

Mining Engineering

Get to know

MINING ENGINEERING

Aside from the plant material we harvest, all of the raw material used by human society comes from minerals extracted from the earth. This program prepares you for careers in both the minerals industry and related environmental and technological fields. As a Mining Engineering student, you will study a broad range of disciplines involved in locating, extracting, refining, and disposing of mineral and metal products and byproducts. The program teaches students how these processes can be carried out efficiently and competitively, with a focus on sustainability and the environment.

"Our program is designed to address the entire mine life-cycle, from exploration to mine closure and offer solutions that not only enhance the competitiveness of the mining industry but also ensures compatibility with evolving societal values."

Queen's **ADMISSIONS**

Students apply to Queen's Engineering (QE) through the OUAC (Ontario University Application Centre) website. Secondary school prerequisites include five 4U and 4M courses, one of which must be English 4U. Calculus and Vectors 4U, Advanced Functions 4U, Chemistry 4U, and Physics 4U are all required. A final competitive minimum grade of 80% must be obtained in all courses. Applicants outside of Ontario may have additional requirements.

A Common **START**

Queen's is unique in offering a common first year along with an open discipline choice. When you do choose your program, you don't have to worry about caps or quotas. Provided you pass all of your first year courses, you are guaranteed a place in your engineering program of choice. Queen's also offers Section 900, a special extended program for students struggling with first year courses. Take things at a slower pace and recover in time for second year.

Degree **OPTIONS**

Bachelor of Applied Science in Engineering

Bachelor of Applied Science in Engineering with Professional Internship

Option in Mining / Minerals Processing and Environmental / Mine-Mechanical

Course **HIGHLIGHTS**

Mining Engineering students have the opportunity to take a wide range of technical courses to help prepare them for the many possible career destinations available. Such courses include:

- Design and Planning
- Drilling and Blasting
- Mining and Sustainability
- Chemical Extraction of Metals
- Mineral Industry Economics
- Equipment Reliability and Maintenance
- Geostatistics
- Geomechanics
- Process Engineering
- Automatic Controls

Acquire Skills. Gain Experience. Go Global.

That is a degree from Queen's.

Mining Engineering MAJOR MAP

BACHELOR OF APPLIED SCIENCE | BACHELOR OF APPLIED SCIENCE WITH PROFESSIONAL INTERNSHIP

1ST YEAR

2ND YEAR

3RD YEAR

4TH OR FINAL YEAR

GET THE COURSES YOU NEED

Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing and Earth Systems Engineering.

Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focusing on problem solving, experimentation principles and finishing off with a team-based engineering project.

Courses include: Solid Mechanics, Differential Equations, Mining & Mineral Processing, Computer Applications & Instrumentation in Mining, Engineering Economics, Electric Circuits & Machines, Numerical Methods and Rock Mechanics.

You will take the second EDPS course – APSC200.

Your other 3-4 courses depend on your option!

Courses include: Drilling & Blasting, Mineral Separation, Open Pit Mining, Geological Aspects of Mineral Deposits, Hydraulics, Applied Underground Mining, and Operations Research.

Your other 5 courses depend on your option!

Courses include: Reliability, Maintenance, & Risk Assessment, Mining & Sustainability, Occupational Health & Safety, as well as your 4th year project course(s).

Your other courses depend on your option!

Apply to graduate on SOLUS.

GET RELEVANT EXPERIENCE

Join teams or clubs on campus such as the [Queen's University Experimental Sustainability Team \(QUEST\)](#).

See the [AMS Clubs Directory](#) or the [Queen's Get Involved page](#) for more ideas.

Attend the Mining Pathways event for information on career opportunities.

Talk to the department or Career Services about work through [SWEP](#) or [NSERC](#).

Research summer job opportunities within the mining industry and attend information sessions offered by various companies.

Continue to search for jobs within the Mining industry. If you worked in mining last summer, try to get a job with a different company or in a different area of mining.

Consider applying to do a 12-16 month [QUIP internship](#). Consider a summer research position within the Mining Department.

Investigate requirements for full-time jobs or other opportunities related to careers of interest.

Assess what experience you're lacking and fill in gaps with volunteering, clubs, or internships – check out Career Services [workshops](#) for help.

GET CONNECTED WITH THE COMMUNITY

Volunteer on or off campus with different community organizations such as [Engineers without Borders \(EWB\)](#).

Consider joining an intramural sports or an athletics team. Check out the [Athletics & Recreation site](#).

Look in to membership in the following organizations within the mining community: [Prospectors & Developers Association of Canada](#), [Canadian Institute in Mining](#), and the [Society for Mining Metallurgy and Exploration](#).

