## WHY STUDY HISPANIC STUDIES AT QUEEN'S?

Knowledge of Spanish is increasingly important in today's world: there are over 350 million Spanish native speakers. By taking Hispanic Studies at Queen's you will expand your Spanish language skills and/or gain knowledge about critical literary and cultural concepts of the Spanish speaking world. This major will also give you the opportunity to go abroad to a Spanish speaking country and immerse yourself in the language and culture. With your language and culture skills you will have greater opportunities in the job market, be able to communicate with co-workers and customers, understand signage and documents, especially if traveling abroad.

## WHY STUDY LANGUAGES, LITERATURES, AND CULTURES AT QUEEN'S?

The world can seem like a big place, but through the LLCU major, students will get a glimpse into how small and connected it really is and be able to engage with intercultural sensitivity and a palette of relevant skills. Through this program, students can learn a minimum of two languages from over 14 languages taught at Queen's, understanding not only their linguistic structures but the cultures in which they are formed. Learning another language provides students with the ability to step inside the mind and context of that culture and to better understand their own.

## WHY STUDY LINGUISTICS AT QUEEN'S?

Linguistics is the study of language and its structure, including the study of morphology, syntax, phonetics, phonology and semantics. Linguistics students explore how a language is structured, how it is acquired, how it is used in the production and comprehension of messages, how it changes over time. They will try to answer questions relating to the nature of language such as what all languages have in common or how children learn a language. Because language accompanies almost all human activities, and is the medium for many of them, Linguistics is a highly interdisciplinary study with connections to Philosophy, Psychology, Computer Science, Cognitive Science or Health Sciences.
