Why combine **MEDICINE** and **GRADUATE RESEARCH**?

The Graduate Diploma in Medical Sciences is a new program offered through a partnership between the Department of Biomedical and Molecular Sciences (DBMS), Postgraduate Medical Education (PGME), and Undergraduate Medical Education (UGME). This program has been specifically designed for graduates of medical schools who have not yet matched to a postgraduate residency program in Canada.

The Medical Sciences program provides medical school graduates with an opportunity to enhance their clinical and research skills before applying to a postgraduate residency program. Students will build on the foundations of their medical degree in many ways. They will further develop their clinical skills in the context of the Canadian healthcare system and explore current issues in medical sciences. They’ll interpret foundational research and its relationship to clinical practice, conduct research responsibly using appropriate guidelines and procedures, and apply ethical behaviours consistent with academic integrity and professional standards.

It is anticipated that the emphasis on research, clinical skills, and scholarship will enhance any future applications for residency positions through the Canadian Resident Matching Service (CaRMS).

**Program STRUCTURE**

Graduate Diploma (6 months). This is a course-based program. Upon completion of MSCI 800, 801 + 1 elective, students may apply for the Professional Masters of Medical Sciences or ladder into other MSc programs in the Faculty of Health Sciences.

**Option 1:** Start in July and go to December  
**Option 2:** Start in January and go to June
**Medical Sciences GDIP Map**

**GETTING STARTED**
- Start your coursework and review clinical interests for potential research proposal.
- Discuss the CanMEDS educational framework.
- Complete a workshop on conducting literature searches.
- Meet with your academic advisor to discuss clinical placement performance.
- If you will be continuing graduate studies, apply for funding from sources such as CIHR, NSERC, OGS, the Heart & Stroke Foundation, CBCF, the Department of Defence and the American Cancer Society.
- Start to think about the audiences for your research.

**MAXIMIZE RESEARCH IMPACT**
- Consider positions in student services, the SGS, or media outlets like the Queen's Journal, CFRC, Studio Q and the SGS Blog. Look in the AMS Clubs Directory for more ideas.
- Check out professional development workshops from Expanding Horizons and the Rehabilitation Science Department.

**BUILD SKILLS AND EXPERIENCE**
- Explore how you can connect with your community through experiential opportunities on- and off-campus.
- Consider volunteering with different community organizations, such as Kingston General Hospital.

**ENGAGE WITH YOUR COMMUNITY**
- Participate in your graduate and professional community through activities such as graduate student outreach programs, organizing conferences, and research groups.
- Prepare for work or studies in a multi-cultural environment by taking the Intercultural Awareness Training Certificate hosted by QUIC and FDSC.
- If you are an international student interested in staying in Canada, consider speaking with an International Student Advisor.

**LAUNCH YOUR CAREER**
- Finding a career that fits starts with knowing yourself. Get help by taking a Career Services career planning workshop or meeting with a career counsellor. Check out books like So What Are You Going to Do With That? or Planning a Scientific Career in Industry from the Career Resource Area for advice on various career options.
- Start reading publications like University Affairs and the Chronicle of Higher Education. Browse academic and non-academic market websites.
- Complete evidence-based learning experiences by taking a Career Services workshop.
- For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SGS902 or the PUTF certificate for more professional development in teaching and learning.
- Do some targeted networking with people working in careers of interest, through Queen'sConnects on LinkedIn, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Attend a conference in your field.

**INTERMEDIATE STAGE**
- Complete the Fundamentals of Academic Research course (BMED 860) and develop your research proposal in MSCI 800.
- Attend Evidence-Based Journal Club Meetings, participate in Facilitated Small Group Learning sessions, demonstrate incorporation of CanMEDS competencies in your clinical/simulated learning environment, take the Nightmares Course (simulation-based critical events training), and perform technical/procedural skills in our state-of-the-art simulation lab.
- Meet with your academic advisor to discuss clinical placement performance.
- Start keeping an eportfolio of your skills, experiences and competencies.
- For help with teaching, get support from the Centre for Teaching and Learning. Enroll in SGS902 or the PUTF certificate for more professional development in teaching and learning.
- Practice articulating the skills you have been developing in settings outside the university, such as casual conversation, networking, and interviews. Get help from a Career Services workshop.
- Check out opportunities for extra training through CTL, Expanding Horizons, Mitacs, or other sources to boost your skills.
- Investigate internships from Mitacs and other sources.

