Why GRADUATE STUDIES in TRANSLATIONAL MEDICINE?

The new and innovative Doctor of Philosophy (PhD) in Translational Medicine is a unique research-based graduate program. The program provides students with a fresh perspective, offering a curriculum interweaving graduate level research with authentic clinical experiences in a multidisciplinary environment across departments at Queen’s University.

Combining the fields of medicine and research, this program links graduate level research skills with a variety of clinical experiences including patient interactions, clinical observerships and medical rounds to enhance professional thinking and action. This innovative curriculum will offer important foundation work for future careers in the biomedical field, and will provide critical skills for pursuing careers that include clinician scientists, biomedical researchers, leaders in industry and public health and/or health policy.

What is TRANSLATIONAL MEDICINE?

Translational Medicine is driven by our patients and their diseases. Guided by this primary focus, translational research spans across the spectrum from molecular and cell biology to preclinical models to patient studies and back again (see Figure). Our programs aim to train the next generation of researchers to be effective translators of biomedical discovery. Our graduates will operate at the intersection of clinical and related sciences and will have the expertise to generate and lead discovery through an integrated process, increasing the efficiency of translating science knowledge into health improvement.

Program STRUCTURE

The PhD in Translational Medicine is a 4-year research-based program, which requires the completion of 12-credit courses (3 core courses, 3-credit electives), a comprehensive exam, and a thesis.

The PhD in Translational Medicine has the same coursework requirements such that students who have completed the MSc in Translational Medicine will be granted advanced standing and have no further coursework to complete thus providing an accelerated route to PhD completion.

Core COURSES

- TMED 800* Translational Medicine
- TMED 801 Profession of Medicine
- TMED 802 Research Success Skills

Elective COURSES (Pick 3 credits)

- TMED 811 Next Generation Sequencing (1 credit)
- BMED 862 Cellular Techniques (1 credit)
- BMED 865 Imaging Analysis (1 credit)
- BMED 869 Reproduction (1 credit)
- BMED 809* Principles and Drug Discovery and Development
- BMED 811* Advanced Molecular Biology
- NSCI 844* Controversies in Neuroscience
- EPID 803* Public Health System in Canada
- EPID 810* Controlled Clinical Trials
- PATH 822* Experimental Cancer Therapeutics
- PATH 826* The Molecular Basis of Disease

* = Courses that are one term in length. Courses are 3 credits unless otherwise stated. Additional existing courses may be approved by the program director and students' supervisor, depending on the research interests of the students.

Program HIGHLIGHTS

- Build on your academic education or enhance your career with advanced knowledge and skills
- Learn about translational medicine from an interdisciplinary perspective with authentic clinical experiences
- Experience team-based learning with other students
- Network with students, alumni, and leaders in this emerging field
- Complete a supervised project on a topic of your choice

Translational Medicine
### Translational Medicine PhD Map

**DOCTOR OF PHILOSOPHY (PhD)**

#### Year I
- **Achieve Your Academic Goals**
  - Start with key priorities like scheduling an initial meeting or meetings with your supervisor, forming your committee, and doing your coursework (if applicable).
  - Set expectations and discuss roles, responsibilities, program requirements, resources, research/occupational goals, timelines, and any required accommodation plans with your supervisor.
  - Look to Student Academic Success Services for a variety of supports.
  - Complete TP2 CORE online module on research ethics if doing research with living people or sensitive topics.

#### Year II
- **Maximize Research Impact**
  - Think about audiences for your research.
  - Apply for external funding after discussion with supervisors about appropriate granting agencies.
  - Attend conferences in your field.

- **Build Skills and Experience**
  - Serve on departmental, faculty or university committees. Talk to the SGPS for tips on getting involved.
  - Consider positions in student services, the SGPS, or media outlets like the Queen's Journal, CFRC, and the SBS Blog. Look in the AMS Clubs Directory.
  - Check out professional development workshops from Expanding Horizons and the Department of Medicine.

