Application FAQs

What do I need to know to APPLY?

Students must first be admitted to one of the three participating graduate programs and have a thesis supervisor connected with the GeoEngineering Centre. Students must satisfy the admissions, coursework, thesis, and other requirements of the specific program in which they are enrolled.

Students seeking enrolment in the GeoEngineering program must obtain and complete the GeoEngineering enrolment form found at geogeng.ca/EnrollmentForm.htm and return it to the Executive Director of the GeoEngineering Centre at Queen’s-RMC. Applications are accepted at any time and all eligible students are immediately accepted into the program. Students should then register through SOLUS in the GEN640 core course.

What about FUNDING?

For information about funding, please consult with your home department. Full-time students are encouraged to seek external financial support and to apply for funding from NSERC, OGS, ConTec, and other sources.
