Why GRADUATE STUDIES in MINING ENGINEERING?

Mining is the foundation of industrial civilization. It is the process of extracting minerals like gold, silver, copper, nickel and uranium (metallic) and salt, potash, coal, limestone aggregate, and oil (non-metallic) formations that concentrate naturally in the earth. It may surprise you, but other than agricultural products, the raw ingredients for everything else in our modern lives comes from mining.

Mining Engineering is one part technical design and one part business management. Mining engineers are responsible for deciding how valuable a mineral deposit is and how best to mine it, for planning the day-to-day schedule and path of mining to maximize extraction and profit, and for ensuring the safety of people and equipment through applications in areas such as mine ventilation and rock mechanics.

Why QUEEN’S?

As a PhD student in Mining Engineering at Queen’s you are part of one of the most research intensive universities in Canada. Our research program is internationally renowned with a wide range of research activities in all of the major specialization areas of mining engineering.

As technology evolves and the global economy changes, our students and researchers play a key role in defining the state of the art in mining. In close collaboration with industry partners, our faculty and students work to make mining operations safer, more efficient, more productive, less impactful on the natural environment, and more cost effective.

Our students come from all over the world. At Queen’s, graduate students from all disciplines learn and discover in a close-knit intellectual community.

RESEARCH Areas

• Blasting, Mine to Downstream Operations
• Data analytics
• Geomechanics, Seismicity, Geodynamics
• Geostatistics, Geometallurgy
• Health and Safety
• Hydrometallurgy, Biohydrometallurgy, Environmental
• Mine-Mechanical
• Mineral Processing
• Mining Engineering
• Pyrometallurgy, Microwaves in metal extraction
• Reliability, Maintenance and Risk Assessment
• Social Risk and Community Relations
• Ventilation

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Mining Engineering website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact them and tell them about your interest in graduate work and related experience.

You can also find out if the faculty member is accepting new graduate students to supervise by meeting your potential supervisor at departmental events for prospective students.
# Mining Engineering PhD Map

## Doctor of Philosophy

### Achieve Your Academic Goals

**Year I**
- Key priorities include forming your research committee, coursework, and comprehensive exams.
- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.
- Look to Student Academic Success Services and School of Graduate Studies and Postdoctoral Affairs professional development for supports and workshops.

**Year II**
- Write and defend your thesis proposal.
- Embark on your substantive research.
- Present your research in a seminar to Mining Engineering graduate students and faculty (MINE 897).
- Complete your PhD comprehensive exam within 4-18 months after registering.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.

**Year III**
- Continue to meet regularly with your supervisor, review research progress, and write your dissertation. Check out the SGSPA writing camps, such as Dissertation Boot Camp or Dissertation on the Lake.
- Use conference presentations to create, discuss, and explore ways to disseminate research findings.
- Begin discussion of potential thesis defence examiners.

**Year IV**
- Complete and defend your research thesis (MINE 999).
- Present your research at conferences and work with your supervisor to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.
- Discuss career pathways, reference letters, and publication options with your supervisor.

### Maximize Research Impact

- Think about audiences for your research.
- Complete CORE online module on research ethics if doing research with regard to sensitive topics.
- Apply to NSERC, OGS, and other funding.
- Apply for the Graduate Dean’s Travel Grant for Doctoral Research.

- Attend or present at a graduate conference such as the Canadian Institute of Mining (CIM) Annual Meeting.
- Expand your research audience through social media such as Twitter or a blog.
- Consider publishing elements of your research.

- Hone skills for non-academic employment by continuous involvement on committees and in community.
- Start keeping an eportfolio of your skills, experiences, and competencies.
- For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SGSR02 or the PUTF Certificate for more professional development.

- Consider volunteering with different community organizations.
- Connect to broader communities of engineers by joining an Engineering Society Design Team.

- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.

- Consider joining professional associations like the Mining Association of Canada (MAC), the Canadian Institute of Mining (CIM), and the International Society of Mining Engineers (ISME).

- Join groups on LinkedIn reflecting specific careers and topics of interest.