- **Engage with your Community**
  - Explore how you can connect with your community through experiential opportunities on- and off-campus.
  - Consider volunteering with different community organizations, such as the Kingston Health Sciences Centre, Queen's Cancer Research Institute or KFL&A Public Health.
  - Consider joining appropriate professional associations in your field.

#### Year III
- **Continue to research and write your dissertation. Check out the SGS Dissertation Boot Camp or Dissertation on the Lake.**
- **Investigate requirements for professional positions or post-doc fellowships.**
- **Secure necessary oral defence accommodations.**
- **Plan date of thesis submission for examination.**
  - Present your research to graduate students and faculty or at conferences and work with supervisor to prepare for defence.
  - Review submission and examination guidelines.
  - Secure necessary oral defence accommodations.
  - Defend your thesis and submit to the OIPace.
- **Continue to attend conferences and connect with scholars in your field and with community partners.**
- **Continue public outreach through social media and the Queen's Media Centre.**
- **Set up a meeting with the School of Graduate Studies for a Grad Chat to discuss your research interests.**
  - Practice articulating the skills you have been developing in settings outside the university, such as casual conversations, networking, and interviews. Get help from a Career Services workshop.

#### Year IV & Transitioning
- **Continue targeted networking with people working in careers of interest, through Queen'sConnects on LinkedIn, the Queen’s Alumni Association, professional associations, and at conferences.**
  - Get help from a Career Services workshop.
  - Do some targeted networking with people working in careers of interest through Queen'sConnects on LinkedIn, the Queen’s Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
  - Continue targeted networking with people working in careers of interest. Join groups on LinkedIn reflecting specific careers or topics of interest in translational medicine, biomedical science, public health, and health policy.

**What Will I Learn?**
A graduate degree in Translational Medicine can equip you with valuable and versatile skills, such as:
- **Knowledge and technical skills**
- **Effective communication skills** in multiple forms for diverse audiences
- **Information management:** prioritize, organize and synthesize large amounts of information
- **Time management:** meet deadlines and manage responsibilities despite competing demands
- **Project management:** develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- **Creativity and innovation**
- **Perseverance**
- **Independence and experience as a collaborative worker**
- **Awareness:** an understanding of sound ethical practices, social responsibility, responsible research and cultural sensitivity
- **Professionalism in all aspects of work, research, and interactions**
- **Leadership:** initiative and vision leading people and discussion

**Where Can I Go?**
A PhD degree in Translational Medicine can take your career in many directions. Our students are equipped with a strong foundation for careers such as:
- **Medicine**
- **Post-doctoral fellowships or academia**
- **Public Health and Health Policy**
- **Health research (research associates in universities, hospitals, government, public health units)**

Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
• A master’s degree from a recognized university with a minimum of an A- average. At Queen’s an A- is equivalent to a percentage conversion of 80-84.9% and a Grade Point Average of 3.7 (out of 4.3).

ADDITIONAL REQUIREMENTS
• Applications for admission are completed and submitted on the School of Graduate Studies website, including an online application form and specific instructions regarding how to submit the following documents:
  • A Statement of Interest about how applicants’ background experiences and career aspirations make them ideally suited for the program (up to 4000 characters in the online application);
  • Transcripts for all postsecondary education;
  • Two references from individuals familiar with the applicant’s academic performance
• Applicants are required to submit an electronic resumé/curriculum vitae to tmed@queensu.ca.

LANGUAGE REQUIREMENTS
• In cases where English is not the first language, nor was the language of instruction in undergraduate studies, applicants must demonstrate English language proficiency. Those applicants will need to provide proof of English language proficiency through one of the following:
  • International English Language Testing System (Academic module) with a minimum score of 7 in each component, or
  • TOEFL iBT with a passing score of 93 including a minimum score of 24 on the speaking section.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

We offer our PhD students a minimum funding of $23,000 per year for four years.

Apply for external funding from OGS, CIHR/NSERC and other sources. Queen’s will automatically issue a $5,000 top-up to Master’s winners of federal government tri-council awards. See the School of Graduate Studies’ information on awards and scholarships for more.
