Society has become more aware of the seriousness of the environmental problems we face. Yet, at the same time, we have realized that the solutions are not simple. To work towards environmental sustainability, people need to understand the multi-disciplinary nature of environmental problems. They need to have expertise in planning, policy and many other fields in addition to scientific principles to deal with the social, economic and cultural complexities that surround environmental issues.

Graduates of this program can pursue jobs in the private sector, government, and non-government organizations, as well as post-graduate studies.

Interdisciplinary training leads to opportunities in research, consulting, policy development and projects working on specific problems.

Many will continue to professional degrees in law, planning, business and public administration.

Acquire Skills. Gain Experience. Go Global. That is a degree from Queen’s.
queensu.ca/ensc
In first year you will take Environment and Sustainability, and you’ll have the chance to explore the foundations of Environmental Science in biology, geography and geology along with some electives.

Attend Majors Night in the Winter term to learn more about Plan options.

Join teams or clubs on campus such as the Earth Centre or Queen’s Backing Action on Climate Change. See Queen’s Sustainability webpage, the AMS Clubs Directory or the Queen’s Get Involved page for more ideas.

Volunteer on or off-campus with different community organizations.

Prepare for work or studies in a multi-cultural environment by taking QUIC’s Intercultural Competency Certificate, and research possible immigration regulations.

Grappling with program decisions? Go to Majors Night or get some help wondering about career options from Career Services.

Start going deeper into the discipline of Environmental Science, while considering a minor and/or certificate such as Global Action and Engagement. Attend Degree + in the Fall term to learn more about Certificates and Internship options.

Look into summer jobs by talking to the dept. or Career Services about work through SWEP or Work-Study.

Get involved with the Departmental Student Council (DSC).

Is an exchange in your future? Start thinking about where you would like to study abroad. Apply in January for a third year exchange through the International Programs Office.

Explore different careers of interest by reading books in the Career Services Information Area, such as Career Opportunities in Conservation and the Environment.

If interested, apply for an Undergraduate Student Summer Research Fellowship (USSRF).

Build your involved improvising

Think about Internship Opportunities abroad related to Environmental Studies.

Start focusing on areas of interest. Research education requirements for careers of interest. If needed, prepare to take any required tests (like the LSAT or GMAT) and get help thinking about Grad School from Career Services. Check out what some of our grads are doing at our website.

Visit careers.queensu.ca/majormaps for the online version with links!
A chance to start grouping courses in areas of interest, or to keep it more general and explore many areas of Environmental Science. Meet with Academic Advisor to make sure you are on track and have planned out your courses for next year.

In fourth year you will have the chance to participate in research-based courses that can lead to Graduate School or to your future career path. Make sure to finish up all your courses for your major and your optional minor and/or certificate(s).

What will I learn?
A degree in Environmental Studies can equip you with:

- Interdisciplinary perspective to understand environmental topics from a scientific, philosophical and ethical point of view
- Understand natural and human factors related to environmental problems
- Knowledge of local, national, and global environmental problems and issues
- Analytical skills to analyze data for trends and apply statistical tests
- Ability to interpret data from scientific experimentation and make conclusions based on research
- Critical thinking to form, defend, and evaluate arguments and propose solutions
- Oral and written communication to create reports and give presentations
- Teamwork to work as a team on a long-term project
- Resource and time management

Where can I go?
A degree in Environmental Studies can take your career in many directions. Many students choose to continue their academic inquiry with a Master's or professional degree. Our students are equipped with a strong foundation for careers in:

- Policy and planning
- Environmental assessment
- Environmental conflict resolution
- Resource management
- Meteorology
- Parks and natural reserves
- Transportation
- Waste management
- Water policy and governance

Taking time to explore career options, build experience and network can help you have a smooth transition to the world of work after graduation.

*This map is intended to provide suggestions for activities and careers, but everyone's abilities, experiences, and constraints are different. Build your own Major Map using our online My Major Map tool.*
Environmental Studies

MAJOR MAP

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally. Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified Kingston as one of the GREATEST UNIVERSITY TOWNS in the world – and it is often awarded the safest city in Canada. It is a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.

We’re closer than you think.
