Statistics

Statistics is the science of designing informative experiments, of displaying and analyzing data, and of drawing valid conclusions from data. There is great demand for those who understand and can apply statistics effectively. Knowledge of statistical methods is useful to scientists and engineers, and to others working in government, research, industry, and medicine. Statistics can also be studied as a subject in its own right.

Alumni Jobs

9% of alumni work in Pharmaceuticals

15% of alumni work in Insurance

18% of alumni work in Banking, Investment

21% of alumni work in Education

Top 5 REASONS to study Mathematics

1. Mathematical thinking develops logical reasoning skills that will help in analyzing ‘real-world’ problems.

2. According to Galileo, mathematics is the language of science and hence essential for all scientific study.

3. Our digital age requires training in the STEM subjects, of which mathematics is an essential part.

4. Mathematics develops the imaginative faculty and has the aesthetic quality of the humanities.

5. Mathematics teaches skills and insights needed to succeed in the ever-changing workplace.

OPEN PENDING LIST

Rhodes Scholar Nithum Thain completed his BScH in Math, scoring a perfect GPA while being the captain of the fencing team at Queen’s, where he won two provincial gold medals. He has enjoyed a wide range of professional opportunities – starting off at Empire Avenue as the VP of Research, working on the algorithms that ran their online gaming platform, and followed by working as a Business Development Analyst at createLIVE.

That is a degree from Queen’s.
2020-2021
Statistics MAJOR MAP *

BACHELOR OF SCIENCE (HONOURS): MAJOR, MINOR

GET THE COURSES YOU NEED

1ST YEAR
In first year you will have the chance to explore the foundations of Statistics along with some electives. Attend Majors Night in the Winter term to learn more about Plan options.

2ND YEAR
Start going deeper into the discipline of Statistics, while considering a minor and/or certificate such as Geographic Information Science. Attend Degree + in the Fall term to learn more about Certificates and Internship options.

3RD YEAR
A chance to start grouping courses in areas of interest, or to keep it more general and explore many areas of Statistics. Meet with an Academic Advisor to make sure you are on track and have planned out your courses for next year.

4TH OR FINAL YEAR
In fourth year you will have the chance to participate in research-based courses that can lead to Graduate School or to your future career path. Make sure to finish up all your courses for your major and your optional minor and/or certificate(s).

GET RELEVANT EXPERIENCE

Join teams or clubs on campus such as the Queen’s Math Club, Putnam team, and the Math Investigations Program. See the AMS Clubs Directory or the Queen’s Get Involved page for more ideas.

Look into summer jobs by talking to the dept. or Career Services about work through SWEP or NSERC. Take more responsibility within different clubs or extracurriculars.

Consider applying to do a 12-16 month QUIP internship between your third and fourth year. Consider entrepreneurial opportunities via programs like the Queen’s Innovation Connector Summer Initiative (QICSI).

GET CONNECTED WITH THE COMMUNITY

Volunteer on or off campus with different community organizations such as Best Buddies.

Get involved with the Mathematics and Statistics Departmental Student Council (DSC).

Do targeted networking with alumni working in careers of interest by joining the LinkedIn group Queen’s Connects. Check out Career Services networking workshops. Connect with professors at events or workshops hosted by the DSC.

Consider joining professional associations like the Canadian Applied and Industrial Mathematics Society, the Canadian Mathematical Society, and the Statistical Society of Canada. Join groups on LinkedIn reflecting specific careers or topics of interest in Mathematics.

GET THINKING GLOBALLY

Prepare for work or studies in a multi-cultural environment by taking QUIC’s Intercultural Competency Certificate, and research possible immigration regulations. Speak to a QUIC advisor to get involved in their programs, events, and training opportunities.

Is an exchange in your future? Start thinking about where you would like to study abroad. Apply in January for a third year exchange through the International Programs Office. Apply for the Math in Moscow Scholarship or the Budapest Semesters in Mathematics.

Build your intercultural competence by getting involved with other cultures or by practicing or improving your language skills.

GET READY FOR LIFE AFTER GRADUATION

Grappling with program decisions? Go to Majors Night or get some help wondering about career options from Career Services.

Explore different careers of interest by reading books in the Career Services Career Advising and Resource Area, such as the Great Jobs for Math Majors. For more information check out Career Cruising or by finding and connecting with alumni on LinkedIn.

Start focusing on areas of interest. Research any further education requirements for careers of interest. If needed, prepare to take any required tests (like the LSAT or GMAT) and get help thinking about Grad School from Career Services.

What will I learn?
A degree in Statistics can equip you with:
• Logical reasoning and problem solving to apply analytical and critical reasoning to solve problems
• Ability to solve problems by applying analytical and critical reasoning
• Understand strong evidence to produce trustworthy data and provide mathematical evidence for conjectures and generalizations
• Knowledge of a broad range of mathematical fields and methods
• Ability to create mathematical models
• Pattern recognition to explore examples and recognize patterns
• Persistence to approach problem solving with openness and a willingness to try multiple approaches
• Ability to work independently and in a team on a project
• Oral and written communication to communicate quantitative ideas with clarity and coherence through writing and speaking

Where can I go?
A degree in Statistics can take your career in many directions. Many students choose to continue their academic inquiry with a Master’s. Our students are equipped with a strong foundation for careers in:

• Accounting
• Aerospace
• Auditing
• Banking
• Cryptanalyst
• Data scientist
• Financial analysis
• Mathematician
• Risk analyst
• Survey researcher

Taking time to explore career options, build experience and network can help you have a smooth transition to the world of work after graduation.

Visit careers.queensu.ca/majormaps for the online version with links!

* This map is intended to provide suggestions for activities and careers, but everyone's abilities, experiences, and constraints are different. Build your own Major Map using our online My Major Map tool.
How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified us as one of the GREATEST UNIVERSITY TOWNS in the world – and is often awarded the safest city in Canada.

We are a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.
