**Why GRADUATE STUDIES in GEOLOGICAL SCIENCES?**

Geoscientists and geological engineers interpret the natural world. They bring methods such as geophysics, geochemistry, geobiology and field geology together to understand the modern and ancient Earth. Clues concealed in rocks and minerals, fluids and fossils, mountains and sediments, glaciers and volcanoes are marshaled to understand and explain the Earth system at all scales. Managing water, mineral and energy resources, designing sustainable strategies for infrastructure and industrial growth, and coping with natural and anthropogenic hazards facing increasing global populations, including climate change, all depend on a deep understanding of natural processes.

“Deciding to pursue a PhD in geology at Queen’s has allowed me to conduct original and exciting research, interact with knowledgeable and supportive faculty on a daily basis and form meaningful and long-lasting friendships with other graduate students. It has been a truly rewarding experience.”

– Chris Schuh, PhD

**Why QUEEN’S?**

As a PhD student in Geological Science you are part of one of the most research intensive universities in Canada. Our research program is internationally renowned with a wide range of research activities in all the major specialization areas in geological science.

Students are able to work in first-rate facilities with world-renowned scientists and research engineers, and have opportunities to collaborate with industrial leaders and engage in extensive fieldwork on six continents, making our program truly a world-class experience. Students can also collaborate with other departments at Queen’s, including Mining, Environmental Studies, Chemistry and Biology as well as other institutions like RMC.

**Program STRUCTURE**

PhD (4 years): Thesis. The department has no minimum formal course requirement (beyond the MSc program requirements).

**RESEARCH Areas**

- Economic Geology & Mineral Exploration
- Petrology & Structural Geology
- Sedimentology, Sedimentary Geochemistry & Paleobiology
- Geophysics and Geochronology
- Applied Geoenvironmental Sciences & Geotechnique

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Geological Sciences Department website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience. This is also an opportunity for you to find out if the faculty member is accepting new graduate students to supervise.
# Geological Sciences PhD MAP

**DOCTOR OF PHILOSOPHY (PHD)**

## ACHIEVE YOUR ACADEMIC GOALS

**YEAR I**
- Key priorities include your relationship with your supervisor, forming your committee, coursework, field exams, and language exam.
- Meet early with your supervisor to set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans.
- Look to Student Academic Success Services for a variety of supports.

**YEAR II**
- Priorities include completing your comprehensive examination and pursuing substantive research.
- Write and defend your thesis proposal.
- Find your way through the academic process with the help of Expanding Horizons and the SGS Habitat.
- Set up regular meetings with your supervisor to discuss progress and obstacles to timely completion.
- Seek experiential/professional development opportunities.

**YEAR III**
- Continue to meet regularly with your supervisor, review research progress and write your dissertation.
- Check out the SGS Dissertation Boot Camp or Dissertation on the Lake.
- Use conference presentations to create, discuss, and explore ways to disseminate research findings. Learn from the Expanding Horizons Publishing workshop.
- Begin discussion of potential thesis defense examiners.

**YEAR IV & TRANSITIONING**
- Plan date of thesis submission for examination.
- Present your research at conferences and work with your supervisor to prepare for defence.
- Review submission and examination guidelines.
- Secure necessary oral defence accommodations.
- Discuss career pathways, reference letters, and publication options with your supervisor.

## MAXIMIZE RESEARCH IMPACT

- **YEAR I**
  - Think about audiences for your research.
  - Complete ROMEO online module on research ethics if doing research with living people or sensitive topics.
  - Apply to SSHRC, OGS, and other funding.
  - Attend conferences in your field.

- **YEAR II**
  - Attend or present at a graduate conference.
  - Expand your research audience through social media such as Twitter or a blog.
  - Apply for the Graduate Dean’s Travel Grant for Doctoral Field Research.

- **YEAR III**
  - Continue to present at conferences.
  - Consider participating in the 3 Minute Thesis (3MT) competition.
  - Contact the Queen’s Media Centre for guidance on speaking to news outlets about your work.
  - List yourself on the Arts and Science University Research website.

- **YEAR IV**
  - Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews.
  - Get help from a Career Services workshop.

## BUILD SKILLS AND EXPERIENCE

- **YEAR I**
  - Serve on departmental, faculty or university committees. Talk to the Joliffe Club (graduate student society) for tips on getting involved.
  - Consider positions in student services, the SGS, or media outlets like the Queen’s Journal, CFRC, and the SGS Blog. Look in the AMSC Clubs Directory.
  - Use a Teaching Assistant or Research Assistant position to develop your skills and experience.

- **YEAR II**
  - Hone skills for non-academic employment by continuing involvement on committees and in community.
  - Start keeping a portfolio of your skills, experiences and competencies.
  - For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SGS901 or the PUTL certificate for more professional development in teaching and learning.

- **YEAR III**
  - Do some targeted networking with people working in careers of interest, through QueenConnects on Linkedin, the Queen’s Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.

