Get to know MINING ENGINEERING

Aside from the plant material we harvest, all of the raw material used by human society comes from minerals extracted from the earth. This program prepares you for careers in both the minerals industry and related environmental and technological fields. As a Mining Engineering student, you will study a broad range of disciplines involved in locating, extracting, refining, and disposing of mineral and metal products and byproducts. The program teaches students how these processes can be carried out efficiently and competitively, with a focus on sustainability and the environment.

“Our program is designed to address the entire mine life-cycle, from exploration to mine closure and offer solutions that not only enhance the competitiveness of the mining industry but also ensures compatibility with evolving societal values.”

Queen’s ADMISSIONS

Students apply to Queen’s Engineering (QE) through the OUAC (Ontario University Application Centre) website. Secondary school prerequisites include five 4U and 4M courses, one of which must be English 4U. Calculus and Vectors 4U, Advanced Functions 4U, Chemistry 4U, and Physics 4U are all required. A final competitive minimum grade of 80% must be obtained in all courses. Applicants outside of Ontario may have additional requirements.

A Common START

Queen’s is unique in offering a common first year along with an open discipline choice. When you do choose your program, you don’t have to worry about caps or quotas. Provided you pass all of your first year courses, you are guaranteed a place in your engineering program of choice. Queen’s also offers Section 900, a special extended program for students struggling with first year courses. Take things at a slower pace and recover in time for second year.

Degree OPTIONS

Bachelor of Applied Science in Engineering
Bachelor of Applied Science in Engineering with Professional Internship
Option in Mining / Minerals Processing and Environmental / Mine-Mechanical

Course HIGHLIGHTS

Mining Engineering students have the opportunity to take a wide range of technical courses to help prepare them for the many possible career destinations available. Such courses include:

- Design and Planning
- Drilling and Blasting
- Mining and Sustainability
- Chemical Extraction of Metals
- Mineral Industry Economics
- Equipment Reliability and Maintenance
- Geostatistics
- Geomechanics
- Process Engineering
- Automatic Controls

That is a degree from Queen’s.

mine.queensu.ca
**Mining Engineering**

**BACHELOR OF APPLIED SCIENCE | BACHELOR OF APPLIED SCIENCE WITH PROFESSIONAL INTERNSHIP**

### 1ST YEAR

**GET THE COURSES YOU NEED**

Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing and Earth Systems Engineering.

Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focusing on problem solving, experimentation principles and finishing off with a team-based engineering project.

Discipline selection will take place in February!

### 2ND YEAR

**GET RELEVANT EXPERIENCE**

Join teams or clubs on campus such as the Queen's University Experimental Sustainability Team (QUEST).

See the AMS Clubs Directory or the Queen's Get Involved page for more ideas.

**GET CONNECTED WITH THE COMMUNITY**

Volunteer on or off campus with different community organizations such as Engineers without Borders (EWB).

Consider joining an intramural sports or an athletics team. Check out the Athletics & Recreation site.

**GET THINKING GLOBALLY**

Speak to a QUIC advisor or get involved in their programs, events and training opportunities.

Prepare for work or studies in a multi-cultural environment by taking QUIC's Intercultural Awareness Training Certificate, and research possible immigration regulations.

### 3RD YEAR

**GET THE COURSES YOU NEED**

You will take the second EDPS course – APSC200.

Your other 3-4 courses depend on your option!

**GET RELEVANT EXPERIENCE**

Attend the Mining Pathways event for information on career opportunities.

Talk to the department or Career Services about work through SWEP or NSERC.

Research summer job opportunities within the mining industry and attend information sessions offered by various companies.

**GET CONNECTED WITH THE COMMUNITY**

Look in to membership in the following organizations within the mining community: Prospectors & Developers Association of Canada (PDAC), Canadian Institute in Mining (CIM), and the Society for Mining Metallurgy and Exploration (SME).

Attend department complimentary presentations by industry members and organizations.

**GET THINKING GLOBALLY**

Is an exchange in your future? Start thinking about where you would like to study abroad.

Build your intercultural involved with other cult improving your languag

### Get Ready for Life After Graduation

Grappling with program decisions? Go to the Orientation Evenings held by different Engineering departments and attend the various Career Fairs during the year.

Get some help deciding by visiting Career Services.

Explore different careers of interest by reading books in the Career Services Career Advising and Resource Area, such as Career Opportunities in Engineering. For more information check out Career Cruising or by finding and connecting with alumni on Queen's Connects.

Attend the Engineering and Technology Fair held by Career Services.

Start focusing on areas: education requirement: needed, prepare to take LSAT or GMAT and get school from Career Serv

Read trade journals like learn about issues affec

Visit careers.queensu.ca/majormaps for the online version with links!
The coronavirus pandemic may impact how some activities are delivered in 2021-2022. Please check directly with the host of any activity on the map for the latest information.

### 4TH OR FINAL YEAR

**Courses include:** Reliability, Maintenance, & Risk Assessment; Mining & Sustainability; Occupational Health & Safety, as well as your 4th year project course(s).

Your other courses depend on your option!

Apply to graduate on SOLUS.

**Consider a 12-16 month QUIP Internship**

For jobs within the Mining industry mining last summer, try to get a job with a different company or in a different area of the industry. Consider applying to do a 12-16 month QUIP internship. If you worked in mining last summer, try to get a job with a different company or in a different area of the industry.

If you are not already a member, join professional organizations like PDAC, CIM, SME and the International Society of Explosives Engineers (ISEE).

Join groups on LinkedIn reflecting specific careers or topics of interest in Mining Engineering.

If you have not already done so, do a 12-16 month QUIP Internship.

Investigate requirements for full-time jobs or other opportunities related to careers of interest.

Assess what experience you’re lacking and fill in gaps with volunteering, clubs, or internships – check out Career Services workshops for help.

**Take the Mine Rescue course.**

International students interested in staying in Canada can speak with an International Student Advisor.

Applying to jobs or future education, or make plans for other adventures. Get help from Career Services with job searching, resumes, interviews, grad school applications, or other decisions.

Consider taking an M.Eng. or M.ASc. to deepen your technical knowledge. Apply for EIT (Engineer-in-Training) status.

**Employability skills**

Your time at Queen’s will give you valuable skills to boost your employability, including:

- Proficiency in mathematics and physical sciences
- Proficiency in mining sciences
- Relevant analysis and design skills
- Health and Safety skills
- Relevant work experience in mining engineering
- Working knowledge of design software for mining engineering
- Sustainability Certified Skills
- Written and oral communication skills
- Time and resource management
- Ability to work independently and in a team on projects

**Where could I go after graduation?**

- Academia
- Banking and venture capital
- Business management (mine manager, director, vp, coo, ceo, president)
- Consulting
- Contracting
- Environmental management
- Equipment designer
- Graduate School
- Government (mine inspector, health and safety, environment)
- Law
- Management
- Mine engineer
- Mine planner and scheduler
- Mine supervisor
- Mineral exploration
- Mining financial analyst
- Mining sales representative
- Mining supplier
- Mining Software Developer
- Metallurgist
- Occupational health and safety
- Petroleum and gas industry
- Project engineer
- Project manager
- Renewable resources
- Technical specialist
- Waste management
- Quarrying

*some careers may require additional training. Careers listed here are only suggestions.

*This map is intended to provide suggestions for potential extracurricular activities and career paths, but everyone’s abilities, experiences, and constraints are different. Build your own Major Map using our online My Major Map tool.
How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified us as one of the GREATEST UNIVERSITY TOWNS in the world – and is often awarded the safest city in Canada. We are a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.