### Build Skills and Experience

**Year I**
- Serve on faculty or university committees. Talk to the Society of Graduate and Professional Students (SGPS) for tips on getting involved.
- Consider positions in student services, the SGPS, or media outlets like the Queen’s Journal, the SFSP Blog, and the SFSP Club Directory.
- Use a Teaching Assistant or Research Assistant position to develop your skills and experience.

**Year II**
- Do some targeted networking with people working in careers of interest, through Queen’s Connects on LinkedIn or Queen’s Alumni Association.
- Attend or present at a graduate conference such as the Canadian Institute of Mining (CIM) Annual Meeting.
- Expand your research audience through social media such as Twitter or a blog.
- Consider publishing elements of your research.

**Year III**
- Conduct interviews from MITACS and other sources.
- Find opportunities for extra training through CTL, SGSPA professional development, MITACS, or other sources to boost your skills.
- Take part in the various international, multidisciplinary opportunities, and collaborate with other departments, such as Geological, Mechanical, Chemical, and Civil Engineering.

**Year IV**
- Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Prepare for work or studies in multi-cultural environments by taking the Intercultural Awareness Training Certificate hosted by QUIC and Four Directions Indigenous Student Centre.

### Engage with Your Community

- Consider volunteering with different community organizations.

- Connect to broader communities of engineers by joining an Engineering Society Design Team.

- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.

- Do some targeted networking with people working in careers of interest, through Queen’s Connects on LinkedIn or Queen’s Alumni Association.

- Consider joining professional associations like the Mining Association of Canada (MAC), the Canadian Institute of Mining (CIM), and the International Society of Mining Engineers (ISME).

- Join groups on LinkedIn reflecting specific careers and topics of interest.

### Launch Your Career

- Finding a career fit starts with knowing yourself. Take a Career Services workshop or meet with a career educator and coach for help.

- Start reading publications like the Queen’s Alumni Chronicle of Higher Education, University Affairs Career Week to explore your career options.

- Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.

- Apply to jobs or make plans for other adventures. Get help from Career Services with job searching, resumes, and interviews.

- If considering jobs abroad, research possible immigration regulations. If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

### What Will I Learn?

A graduate degree in Mining Engineering can equip you with:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize, and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, an understanding of sound ethical practices, social responsibility, responsible research, and cultural sensitivity
- Professionalism: all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

### Where Can I Go?

A PhD in Mining Engineering can take your career in many directions. In Canada, less than 40% of all PhDs will work in post-secondary education. The rest will work in industry, government, or non-government organizations.

Graduates from our Mining Engineering PhD program have found careers in:

- Academia and Research
- Consulting
- Financial Institutions
- Mining
- Mining Equipment and Technology Providers
- Non-Government Organizations

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

---

**How to use this map**

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Grad Map tool.

Graduate Studies FAQs

How do I make the most of my time at Queen's?
Use the Grad Map to plan for success in five overlapping areas of your career and academic life. Everyone’s journey is different - the ideas on the maps are just suggestions to help you explore possibilities. For more support with your professional development, take advantage of the SGSPA professional development framework and the new Individual Development Plan (IDP) process to set customized goals to help you get career ready when you graduate.

Where can I get help?
Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGSPA website for available resources.

What is the community like?
At Queen's, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen's more than 130 graduate programs within 50+ departments & research centres. With the world's best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen's offers a wonderful environment for graduate studies. Queen's is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston's history and culture, see Queen's University's Discover Kingston page.

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- A Master's degree in Mining Engineering. Applicants with a Master's degree in a cognate science may be admitted.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The following minimum scores are required: (1) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30). Applicants must have the minimum score in each test as well as the minimum overall score, or (2) IELTS: 7.0 (academic module overall band score and a 7.0 for each test band), or (3) PTE Academics: 65, or (4) CAEL CE -70 (minimum overall score).

KEY DATES & DEADLINES
- Application deadline: March 1st.
- Notification of acceptance: April 30th.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?
The level of financial is at a guaranteed minimum level of $25,000 for PhD students. As part of the minimum funding package, you may also serve as a Teaching Assistant and gain additional pay for this service.

You are encouraged to apply for external funding from OGS, NSERC, and other sources. Queen's will automatically issue a one time $10,000 award to Doctoral students who have won federal government tri-council awards. For more information, see the School of Graduate Studies and Postdoctoral Affairs’ information on awards and scholarships.
