Physics

Physics at Queen’s combines high-calibre research with an intermediate-scale learning setting, enabling attention and care towards undergraduate teaching as well as exposure to a broad range of topics and expertise. Our students will learn in an engaging environment with the opportunity to conduct interdisciplinary research in state-of-the-art laboratories, and work on projects involving international collaborators such as the experiments in dark matter and neutrinos happening below the surface of the Earth at the Sudbury Neutrino Observatory.

TOP 5 Reasons To Study Physics And Astronomy

1. The department is one of Canada’s leading teaching and research institutes in Physics and Astronomy.
2. Award-winning physics educators such as 3M National Teaching Fellow James Fraser.
3. Our internship program (QUIP) offers a wide range of careers to explore and companies to learn from.
4. Brand new astroparticle physics institute named after Queen’s Nobel Prize Laureate Art McDonald.
5. 25+ summer research assistant positions offered by the department to students every summer.

Alumni Story

“For me, the community within the Physics Department was by far the best aspect of studying Physics at Queen’s. The engaging instructors, knowledgeable technologists, helpful administrative and support staff, and my collaborative peers all contributed to my learning in the most positive way.”

-Kate Fenwick, BScH ’17

TOP ALUMNI JOBS

11% of alumni work in GOVERNMENT
18% of alumni work in TECHNOLOGY
18% of alumni work in BUSINESS & LAW
31% of alumni work in EDUCATION & RESEARCH

2023-24 Plan Thresholds

Thresholds are made on a competitive basis and are updated annually. To see the thresholds for all programs as well as the latest information, please visit quartsci.com/planselection.

Interested in finding out how to augment your degree with Experiential Learning? Learn what opportunities and resources are available for you on the Experiential Learning website. You can also reach out to the team directly at asc.el@queensu.ca.

That is a degree from Queen’s.

queensu.ca/physics
Physics MAJOR MAP

BACHELOR OF SCIENCE (HONOURS): SPECIALIZATION, MAJOR, MINOR

1ST YEAR

GET THE COURSES YOU NEED

In first year you will have the chance to explore the foundations of Physics in biology, chemistry, math, and geology along with some electives. Attend Majors Night in the Winter term to learn more about Plan options.

Want to make sure your academics are where you want them to be? Visit SASS (Student Academic Support Services) and the Writing Centre for some help.

Interested in getting a head start in learning and working in a digital world? Take ASCX 150 and develop future-ready skills!

GET RELEVANT EXPERIENCE

Join teams or clubs on campus such as Queen’s Astronomy Club, Queen’s University Experimental Sustainability Team (QUEST), Queen’s Space Engineering Team (QUEST) or Queen’s Solar Design Team.

See the AMS Clubs Directory or the Queen’s Get Involved page for more ideas.

GET CONNECTED WITH THE COMMUNITY

Volunteer on- or off-campus with different community organizations such as Science Learning Center, or Let’s Talk Science. Consider joining an intramural sport or an athletics team.

Off-campus community organizations welcome Queen’s students – see what’s out there!

GET THINKING GLOBALLY

Prepare for work or studies in a multi-cultural environment by taking QUEC’s Intercultural Competency Certificate, and research possible immigration regulations.

Speak to a QUEC advisor to get involved in their programs, events, and training opportunities.

1ST YEAR

GET READY FOR LIFE AFTER GRADUATION

Exploring different careers of interest in the Career Services Career Advising and Resource Area. For more information check out Career, Crusing or by finding and connecting with alumni on LinkedIn.

GET THE COURSES YOU NEED

Start going deeper into the discipline of Physics, while considering a minor and/or certificate such as Global Action and Engagement. Learn more about Certificates and Internship options.

Develop your entrepreneurial skills by participating in the Queen’s Changemaker Challenge (ASCX 200/300).

GET RELEVANT EXPERIENCE

Look into summer jobs by talking to the department or Career Services about work through SWEP or Work-Study.

Consider entrepreneurial opportunities via programs like the Queen’s Innovation Connector Summer Initiative (ASCX 150).

GET CONNECTED WITH THE COMMUNITY

Get involved with the Departmental Student Council (DSC). Connect with professors at socials or attend departmental public lectures.

Start or continue volunteering with organizations such as Women in Science and Engineering (WISE).

GET THINKING GLOBALLY

Is an exchange in your future? Start thinking about where you would like to study abroad. Apply in January for a third year exchange through the International Programs Office.

Physics research is often international and collaborative. Pursue summer research with faculty members to explore those global connections.

1ST YEAR

GET THE COURSES YOU NEED

A chance to start grouping courses in areas of interest, or to keep it more general and explore many areas of Physics. Meet with an Academic Advisor to make sure you are on track and have planned out your courses for next year.

GET RELEVANT EXPERIENCE

Consider applying to do a 12-16 month QUIP internship between your third and fourth year.

Investigate off-campus summer jobs involving research (such as at SNOLAB). Apply for NSERC USRA, or directly to individual faculty members and research groups in Physics and Astronomy.

Many Physics students volunteer with the on-campus Observatory in Ellis Hall.

GET CONNECTED WITH THE COMMUNITY

Do targeted networking with alumni working in careers of interest by joining the LinkedIn group Queen’s Connects. Check out Career Services networking workshops.

Connect with professors at events hosted by the DSC. Attend the departmental colloquium to learn about current research.

GET THINKING GLOBALLY

Build your intercultural competence by getting involved with other cultures or by practicing or improving your language skills.

Consider attending a 12-16 month QUIP internship

GET READY FOR LIFE AFTER GRADUATION

International students interested in staying in Canada can speak with an International Student Advisor.

Apply to jobs or future education, or make plans for other adventures. Get help from Career Services with job searching resources, including Grad School applications, or other decisions.

2ND YEAR

3RD YEAR

4TH OR FINAL YEAR

What will I learn?

A degree in Physics can equip you with:

- Knowledge of physics theories and mathematical models
- Experience in physics and materials research
- Facility for quantitative mathematical and computational analysis
- Experience with laboratory equipment
- Design experiments and develop and write research proposals
- Review scientific literature
- Draw conclusions from data
- Use statistical software
- Adopt a systematic, analytical approach to problems

Where can I go?

A degree in Physics can take your career in many directions. Many students choose to continue their academic inquiry with a Master’s.

Our students are equipped with a broad foundation for careers in:

- Aerospace
- Astrophysics
- Computer simulations
- Forensic science
- Geophysics
- Imaging
- Nanoscience
- Photonics
- Planetary science
- Quantum Physics
- Radiology
- Remote sensing
- Robotics
- Space science
- Technology industry

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.
Physics

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally. Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified Kingston as one of the GREATEST UNIVERSITY TOWNS in the world – and it is often awarded the safest city in Canada. It is a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America - you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.