- **YEAR IV**
  - Consider joining professional associations such as the Geological Association of Canada.
  - Join groups on Linkedin reflecting specific interests and positions.

## ENGAGE WITH YOUR COMMUNITY

- **YEAR I**
  - Consider volunteering with different local community organizations, such as Martin’s Table or Loving Spoonful.

- **YEAR II**
  - Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.

- **YEAR III**
  - Participate in hiring committees and attend job talks. Research academic careers of interest. Craft your CV and job application materials.

- **YEAR IV**
  - Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.

## LAUNCH YOUR CAREER

- **YEAR I**
  - Finding career fit starts with knowing yourself. Take a Career Services career planning workshop or meet with a career counsellor for help. Check out books like So What Are You Going to Do With That? for advice on various career options.
  - Start reading publications like University Affairs and the Chronicle of Higher Education. Browse non-academic labour market websites.
  - Stay on the lookout for special events like Graduate Student Career Fairs to explore your career pathways.

- **YEAR II**
  - Start building your teaching portfolio including student evaluations, and seeking mentorship.
  - Explore different careers of interest by reading alumni profiles on the SGS website, and using QueenConnects on Linkedin to connect with Queen’s alumni, or find alumni in various careers through Ask an Alumni. For more information check out Career Counselling.
  - Investigate requirements for professional positions or other opportunities related to careers of interest.

- **YEAR III**
  - Participate in hiring committees and attend job talks. Research academic careers of interest. Craft your CV and job application materials.
  - Start focusing on non-academic areas of interest. Research organizations of interest and start putting together your resume for potential positions of interest.

- **YEAR IV**
  - Build connections with faculty outside of your department. Pursue interviews for faculty positions and apply for post-doc fellowships and positions.
  - Apply to jobs or make plans for other adventures. Get help from Career Services with job searching, resumes, or interviews.
  - If considering jobs abroad, research possible immigration regulations. If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

---

**WHAT WILL I LEARN?**

A graduate degree in Geological Sciences can equip you with valuable and versatile skills, such as:

- Knowledge and technical skills
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- Creativity and innovation
- Persistence
- Independence and experience as a collaborative worker
- Awareness of understanding of sound ethical practices, social responsibility, responsible research and cultural sensitivity
- Professionalism in all aspects of work, research, and interactions.
- Leadership: initiative and vision leading people and discussion

**WHERE CAN I GO?**

A PhD in Geological Sciences can take your career in many directions. In Canada, less than 40% of all PhDs will work in post-secondary education – the majority will work in industry, government, or non-profits.

Graduates from the Geological Sciences PhD program have found careers in:

- Academia and research
- Mineral and oil exploration
- Mining and hydrocarbon extraction
- Policy analysis
- Surface and underground construction
- Environment assessment
- Protection and rehabilitation
- Resource management

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- MSc in Geological Sciences or Geological Engineering, Mining Engineering or Civil Engineering are acceptable.
- Grade requirements: minimum B average.

ADDITIONAL REQUIREMENTS
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The School of Graduate Studies requires the following minimum scores: TOEFL (paper-based): 550, (2) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30), for a total of 88/120 (applicants must have the minimum score in each test as well as the minimum overall score), or (3) IELTS: 7.0 (academic module overall band score), or (4) PTE Academics: 65.

KEY DATES & DEADLINES
- Application deadline: February 1 for September submissions.
- Notification of acceptance: 4 weeks after the full application has been received.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

The minimum funding guarantee for Geological Sciences PhD students is $23,000 per year for domestic students and $30,000 for international students throughout years 1-4. Research Assistantships are in consultation with the student’s supervisor.

We encourage all students to apply for external funding from OGS, NSERC and other sources. Queen’s will automatically issue a $10,000 award to incoming PhD students who have won federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships.

Graduate Studies FAQs

How do I use this map?

Whether you are considering or have embarked on graduate studies at Queen’s, use this map to plan for success in five overlapping areas of your career and academic life. The map helps you explore possibilities, set goals and track your individual accomplishments. Everyone’s journey is different – the guide offers options for finding your way at Queen’s and setting the foundation for your future. To make your own customized map, use the online My Grad Map tool.

Where can I get help?

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming environment offers the programs and services you need to be successful, both academically and personally. Check out the SGS HABITAT for available resources.

What is the community like?

At Queen’s, graduate students from all disciplines learn and discover in a close-knit intellectual community. You will find friends, peers and support among the graduate students enrolled in Queen’s more than 130 graduate programs within 50+ departments & research centres. With the world’s best scholars, prize-winning professional development opportunities, excellent funding packages and life in the affordable, historic waterfront city of Kingston, Queen’s offers a wonderful environment for graduate studies. Queen’s is an integral part of the Kingston community, with the campus nestled in the core of the city, only a 10-minute walk to downtown with its shopping, dining and waterfront. For more about Kingston’s history and culture, see Queen’s University’s Discover Kingston page.
