Sociologists investigate how societies work. We study social life at every level, from personal relationships to the functioning of institutions and nations, right up to global interconnections. Our department is widely known for its strengths in criminology and the law, media (informational and surveillance), and social inequalities and social justice. Studying Sociology at Queen’s will help you understand the structures and dynamics of societies and the complex effects they have on human behaviour, public issues, everyday life, politics, and culture.
