Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS

• A Master's degree.

ADDITIONAL REQUIREMENTS

• If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The School of Graduate Studies requires the following minimum scores: TOEFL (paper-based): 550, (2) TOEFL iBT: Writing (24/30), Speaking (22/30), Reading (22/30), Listening (20/30), for a total of 88/120 (applicants must have the minimum score in each test as well as the minimum overall score), or (3) IELTS: 7.0 (academic module overall band score), or (4) PTE Academics: 65.

KEY DATES & DEADLINES

• Application due: February 1st.
• Notification of acceptance: As soon as possible after receiving the full application.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The minimum funding guarantee for Environmental Studies PhD students is $20,000 per year, throughout years 1-4. This basic level of funding is pro-rated based on the duration of study. Your overall financial support will consist of graduate awards, external scholarships, internal fellowships and bursaries, teaching and research assistantships, research grants and/or support from the School of Environmental Studies. We encourage all students to apply for external funding from OGS, SSHRC and other sources. Queen’s will automatically issue a one-time $10,000 award to Doctoral students who have won federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships.

Why GRADUATE STUDIES in ENVIRONMENTAL STUDIES?

The Earth’s environment is stressed, and the search for solutions is anything but simple. Requiring an interdisciplinary approach to problem-solving and education, our program emphasizes the diverse contributions of the natural sciences, humanities, and social sciences to understand and solve environmental problems.

The PhD program meets a growing student demand for post-graduate training relevant to environmental careers in industry, government, and non-governmental organizations. It responds to a strong market in Canada for professionals with environmentally related skills.

Why QUEEN’S?

The PhD program at Queen’s University provides graduate level training in the field of Environmental Sustainability by practicing an interdisciplinary approach to the study of the long-term dynamics, impacts and management of environmental change, the connections between today’s decisions and tomorrow’s wellbeing, and the strong dependence of human progress on environmental quality. This program provides opportunities for joint projects with many disciplines at Queen’s and RMC, government agencies and partnerships with community organizations.

GRAD MAP FOR PhD STUDENTS

Program STRUCTURE

PHD (4 years): seminars, original interdisciplinary research, readings, comprehensive examination, thesis, formal defense.

RESEARCH Areas

• Environmental Chemistry & Toxicology: Analysis of chemicals, their pathways and fates in the environment, their effects on plants, animals, and humans, and remediation options.
• Ecosystem & Human Health: Application of a systems approach to understanding the impact of human activities on climate change, biodiversity, ecosystem functions and human health.
• Society, Culture & Economic Sustainability: Finding solutions to environmental problems and sustainable living involving the investigation of cultural, social and economic systems.

Visit the School of Environmental Studies website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience. Consider meeting with your potential supervisor at departmental events for prospective students. We encourage you to identify a research area of interest and contact a potential supervisor before applying.

Environmental Studies PhD Map

DOCTOR OF PHILOSOPHY (PHD)

YEAR I

ACHIEVE YOUR ACADEMIC GOALS

- Key priorities include completing your comprehensive examination, pursuing substantive research, and writing your research proposal.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Find your way through the academic process with the help of Expanding Horizons.
- Seek experiential/professional development pathways.

YEAR II

- Priorities include completing your comprehensive examination, pursuing substantive research, and writing your research proposal.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Find your way through the academic process with the help of Expanding Horizons.
- Seek experiential/professional development pathways.

YEAR III

- Continue to meet regularly with your supervisor, review research progress, and write your dissertation.
- Check out the GSA Dissertation Boot Camp or Dissertation on the Lake.
- Attend the Expanding Horizons Publishing workshop.
- Take additional training through the Analytical Research Unit (ARU) on chemical analysis techniques or contamination remediation.
- Begin discussion of potential thesis defence.

YEAR IV & TRANSITIONING

- Plan date of thesis submission for examination.
- Present your research to graduate students and faculty or at conferences and work with supervisor to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.
- Discuss career pathways, references letters, and publication options with your supervisor.

WHAT WILL I LEARN?

A graduate degree in Environmental Studies can equip you with valuable and versatile skills, such as:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize, and synthesize large amounts of information
- Time management: meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, and draw and act on conclusions
- Creativity and innovation
- Perseverance
- Independence and experience as a collaborative worker
- Awareness, understanding of sound ethical practices, social responsibility, responsible research and chemical sustainability
- Professionalism in all aspects of work, research, and interactions
- Leadership: initiative and vision leading people and discussion

WHERE CAN I GO?

A PhD in Environmental Studies can take your career in many directions. In Canada, less than 40% of all PhDs will work in post-secondary education – the majority will work in industry, government, or non-profits.

- Environmental protection – water quality, national heritage, wildlife management, parks management, biodiversity conservation, wildlife management
- Conservation and management of natural resources – forestry, energy, aggregates, minerals and metals, natural resources management
- Environmental sustainability – education, monitoring, restoration, communication and public awareness, sustainable development management, policy and legislation

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.
