Why GRADUATE STUDIES in REHABILITATION SCIENCE?

Graduate programs in Rehabilitation Science at Queen’s University stress the multidisciplinary contribution of many health professions and disciplines to rehabilitation. The focus is on understanding how people who experience disability can be enabled to live full and satisfying lives as members of their community, considering a broad range of individual, community and societal factors. Students can expect to be introduced to a broad spectrum of rehabilitation related concerns including function and participation across a wide range of health conditions and disabilities (for example neurotrauma, mental health, intellectual disabilities), policy development, professional education, and interdisciplinary and intersectoral services. The program attracts students from varied backgrounds including occupational therapy, physical therapy, speech-language pathology, kinesiology, psychology, social work, arts & humanities, nursing, education, epidemiology, law, engineering, and others.

Why QUEEN’S?

The School of Rehabilitation Therapy at Queen’s University is committed to leading and inspiring positive changes that transform lives through rehabilitation research, education and practice. As part of this commitment, part of our core mission is to educate rehabilitation scientists who contribute to health and well-being globally through collaboration, creativity, and the discovery of new knowledge. We are recognized nationally and internationally for our excellent faculty, high-quality professional and research programs, and the ways in which our scholarship contributes to the lives of people affected by or at risk of disability.

Program STRUCTURE

MSc (2 years): Required and elective course work, thesis, and oral defense.

RESEARCH Areas

- Human Mobility & Motor Control Across Lifespan
- Disability & Participation
- Workplace Health & Accommodation
- Moving Knowledge into Practice and Policy
- Health Professional Education
- Military and Veteran Health
- Community-Based Rehabilitation

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Rehabilitation Science website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience. This is also an opportunity for you to find out if the faculty member is accepting new graduate students to supervise.

“If you are someone who thrives on developing your quantitative research skills, wants to understand the complexity of qualitative research, or would like to make an impact on our Canadian healthcare system then the Rehabilitation Science program is just for you! [The program] has broadened my scope in terms of the diversity of opportunities available to me – spanning anywhere from working in a traditional research facility conducting clinical trials to focusing my skills in the policy world and making a large scale healthcare change, to addressing barriers to health care and participation in the international context.”

– Kasha Pyka, MSc
2020-2021

WHAT WILL I LEARN?
A graduate degree in Rehabilitation Science can take your career in many directions. Many of our MSc students choose to continue their academic inquiry with a PhD. Our Master’s students are equipped with a strong foundation for careers in:

- Clinical
- Program/Research evaluation
- Academia (research and teaching)
- Agencies (government, not-for-profit, or private) that support clinical care, research, or workforce related to health or disability
- Program development at the local, national or international level
- Policy development
- International community-based rehabilitation

WHERE CAN I GO?
Taking time to explore career options, build networks, and access resources can help you have a smooth transition to the world of work.

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- Honours Bachelor’s degree or equivalent in Occupational Therapy, Physical Therapy, Psychology, Social Work, Kinesiology, Life Sciences or a related field. Contact the program director to discuss how your studies to date may be related to rehabilitation sciences.
- Grade requirements: Upper second-class standing (B+). The entire transcript is reviewed but particular attention is given to your last 20 courses and how well you have progressed throughout your academic career.

ADDITIONAL REQUIREMENTS
- Letter of Intent.
- Current CV including a list of all previous academic awards and publications (both abstracts and full papers).
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The School of Graduate Studies requires the following minimum scores: TOEFL (paper-based): 550, (2) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30), for a total of 88/120 (applicants must have the minimum score in each test as well as the minimum overall score), or (3) IELTS: 7.0 (academic module overall band score), or (4) PTE Academics: 65.

KEY DATES & DEADLINES
- Application due: February 15th.
- Notification of acceptance: Mid April.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

Master’s students in Rehabilitation Science are offered a minimum funding of $7,500 per year.

Apply for external funding from OGS, CIHR/NSERC and other sources. Queen’s will automatically issue a one time $5,000 top-up to Master’s winners of federal government tri-council awards. See the School of Graduate Studies’ information on awards and scholarships for more.