Attend department complimentary presentations by industry members and organizations.

Do some targeted networking with alumni working in careers of interest by joining the LinkedIn group [Queen's Connects Career Network](#). Continue to be involved with mining specific organizations through membership and by attending functions within these organizations. Consider attending the CIM Conference and/or the PDAC conference for networking opportunities.

If you are not already a member, join professional associations like PDAC, CIM, SME and the [International Society of Explosives Engineers \(ISEE\)](#).

Join groups on LinkedIn reflecting specific careers or topics of interest in Mining Engineering.

GET THINKING GLOBALLY

Speak to a QUIC advisor or get involved in their programs, events and training opportunities.

Prepare for work or studies in a multi-cultural environment by taking QUIC's Intercultural Awareness Training Certificate, and research possible immigration regulations.

Is an exchange in your future? Start thinking about where you would like to [study abroad](#).

Build your intercultural competence by getting involved with other cultures or by practicing or improving your language skills.

International students interested in staying in Canada can speak with an [International Student Advisor](#).

GET READY FOR LIFE AFTER GRADUATION

Grappling with program decisions? Go to the [Orientation Evenings](#) held by different Engineering departments and attend the various Career Fairs during the year.

Get some help deciding by visiting [Career Services](#).

Explore different careers of interest by reading books in the Career Services Career Advising and Resource Area, such as Career Opportunities in Engineering. For more information check out [Career Cruising](#) or by finding and connecting with alumni on [Queen's Connects](#).

Start focusing on areas of interest. Research education requirements for careers of interest. If needed, prepare to take any required tests (like the LSAT or GMAT).

Read trade journals like the Northern Miner to learn about issues affecting the mining industry.

Apply to jobs or future education, or make plans for other adventures. Get help from Career Services with [job searching](#), [resumes](#), [interviews](#), [grad school applications](#), or other decisions.

Consider taking an M.Eng. or M.A.Sc. to deepen your technical knowledge. Apply for EIT (Engineer-in-Training) status.

CONSIDER A 12-16 MONTH QUIP INTERNSHIP

Employability skills

Your time at Queen's will give you valuable skills to boost your employability, including:

- Proficiency in mathematics and physical sciences
- Proficiency in mining sciences
- Relevant analysis and designing skills
- Health and Safety skills
- Relevant work experience in mining engineering
- Working knowledge of design software for mining engineering
- Sustainability Certified Skills
- Written and oral communication skills
- Time and resource management
- Ability to work independently and in a team on projects

Where could I go after graduation?

- Academia
- Banking and venture capital
- Business management (mine manager, director, vp, coo, ceo, president)
- Consulting
- Contracting
- Environmental management
- Equipment designer
- Graduate School
- Government (mine inspector, health and safety, environment)
- Law
- Management
- Mine engineer
- Mine planner and scheduler
- Mine supervisor
- Mineral exploration
- Mining financial analyst
- Mining sales representative
- Mining supplier
- Mining Software Developer
- Metallurgist
- Occupational health and safety
- Petroleum and gas industry
- Project engineer
- Project manager
- Renewable resources
- Technical specialist
- Waste management
- Quarrying

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don't have to do it all! To make your own custom map, use the My [Major Map](#) tool.

Mining Engineering

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen's provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen's, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally. Queen's wants you to succeed! Check out the [Student Affairs website](#) for available resources.

mine.office@queensu.ca

QUIP QUEEN'S UNDERGRADUATE INTERNSHIP PROGRAM

START DATES
in May, September,
or January

POSITIONS
are paid and
full-time

WORK TERMS
are 12-16 months
long

PROGRAM OVERVIEW

- Graduate with "Professional Internship" on your degree.
- Learn about current advances, practices and technologies in business and industry.
- Test drive a career, earn a competitive salary, and get real world experience.

ELIGIBILITY

- 2nd or 3rd Year Students
- Minimum GPA of 1.9

WHY QUIP?

- Gain a year of career-related work experience.
- Build network connections.
- Receive support from Queen's staff in job search and during internship.

SAMPLE PAST INTERNSHIPS

For more information, contact quip@queensu.ca or visit the [Program Website](#).

Why study in Kingston?

For over 175 years, our community has been more than a collection of bright minds – Queen's has attracted students with an ambitious spirit. Queen's has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research-intensive university focused on the undergraduate experience. The BBC has identified Kingston as one of the GREATEST UNIVERSITY TOWNS in the world – and it is often identified as the safest city in Canada. It is a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. At a university with more clubs per capita than any other university in Canada, and in a city with more restaurants per capita than any other city in North America, you will have the experience of a lifetime at Queen's – and graduate with a degree that is globally recognized among the best.

We're closer than you think
