Why GRADUATE STUDIES in CHEMISTRY?

A degree from Queen's Department of Chemistry is highly regarded and an important consideration in today's competitive science and technology job market. Our $56 million state of the art building is home to the Nuclear Magnetic Resonance facility and its eight high-field instruments, an on-site Mass Spec facility with four mass spectrometers, an X-ray diffractometer, a CFI-funded facility for materials characterization and more unique equipment in faculty labs.

Why QUEEN'S?

Queen's University and the Department of Chemistry enjoy international reputations. With 27 award-winning faculty, and over 130 graduate students, post-doctoral fellows and research associates performing cutting-edge research in a multitude of areas, you will find this an exciting place to do research. Research is performed in the areas of analytical, inorganic, organic, physical, polymer, and theoretical chemistry. Research in these areas ranges from the most fundamental to very applied. A unique opportunity to obtain dual degrees from Queen's University and the University of Stuttgart, Germany.

“Within the Stuttgart/Queen's double Master's program I had the opportunity to conduct research at two different institutions and make valuable connections.”

- Matthias Hermann, MSc

Program STRUCTURE

MSc (2 years): course work and thesis.

Current Queen's undergraduate chemistry students entering their 4th year and have a A- (A minus) average may apply for an Accelerated Masters (https://www.chem.queensu.ca/undergraduate/accelerated-msc-program).

Students who show exceptional promise in their research have the option to promote to the PhD program in their second year.

“A Master's in Chemistry is a versatile degree that has provided me with the analytical and critical thinking skills that are requisite to success in my future career as a lawyer”

- Kasia Donovan, MSc

RESEARCH Areas

- Analytical/Environmental
- Biological
- Inorganic/Organometallic
- Materials/Polymer
- Organic
- Physical
- Theoretical/Computational

We encourage you to identify an area of research interest and contact a potential supervisor before applying.

Visit the Chemistry Department website to read faculty profiles and learn more about faculty members’ research areas. When you find a faculty member with similar research interests to yours, contact him/her and tell them about your interest in graduate work and related experience. This is also an opportunity for you to find out if the faculty member is accepting new graduate students to supervise.

The coronavirus pandemic may impact how some activities are delivered in 2020-2021. Please check directly with the host of any activity on the map for the latest information.

**WHAT WILL I LEARN?**
A graduate degree in Chemistry can equip you with:
- Knowledge and Technical Skills
  - Chemical synthesis
  - Spectroscopic characterization
  - 3D printing/rapid prototyping
  - Mass spectrometry analysis
  - Experimental design
  - Molecular modelling
- Communications
  - Manuscript writing
  - Conference oral presentation
  - Poster presentation (graphic)
  - Scientific patent writing/patent protection
- Business skills in chemical industry
  - Leadership and Collaboration
  - Grant writing, problem solving
- Leadership and Collaboration
  - Committee participation
  - Supervision of junior researchers
  - Industrial engagement
  - Research with international experts/partner

**WHERE CAN I GO?**
A Master's degree in Chemistry can take your career in many directions. Many of our MSc students choose to continue their academic inquiry with a PhD. Our Master's students are equipped with a strong foundation for careers in:
- Quality Control Chemist
- Doctoral Studies
- Forensic Scientist
- Environmental Law
- Patent Law
- Food Scientist
- Biochemistry
- Consumer Protection
- Pharmaceutical Chemist
- Materials Scientist
- Petroleum Engineer
- Chemical Education (University, College, Secondary/Primary)
- Quality Control Chemist

**GETTING STARTED**
- Start with key priorities like developing your relationship with your supervisor, forming your committee, and doing your coursework.
- Complete WHMIS safety training.
- Find your way through the academic process with help from departmental and Expanding Horizons professional development workshops, the department Grad Chair and the SGS Habitat.

**INTERMEDIATE STAGE**
- Complete your coursework, begin to research and write your thesis.
- Complete your annual Research Progress Reports.
- Consider attempting the PhD Candidacy/Comprehensive Exam for promotion to the PhD program.