**WRAPPING UP**
- Complete your coursework and research proposal for MSCI 800.
- Complete Standardized Patient OSCE examination to demonstrate your clinical skills.
- Consider applying for the Professional Masters of Medical Sciences or into other MSc programs in the Faculty of Health Sciences.
- Attend a major conference in your field. There are many to choose from, so talk to your supervisor for advice on which ones would be most relevant.
- Consider putting an article in The Conversation.
- Consider publishing elements of your research.
- Learn from the Expanding Horizons Publishing workshop.
- Do some targeted networking with people working in careers of interest, through Queen'sConnects on LinkedIn, the Queen's Alumni Association, professional associations, and at conferences. Get help from a Career Services workshop.
- Attend a conference in your field.

**WHAT WILL I LEARN?**
A Graduate Diploma in Medical Sciences can equip you with:
- Knowledge and technical skills: CanMEDS Educational Framework
- Effective communication skills in multiple forms for diverse audiences
- Information management: prioritize, organize and synthesize large amounts of information
- Time management: Meet deadlines and manage responsibilities despite competing demands
- Project management: develop ideas, gather information, analyze, critically appraise findings, draw and act on conclusions
- An understanding of ethical practices, social responsibility, responsible research and cultural sensitivity
- Professionalism in work, research, and interactions
- Leadership: initiative and vision leading people and discussion

**WHERE CAN I GO?**
A Graduate Diploma in Medical Sciences can take your career in many directions. Our students are equipped with a strong foundation for careers in:
- Academic and research labs
- Administration in academic, health care or government settings
- Apply for residency through the Canadian Resident Matching Service (CaRMS)
- Data Analysis (Health units, government agencies)
- Health Care (Hospital clinical labs)
- Health research (research associates in universities, hospitals, government, public health units)
- Marketing positions in private sector
- Pharmaceutical companies
- Scientific supply companies
- Teaching positions in academic institutions or the private sector
- Technical positions in academic institutions or the private sector

Application FAQs

What do I need to know to APPLY?

ACADEMIC REQUIREMENTS

In order to be considered for admission to the Graduate Diploma in Medical Sciences, applicants need to hold an MD or equivalent from a medical school on the International Medical Education Directory and have a B+ graduating average or higher in all postsecondary education.

Instructions on how to submit all required documentation will be sent to you by email upon application submission.

REQUIRED DOCUMENTS

Applicants must submit:
- Official transcripts from all postsecondary education;
- Personal Statement indicating the alignment of the applicant’s background and career aspirations with the objectives of the program;
- Curriculum Vitae;
- 2 references from individuals familiar with the candidate’s academic and/or clinical performance; and a
- Medical Student Performance Record or Dean’s Letter.

All Applicants must submit their score reports on both Medical Council of Canada Qualifying Examination (MCCQE) Part 1 and National Assessment Collaboration (NAC) examination. Applicants may submit the Medical Council of Canada Evaluating Examination (MCCEE) in place of the MCCQE part 1.

ADDITIONAL REQUIREMENTS

While proof of English language proficiency is not required, a thorough understanding, as written, is essential. It is strongly suggested that applicants also review requirements for admission to residency programs and to the School of Graduate Studies.

Please note that these requirements are higher than the minimum standards set by the School of Graduate Studies. As these students will be involved in observing the clinical care of patients, and participating in the clinical team discussion about the investigation and management of their clinical problems and in the clinical assessment of standardized patients, a thorough understanding and ability to communicate in English is essential.

The APPLICATION PROCESS

STEP 1: Submit your online application via the School of Graduate Studies.

STEP 2: Once you have submitted your application, read instructions on how to submit all required documents.

STEP 3: Submit all required documents to the School of Graduate Studies. After review of the complete application, competitive candidates will be invited for an interview with the Medical Sciences Program (via Zoom).
