and versatile skills, such as:

- **Knowledge and technical skills**
- **Effective communication skills in multiple forms for diverse audiences**
- **Information management: prioritize, organize and synthesize large amounts of information**
- **Time management: meet deadlines and manage responsibilities despite competing demands**
- **Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions**
- **Creativity and innovation**
- **PERSISTENCE**
- **Independence and experience as a collaborative worker**
- **Awareness, an understanding of sound ethical practices, social responsibility, responsible research and cultural sensitivity**
- **Professionalism in all aspects of work, research, and interactions**
- **Leadership, initiative, and vision leading people and discussion**

### The Coronavirus Pandemic May Impact How Some Activities are Delivered in 2021-2022. Please check directly with the host of any activity on the map for the latest information.

*This map is intended to provide suggestions for activities and careers, but everyone's abilities, experiences, and constraints are different. Build your own Grad Map using our online My Grad Map tool.*

Graduate Studies FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- MSc: 4 year Bachelor's degree (preferably honours) with a minimum B+ standing.
- MASc: 4 year Bachelor's degree (normally in engineering) with a minimum B+ standing.

ADDITIONAL REQUIREMENTS
- Two official transcripts for all post-secondary studies.
- At least 2 letters of reference.
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application due: Although applications can be submitted up to April 30th, applicants are advised to submit their applications as soon as possible and by January 15th in order to receive full funding consideration.
- Notification of acceptance: Rolling acceptances.

Before you start your application, please review the graduate studies application process.

What about FUNDING?

Most MSc and MASc students in Mathematics and Statistics receive minimum funding of $23,000 per year. The funding package can consist of teaching assistantships or fellowships, research fellowships, internal and external awards and/or scholarships.

We encourage all eligible student to apply for external funding from OGS, NSERC and other sources. For more information on sources of funding see Funding, Awards, Scholarships and Bursaries.

Where can I get help?

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGS website for available resources.

What is the community like?

At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen's more than 130 graduate programs within 50+ departments & research centres. With the world's best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen's is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston's history and culture, see Queen's University's Discover Kingston page.