**WRAPPING UP**
- Complete and defend your thesis (CHEM 899).
- Consider publication options for your research.
- Attend a major conference in your field, such as the MicroTAS, the ICP National Meeting, or the American Chemistry Society.
- Consider participating in the 3 Minute Thesis (3MT) competition and attend the weekly seminar series (CHEM 802).
- Expand your research audience through social media such as Twitter or a blog. Conduct research at an International Collaborative University (i.e. Stuttgart, Nagoya, Ptoles).
- Consider participating in the Cancer Research Conference.
- Set up a meeting with the School of Graduate Studies for a Grad Chat to discuss your research interests.
- Consider putting an article in The Conversation.
- Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Check out opportunities for extra training through CTL, Expanding Horizons, MicroTAS, or other sources to boost your skills.
- Take advantage of the state-of-the-art research facilities, which feature NMR, mass spectrometry, X-ray diffractometer, a laser lab, and more.
- Do some targeted networking with people working in careers of interest, through Queen’s Alumni, Queen’s Connects, or other sources to boost your skills.
- Consider joining professional associations like the Canadian Society for Chemistry or the American Chemical Society.

**MAXIMIZE RESEARCH IMPACT**
- Start to think about the audiences for your research.
- If you will be continuing graduate studies, apply for NSERC and OGS funding.
- Consider positions in student services, the SGS, or media outlets like the Queen’s Journal, CFR, and the SGS Blog. Look in the AMS Clubs, Directory for more ideas.
- Serve on departmental, faculty or university committees.
- Check out professional development workshops from Expanding Horizons.

**BUILD SKILLS AND EXPERIENCE**
- Explore how you can connect with your community through experiential opportunities on and off-campus.
- Consider volunteering with different community organizations, museums, and cultural studies groups, such as Science Rendezvous, Let’s Talk Science, or Women in Science & Engineering (WISE).
- Take part in events put on by the Queen’s Chemistry Innovation Council.
- Consider judging local and regional science fairs.

**ENGAGE WITH YOUR COMMUNITY**
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUIC and FDSC.
- If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

**LAUNCH YOUR CAREER**
- Finding a career that fits starts with knowing yourself. Get help by taking a Career Services workshop or meeting with a career counselor. Check out books like So What Are You Going to do With That? or Planning a Scientific Career in Industry for more information.
- Check out Queen’s Connects on LinkedIn to connect with Queen’s alumni. Check out Career Cruising for more information.
- If you are considering a PhD, explore programs of interest reach out to faculty, and apply to PhD programs and external scholarships.
- Participate in hiring committees and attend job talks. Start focusing on areas of interest. Research organizations of interest and start putting together your CV or resume for potential positions of interest. Get help from Career Services with job searching, resumes, and interviews.
- Taking time to explore career options, build experience, and network can help you have a smooth transition to the world of work after graduation.
Graduate Studies FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS
- 4 year Honour’s degree in Chemistry or a related science, including Biochemistry, Chemical Physics, Materials Science, or Chemical Engineering.
- Grade requirements: minimum upper second class standing (B+ average).

ADDITIONAL REQUIREMENTS
- Correspond with potential supervisors.
- Two official transcripts for all post-secondary studies
- Two Letters of Recommendation
- Curriculum Vitae
- If English is not a native language, prospective students must meet the English language proficiency requirements in writing, speaking, reading, and listening. The School of Graduate Studies requires the following minimum scores: TOEFL (paper-based): 550, (2) TOEFL iBT: Writing (24/30); Speaking (22/30); Reading (22/30); Listening (20/30), for a total of 88/120 (applicants must have the minimum score in each test as well as the minimum overall score), or (3) IELTS: 7.0 (academic module overall band score), or (4) PTE Academics: 65.

KEY DATES & DEADLINES
- Application due: February 1st for international applicants; Flexible deadline for domestic applicants.
- Notification of acceptance: Domestic students are notified on an ongoing basis as their applications are reviewed. International students are notified at the end of March.

Before you start your application, please review the Graduate studies application process.

What about FUNDING?

M.Sc. students in Chemistry receive minimum funding of $25,490 per year. Many students are awarded scholarships and awards, which allow them to exceed this level of income.

The funding package may comprise of graduate awards, research fellowships, and research and/or teaching assistantships.

Apply for external funding from OGS, NSERC and other sources. Queen's will automatically issue a one time $5,000 top-up to Masters winners of federal government tri-council awards. For more information, see the School of Graduate Studies’ information on awards and scholarships, or see what awards are offered through the Chemistry Department.
