Politics is about power – who has it and how it is exercised by nation-states, individuals, groups, classes, or political parties, and how different interests are reconciled in and between communities. Political Studies is also concerned with the institutions created to govern communities, as well as with political practices such as voting habits or protests, and how rules, behaviours, and cultures are created in societies. Since power in society is often dependent upon material resources, political scientists also study the distribution of wealth, both within and between nations.

Erin Tolley earned her PhD from Queen’s in 2013. She is currently working on a book which examines how race affects the media’s portrayal of candidates in Canadian politics. Her article, “Do Women ‘Do Better’ in Municipal Politics? Representation Across Three Levels of Government” appeared in the Canadian Journal of Political Science.
