Study social issues and how our society responds to these issues, while asking questions drawn from economic, political and philosophical perspectives. Society faces challenges that are complex and multi-dimensional, and our efforts to tackle these challenges require us to bring complementary intellectual skills together using multi-disciplinary analytical and critical approaches. This program combines Economics, Philosophy and Politics in ways to prepare students to enter graduate studies in areas of law, public service, international development, policy design and analysis, or any other career that calls for strong analytical and communication skills.
