## Get to know

### HEALTH SCIENCES

The Bachelor of Health Sciences (BHSc) program is a direct-entry program designed for students interested in human health. Human health can be studied from the perspectives of biomedical and social science, and the BHSc program aims to address both perspectives. Students who develop a particular interest in a specific area of the health sciences may choose to take one (or more) of six specially-designed learning tracks. These provide a more specialized focus within a particular field, ranging from Infection, Immunity, and Inflammation to Global and Population Health.

This program offers students access to courses that will prepare them for admission to a wide variety of health professional programs such as medicine, dentistry, pharmacy, veterinary medicine, and rehabilitation therapy. These programs are increasingly competency-based, meaning that their graduates must achieve and demonstrate competency in specific health-related roles. This concept has been built into the Bachelor of Health Sciences curriculum, enabling our graduates to provide evidence of their achievements as leaders, communicators, professionals, scholars, collaborators, content experts, and advocates, providing them with the language to communicate their skills gained throughout their undergraduate degree in their applications and interviews to these programs. Students interested in taking the health sciences program may also find careers in research, government or non-government organizations, or health administration.

Queen's BHSc is offered both on-campus and online, using interactive, engaging modules to deliver course content. The core courses in the on-campus program are offered in a blended format. This means that students come to class to interact with faculty members and peers in order to connect and apply concepts learned in class to problem solving scenarios, such as case studies, interpretation of scientific data, or mock conference presentations. The online program is designed to ensure our students interact with

their faculty members and peers as well, via discussion boards and video software. Option and elective courses are available either on-campus or online for our on-campus students, to offer schedule flexibility.

### Degree OPTIONS

#### **Bachelor of Health Sciences (Honours)**

*4 Years, 120 credits*

#### **Bachelor of Health Sciences (General)**

*3 Years, 90 credits*

### Course HIGHLIGHTS

The Bachelor of Health Sciences program has been purpose-built to expose learners to a wide range of knowledge in the field of health sciences. Innovative courses have been developed such as:

Biohacking and Gerontechnology

Developmental Origins of Health and Disease

Health Ethics, Law, and Policy

Evolutionary Biology of Cancer

In addition to these courses, the curriculum highlights a number of traditional fields within the health sciences, including Physiology, Pharmacology, and Anatomy, while also incorporating important topics such as Global and Population Health and Social and Physical Determinants of Health and Disease. Faculty members within the Health Sciences range from academics to practicing physicians

providing Queen's BHSc students with a unique perspective on undergraduate education.

### Queen's ADMISSIONS

Applicants who have, or will successfully complete, a diploma from a Canadian or International high school will be considered through the traditional admission stream. Candidates can apply through OUAC (Code QH (on-campus) or QHO (online) or through Queen's webapp (online). Applicants are required to have an 80% in 4U (or equivalent) English, 4U biology, 4U chemistry, and any 4U math, along with two additional 4U or 4M courses. Check online for courses required for students outside of Ontario.

**Acquire Skills. Gain Experience. Go Global.**  
That is a degree from Queen's.

# 2021-2022 Health Sciences PROGRAM MAP \*

BACHELOR OF HEALTH SCIENCES | BACHELOR OF HEALTH SCIENCES (HONOURS)

## Employability skills

Your time at Queen's will give you valuable skills to boost your employability, including:

- Knowledge of **cellular structures, organic systems, organic chemistry**, and the functions of the human body
- Understanding of **statistical research methods**, the scientific method, and experimental design
- An appreciation for the **social and scientific aspects** that contribute to health and healthcare
- **Research skills** – ability to draw relevant information out of a large amount of data
- **Attention to detail** – analyze and interpret scientific data
- **Problem solving** – adopt a systematic approach to problems
- **Oral and written communication** – produce laboratory reports and present a report to a group
- Resource and **time management**
- **Advocacy** on behalf of different stakeholders/populations with the ability to craft messages based on the audience
- **Collaborating** with peers to achieve common goals

## Where could I go after graduation?

- Biotechnology
- Dentistry
- Drug development
- Environmental management
- Forensics
- Health administration and public health
- Medical and clinical research
- Medicine
- Microbiology
- Neuroscience
- Occupational health and safety
- Optometry
- Toxicology
- Veterinary medicine

\*some careers may require additional training and you may need to ensure your BHSc course selections fulfill the required pre-requisites. Careers paths are suggestions only.

## PROGRAM MAP

### How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don't have to do it all! To make your own custom map, use the My **Major Map** tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

### Get the help you need

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen's, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen's wants you to succeed! Check out the **Student Affairs website** for available

SCIENCE

## Distinguishing **HEALTH SCIENCES**

Health Sciences (BHSc) is one of four health-focused programs at Queen's, which also include Life Sciences (BSc), Biochemistry (BSc), and Health Studies (BA). Health Sciences provides balance between the biomedical side of health, a focus of the Life Sciences and Biochemistry programs, and the social sciences side of health, a focus of the Health Studies program. Queen's Health Sciences has an emphasis on skill (competency) building by ensuring students have the opportunity to practice these skills in their course assessments. It is also the only direct-entry program out of the four that allows you to dive right into health sciences-specific courses!

## Online **HEALTH SCIENCES**

Our online BHSc program, with its inaugural students being accepted in 2016, offers maximal flexibility for our students. Students can complete courses on a timetable that best suits their lifestyle. The degree may be completed on either a full-time or part-time basis, there are different entry points throughout the year, and students can choose from a General or Honours degree. Admission requirements for direct entry are the same as the on-campus program, however for students who lack the traditional requirements, there is an alternate route of admission to the online program. Applicants would apply as a non-degree student initially, and work towards progressing into the degree program by taking three specified first year courses and attaining a cumulative GPA of 3.0 in those courses. Ask an advisor ([bhscadvisor@queensu.ca](mailto:bhscadvisor@queensu.ca)) for more details on this admission route. Finally, the online courses offered by the BHSc program are highly interactive, providing content through a variety of multimedia, along with the opportunity for reflection and self-assessment along the way.
