Get to know ENGINEERING CHEMISTRY

In existence since 1895, the Engineering Chemistry program is renowned for producing graduates that have a firm grasp of fundamental science as well as the engineering tools that are needed to put this knowledge into practice. Accreditation by the Canadian Engineering Accreditation Board (CEAB) as an engineering program, and the Canadian Society for Chemistry (CSC) as a chemistry program, allows graduates to pursue professional careers in both disciplines - a truly unique benefit of an Engineering Chemistry degree.

The curriculum will provide you with the in-depth understanding of organic, physical and analytical chemistry that is needed for early-stage design activities, when knowledge of basic principles is needed to create and/or advance new technology. The extensive training you acquire in core engineering principles such as fluid mechanics, thermodynamics and engineering economics will ensure that you can contribute equally well to late-stage design activities that involve detailed equipment specifications and financial analyses.

Degree OPTIONS

Bachelor of Applied Science in Engineering Chemistry
Bachelor of Applied Science in Engineering with Professional Internship

Queen’s ADMISSIONS

Students apply to Queen’s Engineering (QE) through the OUAC (Ontario University Application Centre) website. Secondary School prerequisites include five 4U and 4M courses, one of which must be English 4U. Calculus and Vectors 4U, Chemistry 4U, and Physics 4U are all required along with one of Advanced Functions 4U, Biology 4U, Data Management 4U, Computer Science 4U, Earth and Space Science 4U. A final grade of 70% must be obtained in English 4U. Applicants outside of Ontario may have additional requirements.

A Common START

Queen’s is unique in offering a common First Year along with an open discipline choice. When you do choose your program, you don’t have to worry about caps or quotas. Provided you pass all of your First Year courses, you are guaranteed a place in your engineering program of choice.

Course HIGHLIGHTS

The Engineering Chemistry curriculum combines chemistry and applied science courses, several of which are designed specifically for the program. These include:

- Thermodynamics of Energy Conversion Systems
- Electrochemical Engineering
- Applied Surface and colloid science
- Design of Manufacturing Processes
- Organic Process Development
- Quantum Mechanics
- ChemEtronics
- 4th Year Independent Research Thesis

“Trained in both pure and applied chemical sciences, Engineering Chemists are well positioned to address some of society’s most important technological challenges.”

That is a degree from Queen’s.

chemeng.queensu.ca
**Engineering Chemistry**

**BACHELOR OF APPLIED SCIENCE | BACHELOR OF APPLIED SCIENCE WITH PROFESSIONAL INTERNSHIP**

**1ST YEAR**

Queen's Engineering first year is common – courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing and Earth Systems Engineering.

Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focusing on problem solving, experimentation principles and finishing off with a team-based engineering project.

Discipline selection will take place in February!

**2ND YEAR**

You will take the second EDPS course – APSC200.

**3RD YEAR**

You will also choose 3 units of Electives and must select one of the Engineering Economics courses.

**4TH OR FINAL YEAR**

Courses include: Applied Surface & Colloid Science, Quantum Mechanics, Design of Manufacturing Processes, and Electrochemical Engineering. Additionally, you will take a laboratory projects course and your 4th year Research Project course.

You will also choose at least 15 units of Electives, and you are set to graduate!

**GET THE COURSES YOU NEED**

- Visit careers.queensu.ca/majormaps for the online version with links!
- Get involved with the Engineering Society (ENG-SOC). Attend conferences like the Conference on Industry and Resources Queen’s University Engineering and the Queen’s Engineering Competition.

**GET RELEVANT EXPERIENCE**

- Join teams or clubs on campus such as the Solar Design Team (SODT), Fuel Cell Team (QFCT), or the Queen’s Engineering and Commodities Association (QEECA).
- Look for first year positions in ENG-SOC such as First Year Project Coordinators (FYPCOs). See the AMS Clubs Directory or the Queen’s Get Involved page for ideas.

**GET CONNECTED WITH THE COMMUNITY**

- Volunteer on or off campus with different community organizations, such as ENG-SOC EngWeek Committee, the ENG-SOC External Relations Committee or a local charity like Martha’s Table.

**GET THINKING глобАЛЬНО**

- Speak to a QUCI advisor or get involved in their programs, events and training opportunities.
- Prepare for work or studies in a multi-cultural environment by taking the QUCI and Four Directions Aboriginal Student Centre’s Training Certificate, and research possible immigration regulations.

**GET READY FOR LIFE AFTER GRADUATION**

- Grappling with program decisions? Go to the Orientation Evenings held by different Engineering departments and attend the various Career Fairs during the year.
- Get some help deciding by visiting Career Services.

Visit careers.queensu.ca/majormaps for the online version with links!

**Employability skills**

Your time at Queen’s will give you valuable skills to boost your employability, including:

- Knowledge of chemistry and materials at a molecular level
- Knowledge of chemical engineering theory and methods
- Problem solving – adopt an analytical approach to problems facing chemists and chemical engineers
- Written and oral communication – communicate research ideas and information in reports and presentations
- Ability to use modern computer software tools for simulating and analyzing chemical processes
- Proficiency in mathematics
- Understanding of scientific research methods and data collection techniques
- Time and resource management
- Ability to work independently and in teams
- Sustainability and impact of engineering on society

**Where could I go after graduation?**

- Agricultural sciences
- Alternative energy technology
- Biomedical engineering
- Chemical/process engineering
- Consulting engineers
- Environmental engineering
- Food science and technology
- Forensic science
- Fuels and petrochemicals
- Mineral Processing
- Occupational health and safety
- Patent law
- Pharmaceuticals
- Polymer/rubber/plastic technology
- Public and private research

Taking time to explore career options, build experience, and network can help you have a smoother transition to the world of work after graduation. Further career may require additional training. Listed careers are only suggestions.

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified us as one of the GREATEST UNIVERSITY TOWNS in the world – and is often awarded the safest city in Canada. We are a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.

For more information, contact quip@queensu.ca or visit the Program Website.
