GRADUATE STUDIES in AGING AND HEALTH?

Graduate studies in Aging and Health are offered through innovative programs that provide participants with a comprehensive understanding of aging, with a focus on health and healthy living. Students will develop multi-disciplinary knowledge of individual aging processes, the effect of aging on social systems, and the policies needed to support healthy aging. The program is meant to enhance students' ability to contribute to the development, delivery and implementation of evidence-based care, services, and policies for older adults across a range of settings.

Why QUEEN'S?

The program is full-time and is completed from a distance, through a blended format of online and in-person learning. Intensive on-site sessions introduce students to core courses and e-learning technology, as well as provide an opportunity for in-person interaction with faculty and fellow class members. Elective courses are completed at a distance, online. The blended format of on-site intensives and online components couples networking and experiential opportunities with the flexibility of distance learning.

Queen's University programs in Aging and Health position graduates for success in a variety of settings that serve the growing population of older adults including government, universities and colleges, for-profit and non-profit organizations, business and industry, and various healthcare settings.

Program STRUCTURE

MSc (12 months): Seven term courses (three core and four electives), plus a project.
GDip (8 months): Five term courses (two core courses and 3 electives).

Core COURSES

- Evaluating Aging-Related Programs and Services
- Ethics and Biomedical Ethics of Aging
- Normal Aging Processes

Students in the MSc program will complete a project that develops skills for critical appraisal and integration of evidence to address a defined question related to aging and health.

Visit the Aging and Health website to learn more about the program and its opportunities.
What Will I Learn?

A professional degree in Aging and Health can equip you with:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Ethical approaches to research and practice with older adults
- Time management skills to meet deadlines and manage responsibilities despite competing demands
- Project management skills to develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Independence and experience as a collaborative worker
- Professionalism in all aspects of work, research, and interactions
- Leadership skills to take initiative and lead discussions and influence people.

Where Can I Go?

Queen's University programs in Aging and Health position graduates for success in a variety of settings that serve the growing population of older adults including government, for-profit and non-profit organizations. Potential career opportunities include:

- Program development, implementation, and oversight in community-based or public healthcare organizations;
- Coordination and management roles in for-profit organizations that deliver services or create products for older adults;
- Policy development and analysis related to aging and society;
- Program evaluation for aging and health-related services.

In addition, graduates of this program have taken the knowledge and skills gained in this program back to their own places of employment to contribute to the development of age-sensitive services and practices. Taking time to explore career options while building your experience and networks can help you have a smooth transition to the world of work after graduation.
