Computer Engineering

Get to know COMPUTER ENGINEERING

The information and communication technology of our knowledge-based society places computer engineers at the hub of a computing revolution that is constantly changing the way people live and work. In this program, you will study circuits, electronics, digital systems, microprocessors, computer architecture, data structures, algorithms, computer networks, operating systems, and software specification and development. You may choose to specialize in computer hardware, computer systems, software engineering, or mechatronics streams of specialization, and complement your core knowledge with advanced topics in electrical and computer engineering.

Degree OPTIONS

Bachelor of Applied Science in Engineering

Bachelor of Applied Science in Engineering with Professional Internship

Specialization in Computer Hardware / Computer Systems / Software Engineering / Mechatronics

Queen’s ADMISSIONS

Students apply to Queen’s Engineering (QE) through the OUAC (Ontario University Application Centre) website. Secondary School prerequisites include five 4U and 4M courses, one of which must be English 4U. Calculus and Vectors 4U, Chemistry 4U, and Physics 4U are all required along with one of Advanced Functions 4U, Biology 4U, Data Management 4U, Computer Science 4U, Earth and Space Science 4U. A final grade of 70% must be obtained in English 4U. Applicants outside of Ontario may have additional requirements.

A Common START

Queen’s is unique in offering a common First Year along with an open discipline choice. When you do choose your program, you don’t have to worry about caps or quotas. Provided you pass all of your First Year courses, you are guaranteed a place in your engineering program of choice. Queen’s also offers Section 900, a special extended program for students struggling with First Year courses. Take things at a slower pace and recover in time for Second Year.

Course HIGHLIGHTS

Computer Engineering students have the opportunity to take a wide range of technical courses to help prepare them for the many possible career destinations available. Such courses include:

- Computer Vision
- Artificial Intelligence
- Machine Learning
- Advanced User Interface Design
- Advanced Database Systems
- Software Requirements
- Computer System Architecture

ECEi - INNOVATION STREAM

Consider Queen’s Electrical & Computer Innovation Stream, focused on developing entrepreneurial skills, alongside the in-depth, world-class technical education that is the hallmark of Queen’s Engineering. Students apply directly from OUAC with admission requirements for ECEi being the same as QE.

With admission limited to 50 students, you will receive an enriched curriculum that builds on Engineering’s common first year, participate in team-based learning that focuses on product development and prototype demonstration, and network with like-minded students and present your unique ideas. If you pass all of your first year courses you are guaranteed a place in 2nd year in either the Electrical Engineering Innovation (EEi) stream or Computer Engineering Innovation (CEi) stream.

“Our undergraduate faculty-to-student ratio is among the highest in the country and translates to a very direct and personal educational experience for our students.”

That is a degree from Queen’s.

## Computer Engineering Major Map

**BACHELOR OF APPLIED SCIENCE | BACHELOR OF APPLIED SCIENCE WITH PROFESSIONAL INTERNSHIP**

### Get the Courses You Need

**1st Year**
- Queen's Engineering first year is common—courses include: Physics, Chemistry, Calculus, Algebra, Graphics, Computing and Earth Systems Engineering.
- Also APSC100, the entry level course in our Engineering Design and Practice Sequence (EDPS), focusing on problem solving, experimentation principles and finishing off with a team-based engineering project.
- Discipline selection will take place in February!

**2nd Year**
- You will take the second EDPS course—APSC200, plus one Complementary Studies course.
- CEi students, the Complementary Studies course required is Introduction to Business for Entrepreneurs.

**3rd Year**
- You will also take the Electrical and Computer Engineering Design Course. You will also need to take 2 Technical Electives, plus one Complementary Studies course.
- CEi students take two predetermined Complementary Studies courses.

**4th or Final Year**
- All Computer Engineering students follow up their ELEC 3R0 ECE Design course with the Computer Engineering Project course (ELEC 498). CEi students follow up their Entrepreneurial ECE Design course with Entrepreneurship Computer Engineering Project. You will also need to choose appropriately 7.5 Technical Electives (totaling 22.5 units), plus one Complementary Studies course. You may also take a Research Project course (ELEC 497).
- For CEi, the Complementary Studies course is Pitching and Launching your Venture.

### Get Relevant Experience

**Get Involved with the Community**
- Join teams or clubs on campus such as Engweek Committee, QCES, and the Solar Design Team (QSDT).
- Apply for first year positions such as ENGSOC Computer Manager. See the AMS Clubs Directory or the Queen's Get Involved page for more ideas.

**Get Connected with the Community**
- Volunteer on or off campus with different community organizations, such as Queen's Game Developers Club, Science Quest, and Mostly Autonomous Sailboat Team (MAST).
- Attend conferences like the Queen's Engineering Competition (QEC) and the Electrical and Computer Engineering Competition.

**Get Thinking Globally**
- Speak to a QUC advisor or get involved in their programs, events and training opportunities.
- Prepare for work or study in a multi-cultural environment by taking QUC's Intercultural Competency Certificate, and research possible immigration regulations.

**Get Ready for Life After Graduation**
- Grappling with program decisions? Go to the Orientation Advisory held by different Engineering departments and attend the various Career Fairs during the year.
- Get some help deciding by visiting Career Services.

### Consider a 12-16 Month Quip Internship

**Employability Skills**
- Your time at Queen's will give you valuable skills to boost your employability, including:
  - Understanding of computer systems, computer hardware, electronics, and software engineering
  - Knowledge of research techniques and methods of data analysis
  - Analytical and logical thinking
  - Problem solving
  - Conduct scientific research and summarize findings
  - Proficiency in mathematics – solve mathematical problems and analyze quantitative information
  - Oral and written communication – explain technical information to others in reports and presentations
  - Work independently and in a team on a project
  - Time and resource management

**Where Could I go after graduation?**
- Aerospace software
- Automotive design
- Software development
- Medical informatics
- Mechatronics
- Natural language processing
- Wearable technology

How to use this map

Use the 5 rows of the map to explore possibilities and plan for success in the five overlapping areas of career and academics. The map just offers suggestions – you don’t have to do it all! To make your own custom map, use the My Major Map tool.

Get started thinking about the future now – where do you want to go after your degree? Having tentative goals (like careers or grad school) while working through your degree can help with short-term decisions about courses and experiences, but also help you keep motivated for success.

Get the help you need

Queen’s provides you with a broad range of support services from your first point of contact with the university through to graduation. At Queen’s, you are never alone. We have many offices dedicated to helping you learn, think and do.

Ranging from help with academics and careers, to physical, emotional, or spiritual resources – our welcoming living and learning environment offers the programs and services you need to be successful, both academically and personally, and Queen’s wants you to succeed! Check out the Student Affairs website for available resources.

Why study in Kingston?

For 175 years, our community has been more than a collection of bright minds – Queen’s has attracted students with an ambitious spirit. Queen’s has the highest retention rates, the highest graduation rates, and one of the highest employment rates among recent graduates. We are a research intensive university focused on the undergraduate experience. The BBC has identified us as one of the GREATEST UNIVERSITY TOWNS in the world – and is often awarded the safest city in Canada. We are a university city at the core; just a quick drive to Toronto, Montreal, Ottawa and even New York. A university with more clubs per capita than any other university in Canada, and a city with more restaurants per capita than any other city in North America – you will have the experience of a lifetime at Queen’s – and graduate with a degree that is globally recognized among the best.
